Seek Polar:

Seek the Frozen Lands Frank Nugent, 2013-09-15 High on any list of Polar explorers would be the names Crozier McClintock McClure and Shackleton But how many know they were all Irish Seek the Frozen Lands unveils an array of Irish heroes largely unknown in modern Ireland The saga begins with Edward Bransfield who made one of the first sightings of the Antarctic in 1820 The story ends with the heroic age of Antarctic exploration and the burial of Shackleton in 1922 in South Georgia Truly a story of heroism drama and tragedy Similar to Tom Crean An Unsung Hero Captain Francis Crozier Last Man Standing Everest Calling Ger McDonnell His Life and His Death on K2 *Nonlinear Ordinary Differential Equations* R. Grimshaw, 2017-10-19 Ordinary differential equations have long been an important area of study because of their wide application in physics engineering biology chemistry ecology and economics Based on a series of lectures given at the Universities of Melbourne and New South Wales in Australia Nonlinear Ordinary Differential Equations takes the reader from basic elementary notions to the point where the exciting and fascinating developments in the theory of nonlinear differential equations can be understood and appreciated Each chapter is self contained and includes a selection of problems together with some detailed workings within the main text Nonlinear Ordinary Differential Equations helps develop an understanding of the subtle and sometimes unexpected properties of nonlinear systems and simultaneously introduces practical analytical techniques to analyze nonlinear phenomena This excellent book gives a structured systematic and rigorous development of the basic theory from elementary concepts to a point where readers can utilize ideas in nonlinear differential equations

The Art of Becoming Gene Basin, 1999-12 Becoming healthy happy prosperous or anything you can imagine isn't this the most important art to learn To succeed in life and become who you want to be you need to follow these three rules 1 Know what to do 2 Know how to do what you want to do 3 Do it With *The Art of Becoming* you will develop a deep knowledge and understanding of who and what you are the structure of reality of which you are a part and how you can establish good communication with this reality and play a winning game of life You will find your life's mission and purpose You will know exactly what to do to win the game and you will know how to do it *The Practical Nature of L2 Teaching* Joan Kelly Hall, Yingliang He, Su Yin Khor, 2023-07-26 Drawing on video recordings and transcripts from a wide range of L2 teaching contexts *The Practical Nature of L2 Teaching* presents a comprehensive examination of eight sets of specialized actions and action sequences involved in whole group instruction Each of the chapters highlights in exquisite detail the sophisticated real world accomplishment of L2 teaching The purpose is not to impose a vision of how L2 teaching should be done Instead it is to illuminate its complexities and in so doing reveal informative differences between idealized understandings of L2 teaching and its lived realities The book is essential reading for advanced undergraduates graduate students and researchers studying and working in the areas of classroom interaction L2 teaching and L2 teacher education *Workshop on the U.S. Antarctic Meteorological Data Delivery System* Claire S. Human Vision and The Night Sky Michael Borgia, 2006-12-11 For years the images have blazed through your imagination They are the magnificent full color photographs returned by the Hubble Space Telescope and 1 its sister Great Observatories of the grand depths of the cosmos From the pillars of creation considered to be Hubble's signature image to the incomprehensible depths of the Hubble Deep Fields to the intricate details imaged in the surface and cloud tops of Mars or Jupiter the power of the Hubble Telescope to turn on the public to science is unparalleled in the history of modern culture

They also have spurred new telescope sales to unimagined highs And after years of watching the heavens through the eyes of NASA you ve decided it s time to see it for yourself You make the trip to the department store and pick up that shiny new 500 te scope set it up and soon you re in business Unfortunately the high initial expectations usually give way to disappointment Instead of seeing the magni cent swirling clouds of gas in the Orion Nebula you see a pale green gray cloud with a couple of nondescript stars lurking nearby The swirling red yellow and brown storms of Jupiter are nowhere to be seen only varying shades of gray in the planet s cloud bands assuming you can see bands at all And Mars After waiting all night for the red planet to rise up over the morning horizon you are greeted by nothing more than a featureless reddish orange dot

intensification innovation and change have long figured prominently in explanations for the development of social complexity among foragers and horticulturalists and the rise of chiefly societies and archaic states yet there is considerable debate over the actual mechanisms that promote these processes Traditional approaches to the intensification question emphasize population pressure climate change bureaucratic management or even land degradation as prerequisites for the onset of new or changing strategies or the construction and maintenance of agricultural landscapes Most often these factors are modeled as external forces outside the realm of human decision making but recent archaeological research presents an alternative to this suggesting that subsistence intensification is the result of human driven strategies for power prestige and status stemming from internal conditions within a group When responding to environmental adversity human groups were less frequently the victims as they have been repeatedly portrayed Instead human groups were often vigorous actors responding with resilience ingenuity and planning to flourish or survive within dynamic and sometimes unpredictable social and natural milieux *Efficient Rent-Seeking* Alan Lockard, G. Tullock, 2013-03-14 Some time ago one of the editors Gordon Tullock stumbled on a paradox in the competition for rents He asked a previous research assistant William Hunter to work out some examples and gave a seminar on it For reasons he cannot recall but probably bad he titled his talk Efficient Rent Seeking As Editor of Public Choice he was able to publish without a referee Incidentally The Journal of Political Economy had turned it down on the grounds that the economy could not be that chaotic and hence there must be something wrong even if the referee couldn't put his finger on it There followed a long series of articles mainly in Public Choice in which various distinguished scholars proposed solutions to the paradox The editor responded by finding fault with these solutions In this case the editor was arguing against interest He like the referee for the JPE believed that the market works if not perfectly at least very well Nevertheless the paradox resisted and persisted It was like the paradox of the liar and indeed in some cases did show exactly that paradox Eventually everyone including the editor grew tired of the matter and the discussion sort of wound down although it could not be said that it was either solved or even abated It also began to appear that it had a much larger scope than just competitive rent seeking Any contest for wealth privilege or prestige in which the chances of winning were affected by the investment of the contestants would appear to be subject to the same problem The sum of the investments in equilibrium might be much less than the prize or much more It depended on the structure of the contest but

the range of structures seemed to include almost all economic competition Clearly from the standpoint of economics this was a distressing conclusion Perhaps the whole vast structure of economic analysis rested on faulty foundations Speaking frankly neither of the editors thinks the situation is that desperate We feel that there is a logical solution even if we do not know what it is The purpose of this volume is to attempt to get economists to turn to the problem and hopefully solve the paradox We present here a substantial portion of the literature on the matter We hope that the readers will be stimulated to think about the problem and even more we hope they will be able to solve it
