Seeing The Invisible In Late Antiquity And The Early Middle Ages:

Seeing the Invisible in Late Antiquity and the Early Middle Ages Giselle de Nie, Karl Frederick Morrison, Marco Mostert, 2005 Limiting itself to the vital centuries when the late Roman West reshaped itself into a first Europe the conference explored the dominant conception of human nature in that era that human existence was both body in the visible world of material things and soul in the invisible world of spirit This was a legacy of pre Christian elements handed down from Greek philosophy and Hebrew Scriptures Assimilating it to indigenous cultures in the Roman West many alien to the ancient Mediterranean world precipitated sea changes in the understanding of human psychology Ensuing frictions sparked extraordinary expressions of creativity in words and visual images It also created dangerously subversive disequilibriums in the collective mentality within elites and between them and majority cultures The papers in this volume investigate numerous configurations of a new culture taking shape in that volatile environment They contribute to continuing debates about the cognitive co ordination of words and pictorial images and to cross disciplinary dialogues in such disparate fields as art history religious literature mysticism and cultural anthropology

The Corporeal Imagination Patricia Cox Miller, 2012-02-28 With few exceptions the scholarship on religion in late antiquity has emphasized its tendencies toward transcendence abstraction and spirit at the expense of matter In *The Corporeal Imagination* Patricia Cox Miller argues instead that ancient Christianity took a material turn between the fourth and seventh centuries During this period Miller contends there occurred a major shift in the ways in which the human being was oriented in relation to the divine a shift that reconfigured the relationship between materiality and meaning in a positive direction *The Corporeal Imagination* is a groundbreaking investigation into the theological poetics of material substance in late ancient Christian texts From hagiographies to literary descriptions of sacred paintings to treatises on relics and theurgy Miller examines a wide variety of ancient texts to reveal how Christian writers increasingly described the matter of the world as invested with divine power By appealing to the reader's sensory imagination Christian texts endowed phenomena like relics saints bodies in hagiography and saints presence in icons with a visual and tactile presence The book draws on a variety of contemporary theoretical models to elucidate the significance of all these materials in ancient religious life and imagination

Envisioning Experience in Late Antiquity and the Middle Ages Giselle de Nie, 2016-05-06 Our imagination reveals our experience of ourselves and our world The late philosopher of science and poetry Gaston Bachelard introduced the notion that each image that comes to mind spontaneously is a visual representation of the cognitive and affective pattern that is moving us at the time often unconsciously When such a mental image inspires a picture or text it evokes in the mind of the reader or beholder a replication of the internal pattern that originally inspired the artist or writer Thus mental images are rarely empty phantasies Whereas intellectual concepts are conscious constructions of abstracted relations mental images evoked by texts and pictures often point like dreams to pre verbal experience that patterns itself through multiplying associations and analogies

These mental images can also manifest their own limits pointing indirectly to experiences beyond what can be expressed and communicated. The six essays in this volume seek to uncover the dynamic patterns in verbal and pictorial images and to evaluate their potentialities and limitations. Thematically ordered according to their specific focus, the essays begin with material images and move on to increasing degrees of immateriality. The subjects treated are verbal descriptions of an icon and of a statue, imaginative visions and auditions evoked by material depictions, verbal imagery describing imagined sculptures and scenes as compared with drawings of a moving historical pageant, drawings of symbolic figures representing subtle relationships between verbal expositions that cannot be syntactically represented, dream images that precipitate actual healing and aural patterns in a sounded text that are experienced as images of affective dynamisms.

Death and Rebirth in Late Antiquity Lee M. Jefferson, 2022-08-16. Death and rebirth was of vital importance to early Christians in late antiquity. In late antiquity, death was all encompassing. Mortality rates were high; plague and disease in urban areas struck at will, and one lived on the knife's edge regarding one's health. Religion filled a crucial role in this environment, offering an option for those who sought cure and comfort. Following death, the inhumed were memorialized, providing solace to family members through sculpture, painting, and epigraphy. This book offers a sustained interdisciplinary treatment of death and rebirth, a theme that early Christians and scholars found important. By analysing the theme of death and rebirth through various lenses, the contributors deepen our understanding of the early Christian funerary and liturgical practices as well as their engagement with other groups in the Empire.

