Peace Education Evaluation Celina Del Felice, Aaron Karako, Andria Wisler, 2015-05-01 Practice and research of peace education has grown in the recent years as shown by a steadily increasing number of publications programs events and funding mechanisms The oft cited point of departure for the peace education community is the belief in education as a valuable tool for decreasing the use of violence in conflict and for building cultures of positive peace hallmarked by just and equitable structures Educators and organizations implementing peace education activities and programming however often lack the tools and capacities for evaluation and thus pay scant regard to this step in program management Reasons for this inattention are related to the perceived urgency to prioritize new and more action in the context of scarce financial and human resources notwithstanding violence or conflict the lack of skills and time to indulge in a thorough evaluative strategy and the absence of institutional incentives and support Evaluation is often demand driven by donors who emphasize accounting given the current context of international development assistance and budget cuts Program evaluation is considered an added burden to already over tasked programmers who are unaware of the incentives and of assessment techniques Peace education practitioners are typically faced with forcing evaluation frameworks techniques and norms standardized for traditional education programs and venues Together these conditions create an unfavorable environment in which evaluation becomes under valued de prioritized and mythologized for its laboriousness This volume serves three inter related objectives First it offers a critical reflection on theoretical and methodological issues regarding evaluation applied to peace education interventions and programming The overarching questions of the nature of peace and the principles guiding peace education as well as governing theories and assumptions of change transformation and complexity are explored Second the volume investigates existing quantitative qualitative and mixed methods evaluation practices of peace educators in order to identify what needs related to evaluation persist among practitioners Promising practices are presented from peace education programming in different settings formal and non formal education within various groups e g children youth police journalists and among diverse cultural contexts Finally the volume proposes ideas of evaluation novel techniques for experimentation and creative adaptation of tools from related fields in order to offer pragmatic and philosophical substance to peace educators next moves and inspire the agenda for continued

Ted Allen Studebaker Gary W. Studebaker,Douglas E. Studebaker,2017-04-12 Ted Studebaker a true peace hero worked for peace through nonviolence By doing so he left a peacemaking legacy that continues to impact mankind through the ages He was a volunteer agriculturalist in the highlands of Vietnam during the war As he began his third year of work he married the love of his life Pakdy a Chinese coworker One week after their marriage Vietnamese forces opposing the Americans entered their house where they killed him Ted was fully prepared and armed with confidence for the work that God had set before him He was totally committed to give of himself without reservation Ted gratefully acknowledged his government s position of accepting alternative service to serve mankind as opposed to military service He wrote to his draft board I don t feel unpatriotic or disloyal to my country However I do think there are certain rights beliefs and values to which one should be more devoted to than his country if he has arrived at them through conscientious thought learning and experience Ted was aware of the opposition he would face for his peacemaking stand yet he was true to his beliefs In doing so he remains an enduring force for peace Narrative and the Politics of Identity Phillip L. Hammack,2011 Since the late nineteenth century Jews and Arabs have been locked in an intractable battle for national recognition in a land of tremendous historical and geopolitical significance While historians and political scientists have long analyzed the dynamics of this bitter conflict rarely has an archeology of the mind of those who reside within the matrix of conflict been attempted This book not only offers a psychological analysis of the consequences of conflict for the psyche it develops an innovative compelling and cross disciplinary argument about the mutual constitution of culture and mind through the process of life story construction But the book pushes boundaries further through an analysis of two peace education programs designed to fundamentally alter the nature of young Israeli and Palestinian life stories Hammack argues that these popular interventions rooted in the idea of prejudice reduction through contact and the cultivation of cosmopolitan identities are fundamentally flawed due to

their refusal to deal with the actual political reality of young Israeli and Palestinian lives and their attempt to construct an alternative narrative of great hope but little resonance for Israelis and Palestinians Grounded in over a century of literature that spans the social sciences Hammack s analysis of young Israeli and Palestinian lives captures the complex dynamic relationship among politics history and identity and offers a provocative and audacious proposal for psychology and peace education
