**Securing Nuclear Materials** Mary Beth Nikitin, 2010-09 Contents 1 Intro 2 The Summit Expected Summit Outcomes Foreign Reactions to the Summit The Non Proliferation Treaty and Nuclear Security 3 What is Nuclear Security NS 4 Challenges to Achieving the Four Year Goal 5 Domestic NS Measures 6 Multilateral Efforts to Improve NS The IAEA and NS Informal Initiatives and Non Proliferation Assistance 7 Role of Non Governmental Org and Industry 8 Considerations and Options for Congress Legislation in the 111th Congress NS and the FY 2011 Congressional Budget Request Appendix A Multilateral NS Related Instruments and Initiatives Appendix B U S NS Assistance to Foreign Countries     **Understanding and Managing Risk in Security Systems for the DOE Nuclear Weapons Complex** National Research Council, Division on Earth and Life Studies, Nuclear and Radiation Studies Board, Committee on Risk-Based Approaches for Securing the DOE Nuclear Weapons Complex, 2011-05-07 A nuclear weapon or a significant quantity of special nuclear material SNM would be of great value to a terrorist or other adversary It might have particular value if acquired from a U S facility in addition to acquiring a highly destructive tool the adversary would demonstrate an inability of the United States to protect its nuclear assets The United States expends considerable resources toward maintaining effective security at facilities that house its nuclear assets However particularly in a budget constrained environment it is essential that these assets are also secured efficiently meaning at reasonable cost and imposing minimal burdens on the primary missions of the organizations that operate U S nuclear facilities It is in this context that the U S Congress directed the National Nuclear Security Administration NNSA a semi autonomous agency in the U S Department of Energy DOE responsible for securing nuclear weapons and significant quantities of SNM asked the National Academies for advice on augmenting its security approach particularly on the applicability of quantitative and other risk based approaches for securing its facilities In carrying out its charge the committee has focused on what actions NNSA could take to make its security approach more effective and efficient The committee concluded that the solution to balancing cost security and operations at facilities in the nuclear weapons complex is not to assess security risks more quantitatively or more precisely This is primarily because there is no comprehensive analytical basis for defining the attack strategies that a malicious creative and deliberate adversary might employ or the probabilities associated with them However using structured thinking processes and techniques to characterize security risk could improve NNSA s understanding of security vulnerabilities and guide more effective resource allocation     **Managing the Global Nuclear Materials Threat** Sam Nunn, Robert E. *Vision Working Group Report and Scenarios* Sheila R. Ronis,2010 The Project on National Security Reform submitted its 2 year study of the national security system Forging a New Shield to the President President elect and Congress on November 26 2008 Before the Project finalized the report s recommendations its Vision Working Group tested the findings against a diverse set of scenarios to determine if the recommendations were robust and effective This volume documents the scenario testing process used by the Vision Working Group and includes the actual pre reform and post reform scenarios and details many other scenario techniques used in the overall study Results revealed that each of the five major findings improved the performance of the current national security system but on the whole the findings concluded that the national security system was at risk of failure and needed serious reform The work of the Vision Working Group has led to the formulation of an additional recommendation The country must establish a mechanism to infuse greater foresight into the Executive Branch and in particular the national security system This proposed mechanism named the Center for Strategic Analysis and Assessment would exist and operate within the Executive Office of the President This volume details

Lowther,Stephen J. Cimbala,2016-09-19 One important area of interest within military and policy circles focuses on an effort to revitalize the nuclear triad amidst a number of competing strategic interests The difficulties arising from US engagement in Iraq and Afghanistan are leading many scholars and policy makers to question whether a reinvigorated nuclear triad has any role in deterring modern adversaries This volume takes an unashamed pro nuclear modernization position and argues for designing and fielding new nuclear warheads and delivery systems submarine ICBM and bomber while also arguing against signing the Comprehensive Test Ban Treaty or agreeing to further reductions in the nuclear arsenal It also argues that nuclear deterrence remains as relevant today perhaps more than it was during the Cold War With so many authors advocating for Global Zero and highlighting perceived dangers from a nuclear arsenal this work stands in stark contrast to the chorus of anti arsenal works Because of the work s structure and effort to answer questions of current relevance it should appeal to a broad audience including service staffs PME students COCOM staffs Pentagon personnel Capitol Hill staffers policy makers academics graduate students and interested readers      *Presidential Leadership and National Security* Richard S.
