Vance Watrous, 2005-02-01 The Plain of Phaistos presents the results on an interdisciplinary regional field project 1984 1987 carried out on the island Of Crete This volume traces the changing patterns of settlement and cycles of social complexity from the Late Neolithic period to the present day within the heartland of the state of Phaistos The authors and contributors publish geological archaeological environmental botanical historical and ethnographic studies that establish the regional identity of the Western Mesara Using a combination of empirical processual and post processual theoretical approaches the volume investigates a central problem how and why did the Bronze Age and Classical states arise at Phaistos

Tending the Wild M. Kat Anderson, 2005-06-14 A complex look at California Native ecological practices as a model for environmental sustainability and conservation John Muir was an early proponent of a view we still hold today that much of California was pristine untouched wilderness before the arrival of Europeans But as this groundbreaking book demonstrates what Muir was really seeing when he admired the grand vistas of Yosemite and the gold and purple flowers carpeting the Central Valley were the fertile gardens of the Sierra Miwok and Valley Yokuts Indians modified and made productive by centuries of harvesting tilling sowing pruning and burning Marvelously detailed and beautifully written Tending the Wild is an unparalleled examination of Native American knowledge and uses of California s natural resources that reshapes our understanding of native cultures and shows how we might begin to use their knowledge in our own conservation efforts M Kat Anderson presents a wealth of information on native land management practices gleaned in part from interviews and correspondence with Native Americans who recall what their grandparents told them about how and when areas were burned which plants were eaten and which were used for basketry and how plants were tended The complex picture that emerges from this and other historical source material dispels the hunter gatherer stereotype long perpetuated in anthropological and historical literature We come to see California s indigenous people as active agents of environmental change and stewardship Tending the Wild persuasively argues that this traditional ecological knowledge is essential if we are to successfully meet the challenge of living sustainably New Geographies of Language Rhys Jones, Huw Lewis, 2018-11-19

This book develops a novel approach to the study of language bringing it into dialogue with the latest geographical concepts and concerns and provides a comprehensive account of the geography of Welsh language analysing policy development language use ability and shift The authors examine in particular the different ways in which languages can be mapped how geographical insights can be used to develop understandings of language use the value of assemblage theory as a way of interpreting the social technical and spatial aspects of language policy development and the geographies that characterise institutional engagements with languages This book will set a research agenda for the geographical study of language developing a conceptual framework that will offer fresh insights to researchers in the fields of Applied Linguistics Sociolinguistics Minority Languages Geolinguistics and Public Policy **Placing Animals** Julie Urbanik,2012-08-02 As Julie Urbanik vividly illustrates non human animals are central to our daily human lives We eat them wear them live with them work them experiment on them try to save them spoil them abuse them fight them hunt them buy and sell them love them and hate them *Placing Animals* is the first book to bring together the historical development of the field of animal geography with a comprehensive survey of how geographers study animals today Urbanik provides readers with a thorough understanding of the relationship between animal geography and the larger animal studies project an appreciation of the many geographies of human animal interactions around the world and insight into how animal geography is both challenging and contributing to the major fields of human and nature society geography Through the theme of the role of place in shaping where and why human animal interactions occur the chapters in turn explore the history of animal geography and our distinctive relationships in the home on farms in the context of labor in the wider culture and in the wild *A Peculiar People* Rodney R. Clapp,1996-11-12 Rodney Clapp asks and answers the question How can the church provide a significant alternative to the culture in which it is embedded Spirits and Ships Andrea Acri,2017-03-13 This volume seeks to foreground a borderless history and geography of South Southeast and East Asian littoral zones that would be maritime focused and thereby explore the ancient connections and dynamics of interaction that favoured the encounters among the cultures found throughout the region stretching from the Indian Ocean littorals to the Western Pacific from the early historical period to the present Transcending the artificial boundaries of macro regions and nation states and trying to bridge the arbitrary divide between inherently cosmopolitan high cultures e g Sanskritic Sinitic or Islamicate and local or indigenous cultures this multidisciplinary volume explores the metaphor of Monsoon Asia as a vast geo environmental area inhabited by speakers of numerous language phyla which for millennia has formed an integrated system of littorals where crops goods ideas cosmologies and ritual practices circulated on the sea routes governed by the seasonal monsoon winds The collective body of work presented in the volume describes Monsoon Asia as an ideal theatre for circulatory dynamics of cultural transfer interaction acceptance selection and avoidance and argues that despite the rich ethnic linguistic and sociocultural diversity a shared pattern of values norms and cultural models is discernible throughout the region *What is*

