Reilly, Samuel Estreicher, 2010-04-30 Most employers know that rewarding their best workers is good business However the return on such investment is difficult to measure and wise employers think long and hard about two of their largest expense items employee benefits and executive compensation Today in the United States under the glare of issues raised by the current financial crisis company sponsored benefits programs have become mere shadows of what they once were and executive compensation has come under intense scrutiny to the point where the Treasury Department monitors it at companies receiving federal assistance In recognition of the growing importance of employee benefits and executive compensation issues the Center for Labor and Employment Law at New York University School of Law dedicated New York University s 59th Annual Conference on Labor to an in depth examination of these topics This volume of the proceedings of the 2006 conference contains papers presented at that meeting all here updated to reflect recent developments It also includes contributions from other practitioners and academics with extensive knowledge and experience in this specialized field of labor and employment law

the plans Although the PBGC's liabilities are not explicitly backed by the full faith and credit of the federal government Congress could face political pressure to bail out the PBGC at taxpayer expense should the agency become financially insolvent Bradley Belt former executive director of the Pension Benefit Guaranty Corporation PBGC testified before Congress in October 2004 I am particularly concerned with the temptation and indeed growing tendency to use the pension insurance fund as a means to obtain an interest free and risk free loan to enable companies to restructure Unfortunately the current calculation appears to be that shifting pension liabilities onto other premium payers or potentially taxpayers is the path of least resistance rather than a last resort **New Directions in Retirement Security Policy** United States.
