Theology and the Arts Ruth Illman, W. Alan Smith, 2013-06-07 This book brings the emerging fields of practical theology and theology of the arts into a dialogue beyond the bias of modern systematic and constructive theology The authors draw upon postmodern post secular feminist liberation and dialogical dialectical philosophy and theology and their critiques of the narrow modern emphases on reason and the scientific method as the model for all knowledge Such a practical theology of the arts focuses the work of theology on the actual practices that engage the arts in their various forms as the means of interpreting and understanding the nature of the communities and their members as well as the mechanisms through which these communities engage in transformative work to make persons and neighborhoods whole This book presents its theological claims through the careful analysis of several stories of communities around the world that have engaged in transformational practices through a specific art form investigating communities from Europe the Middle East South America and the U S The case studies explored include Jewish Christian Muslim Druze indigenous and sometimes agnostic subjects involved in visual art music dance theatre documentary film and literature Theology and the Arts demonstrates that the challenges of a postmodern and post secular context require a fundamental rethinking of theology that focuses on discrete practices of faithful communities rather than one dimensional theories about religion

On Refuge Richard Gough, 1997 A refuge provides a place of safety a place which constitutes the necessary conditions for making work But what are the conditions of making work for the displaced exiled or the migrant artist when the place and conditions for work have perhaps been erased On Refuge looks at how such altered conditions affect the work of performance and considers how performance constructs its own production and survival The contributors address issues of territory and asylum home and exile locality and migration as they affect both artists themselves and the forms evident in contemporary performance

Jungian Arts-Based Research and "The Nuclear Enchantment of New Mexico" Susan Rowland,Joel Weishaus,2020-07-26 Jungian Arts Based Research and The Nuclear Enchantment of New Mexico provides clear accessible and in depth guidance both for arts based researchers using Jung s ideas and for Jungian scholars undertaking arts based research The book provides a central extended example which applies the techniques described to the full text of Joel Weishaus prose poem The Nuclear Enchantment of New Mexico published here for the first time Designed as a how to book Jungian Arts Based Research and The Nuclear Enchantment of New Mexico explores how Jung contributes to the new arts based paradigm in psychic functions such as intuition by providing an epistemology of symbols that includes the unconscious and research strategies such as active imagination Rowland examines Jung s The Red Book as an early example of Jungian arts based research and demonstrates how this practice challenges the convention of the detached researcher by providing holistic knowing Arts based researchers will find here a psychic dimension that also manifests in transdisciplinarity while those familiar with Jung s work will find in arts based research ways to foster diversity for a decolonized academy This unique project will be essential reading for Jungian and post Jungian academics and scholars arts based researchers of all backgrounds and readers interested in transdisciplinarity

The Dialectics of Aesthetic Agency Ayon Maharaj,2013-01-03 This study examines how key figures in the German aesthetic tradition Kant Schelling Friedrich Schlegel Hegel and Adorno attempted to think through the powers and limits of art in post Enlightenment modernity Ayon Maharaj argues that the aesthetic speculations of these thinkers provide the conceptual resources for a timely dialectical defense of aesthetic agency art s capacity to make available uniquely valuable modes of experience that escape the purview of Enlightenment scientific rationality Blending careful philosophical analysis with an intellectual historian s attention to the broader cultural resonance of philosophical arguments Maharaj has two interrelated aims He provides challenging new interpretations of the aesthetic philosophies of Kant Schelling Schlegel Hegel and Adorno by focusing on aspects of their thought that have been neglected or misunderstood in Anglo American and German scholarship He demonstrates that their subtle investigations into the nature and scope of aesthetic agency have far reaching implications for contemporary discourse on the arts The Dialectics of Aesthetic Agency is an important and original

contribution to scholarship on the German aesthetic tradition and to the broader field of aesthetics *Beyond Epistemology* F.G. Weiss, 2012-12-06 This book approaches Hegel from the standpoint of what we might call the question of knowledge Hegel of course had no theory of knowledge in the narrow and abstract sense in which it has come to be understood since Locke and Kant The examination of knowledge he holds can only be carried out by an act of knowledge and to seek to know before we know is as absurd as the wise resolution of Scholasticus not to venture into the water until he had learned to swim While Hegel wrote no treatise exclusively devoted to epistemology his entire philosophy is nonetheless a many faceted theory of truth and thus our title *Beyond Epistemology* is meant to suggest a return to the classical meaning and relation of the terms episteme and logos I had originally planned to include a lengthy introduction for these essays setting out Hegel's general view of philosophic truth But as the papers came in it became clear that I had chosen my contributors too well indeed they have all but put me out of business In any case it gives me great pleasure to have been able to gather this symposium of outstanding Hegel scholars to provide for them a forum on a common theme of great importance and especially thanks to Arnold Miller to have Hegel himself among them Frederick G Weiss Charlottesville Va *The Logic of Hegel* trans from the *Encyclopaedia* by William Wallace 2nd ed *A Grammar of the Hebrew Language* Samuel Lee, 1844

Koenig, 2021-02-23 *Thinking about Morality* addresses the processes behind how we resolve moral issues and the factors that can impact that such as differing values and cultures Moral disagreements are primarily due to differing values or the clash of new knowledge with old values When trying to resolve a moral dispute we must carefully define the issue We must bring to bear relevant knowledge which can be used to resolve the issue but sometimes the value structures are so different that an issue cannot be resolved This book provides an examination of how values operate and how one's obligations will differ in different cultures This book addresses topics such as multiculturalism along with immigration and migration sex and gender abortion and euthanasia environmental issues guns and drugs *A Treatise on Conic Sections* George Salmon, 1855 *A Treatise on Conic Sections, containing an account of some of the most important modern algebraic and geometric methods.*