Migration History? Christiane Harzig, Dirk Hoerder, 2013-04-23 The study of migration is and always has been an interdisciplinary field of study vast and vibrant in nature This short introduction to the field written by leading historians of migration for student readers offers an acute analysis of key issues across several disciplines It takes in its scope an overview of migrations through history how classic theories have interpreted such movements and contemporary topics and debates including transnational and transcultural lives access to citizenship and migrant entrepreneurship Historical perspectives reveal how the scholarly field emerged and developed over time and across cultures and how historians of migration have recently begun to re write the story of human life on earth Throughout the authors suggest how the movements of millions of mobile men and women persistently challenge changing scholarly paradigms for understanding their lives Key concepts and theories such as systems networks and gender are explained and historicized to produce a complex picture of the interaction of migrants scholars and disciplinary cultures in a globalized world

Waste: Uncovering the Global Food Scandal Tristram Stuart, 2009-10-26 The true cost of what the global food industry throws away With shortages

volatile prices and nearly one billion people hungry the world has a food problem or thinks it does Farmers manufacturers supermarkets and consumers in North America and Europe discard up to half of their food enough to feed all the world s hungry at least three times over Forests are destroyed and nearly one tenth of the West s greenhouse gas emissions are released growing food that will never be eaten While affluent nations throw away food through neglect in the developing world crops rot because farmers lack the means to process store and transport them to market But there could be surprisingly painless remedies for what has become one of the world s most pressing environmental and social problems Waste traces the problem around the globe from the top to the bottom of the food production chain Stuart s journey takes

him from the streets of New York to China Pakistan and Japan and back to his home in England Introducing us to foraging pigs potato farmers and food industry CEOs Stuart encounters grotesque examples of profligacy but also inspiring innovations and ways of making the most of what we have The journey is a personal one as Stuart is a dedicated freegan who has chosen to live off of discarded or self produced food in order to highlight the global food waste scandal Combining front line investigation with startling new data Waste shows how the way we live now has created a global food crisis and what we can do to fix it

The Origins of the World's Mythologies E.J. Michael Witzel, 2012-12-13 This remarkable book is the most ambitious work on mythology since that of the renowned Mircea Eliade who all but single handedly invented the modern study of myth and religion Focusing on the oldest available texts buttressed by data from archeology comparative linguistics and human population genetics Michael Witzel reconstructs a single original African source for our collective myths dating back some 100 000 years Identifying features shared by this Out of Africa mythology and its northern Eurasian offshoots Witzel suggests that these common myths recounted by the communities of the African Eve are the earliest evidence of ancient spirituality Moreover these common features Witzel shows survive today in all major religions Witzel s book is an intellectual hand grenade that will doubtless generate considerable excitement and consternation in the scholarly community Indeed everyone interested in mythology will want to grapple with Witzel s extraordinary hypothesis about the spirituality of our common ancestors and to understand what it tells us about our modern cultures and the way they are linked at the deepest level

Smallholders and Stockbreeders P. Boomgaard, David E.F. Henley, 2021-11-15 Historians of Southeast Asia have traditionally preferred to write about politics and culture rather than economics and ecology and where they have looked at the history of agriculture they have most often concentrated on cash crops like sugar coffee and rubber which figure prominently in colonial records Smallholders and stockbreeders by contrast provides a rare survey of the history of foodcrop farming and a unique look at the history of animal husbandry in the Southeast Asian region Thirteen contributions by an international selection of expert authors cover topics ranging from the agricultural economy of precolonial Java to the growth of rice production in the Mekong Delta since 1950 and from the breeding of horses on the northern borderlands of mainland Southeast Asia to the production and consumption of beef in the Philippines New light is shed on old questions regarding the directions in which Southeast Asian agriculture has evolved over the centuries and new questions raised regarding the cultural demographic economic and political determinants of farming practices While the geographical and chronological scales of analysis vary most chapters deal with relatively large areas and with developments over periods of 100 years or more Besides production for subsistence commercial aspects of livestock and foodcrop farming are also given due attention and prove to have been important in many parts of the region from very early periods Smallholders and stockbreeders is essential reading for anyone interested in the agricultural history of Southeast Asia whether for its own sake or in connection with other aspects of regional history or for purposes of comparison with other parts of the world

Savages and Civilization Jack Weatherford, 2010-05-19 A provocative and vivid Minneapolis Star Tribune look at the primitive cultures that have given many gifts to the modern world and how their very existence is now threatened This book should serve as a wake up call to people everywhere Library Journal In Indian Givers and Native Roots renowned anthropologist Jack Weatherford explored the clash between Native American and European cultures Now in *Savages and Civilization* Weatherford broadens his focus to examine how civilization threatens to obliterate unique tribal and ethnic cultures around the world and in the process imperils its own existence As Weatherford explains the relationship between civilized and savage peoples through history has encompassed not only violence but also a surprising degree of cooperation mutual influence trade and intermarriage But this relationship has now entered a critical stage everywhere in the world as indigenous peoples fiercely resist the onslaught of a global civilization that will obliterate their identities *Savages and Civilization* powerfully demonstrates that our survival as a species is based not on a choice between savages and civilization but rather on a commitment to their vital coexistence