Iconophilia Francesca Dell'Acqua, 2020-05-07. Between the late seventh and the mid-ninth centuries, a debate about sacred images, conventionally addressed as Byzantine iconoclasm, engaged monks, emperors, and popes in the Mediterranean area and on the European continent. The importance of this debate cannot be overstated; it challenged the relation between image, text, and belief. A series of popes staunchly in favour of sacred images acted consistently during this period in displaying a remarkable iconophilia or love for images. Their multifaceted reaction involved not only council resolutions and diplomatic exchanges but also public religious festivals, liturgy, preaching, and visual arts, the mass media of the time. Embracing these tools, the popes especially promoted themes related to the Incarnation of God, which justified the production and veneration of sacred images and extolled the role and the figure of the Virgin Mary. Despite their profound influence over Byzantine and western cultures of later centuries, the political, theological, and artistic interactions between the East and the West during this period have not yet been investigated in studies combining textual and material evidence. By drawing evidence from texts and material culture, some of which have yet to be discussed against the background of the iconoclastic controversy, and by considering the role of oral exchange, *Iconophilia* assesses the impact of the debate on sacred images and of coeval theological controversies in Rome and central Italy. By looking at intersecting textual, liturgical, and pictorial images which had at their core the Incarnate God and his human mother Mary, the book demonstrates that between c. 680–880, by unremittingly maintaining the importance of the visual for

nurturing beliefs and mediating personal and communal salvation the popes ensured that the status of sacred images would remain unchallenged at least until the Protestant Reformation in the sixteenth century

Perceptions of the Body and Sacred Space in Late Antiquity and Byzantium Jelena Bogdanovic, 2018-04-09 Perceptions of the Body and Sacred Space in Late Antiquity and Byzantium seeks to reveal Christian understanding of the body and sacred space in the medieval Mediterranean Case studies examine encounters with the holy through the perspective of the human body and sensory dimensions of sacred space and discuss the dynamics of perception when experiencing what was constructed represented and understood as sacred The comparative analysis investigates viewers recognitions of the sacred in specific locations or segments of space with an emphasis on the experiential and conceptual relationships between sacred spaces and human bodies This volume thus reassesses the empowering aspects of space time and human agency in religious contexts By focusing on investigations of human endeavors towards experiential and visual expressions that shape perceptions of holiness this study ultimately aims to present a better understanding of the corporeality of sacred art and architecture The research points to how early Christians and Byzantines teleologically viewed the divine source of the sacred in terms of its ability to bring together but never fully dissolve the distinctions between the human and divine realms The revealed mechanisms of iconic perception and noetic contemplation have the potential to shape knowledge of the meanings of the sacred as well as to improve our understanding of the liminality of the profane and the sacred

Once Out of Nature Andrea Nightingale, 2011-06-01 Once Out of Nature offers an original interpretation of Augustine s theory of time and embodiment Andrea Nightingale draws on philosophy sociology literary theory and social history to analyze Augustine s conception of temporality eternity and the human and transhuman condition In Nightingale s view the notion of embodiment illuminates a set of problems much larger than the body itself it captures the human experience of being an embodied soul dwelling on earth In Augustine s writings humans live both in and out of nature exiled from Eden and punished by mortality they are resident aliens on earth While the human body is subject to earthly time the human mind is governed by what Nightingale calls psychic time For the human psyche always stretches away from the present moment where the physical body persists into memories and expectations As Nightingale explains while the body is present in the here and now the psyche cannot experience self presence Thus for Augustine the human being dwells in two distinct time zones in earthly time and in psychic time The human self then is a moving target Adam Eve and the resurrected saints by contrast live outside of time and nature these transhumans dwell in an everlasting present Nightingale connects Augustine s views to contemporary debates about transhumans and suggests that Augustine s thought reflects our own ambivalent relationship with our bodies and the earth Once Out of Nature offers a compelling invitation to ponder the boundaries of the human

Building the Body of Christ Daniel C. Cochran, 2020-11-17 In Building the Body of Christ Daniel C Cochran argues that monumental Christian art and architecture played a crucial role in the formation of individual and communal identities in late antique Italy The ecclesiastical buildings and artistic programs that emerged during the fourth and fifth centuries not only reflected Christianity's changing status within the Roman Empire but also actively shaped those who used them Emphasizing the importance of materiality and the body in early Christian thought and practice Cochran shows how bishops and their supporters employed the visual arts to present a Christian identity rooted in the sacred past but expressed in the present through church unity and episcopal authority He weaves together archaeological and textual evidence to contextualize case studies from Rome Aquileia and Ravenna showing how these sites responded to the diversity of early Christianity as expressed through private rituals and the imperial appropriation of the saints Cochran shows how these early ecclesiastical

buildings and artistic programs worked in conjunction with the liturgy to persuade individuals to adopt alternative beliefs practices and values that contributed to the formation of institutional Christianity and the Christianization of late antique Italy
