

Security Requirements

- Security requirements describe all security conditions that have to be considered in the data warehouse environment.
- The first step for the definition of security requirements is to classify the security objects and security subjects of the data warehouse environment.
- security objects :classifications would be classification by sensitivity (public, confidential, top secret) or according to job functions (accounting data, personnel data)
- security subject :We can follow a top-down company view, with users classified by department , section, group, and so on. Another possible classification is role based, with people grouped across departments based on their role
