**Safer Schools ,2003      Guía para la reducción de la vulnerabilidad en el diseño de nuevos establecimientos de salud** Rubén Boroschek Krauskopf,1995 Habitualmente los planes de protección o de mitigación de instalaciones de salud frente a desastres prevén la seguridad de las personas y no tanto de las instalaciones o de la operatividad de los servicios Pero la experiencia reciente ha mostrado que es posible seguir procedimientos para disponer de nuevos establecimientos de salud capaces no solo de garantizar el objetivo de seguridad de las personas como a sido tradicional hasta el momento sino de garantizar los objetivos de seguridad de la infraestructura y de la operación De esta manera dependiendo de las características de la red de servicios de salud y de los recursos económicos disponibles es posible establecer estratégicamente establecimientos con una alta seguridad en su operación e infraestructura y establecimientos con una alta protección en su infraestructura que si bien se espera que funcionen inmediatamente después de una emergencia pueden ser recuperada en plazos razonables y con costos controlados Pero si los recursos son limitados o las condiciones naturales o técnicas no lo permiten la prioridad es siempre garantizar la seguridad de las personas Para alcanzar los distintos objetivos de protección es necesario establecer nuevos criterios de desarrollo y de aseguramiento de la calidad desde el inicio hasta final del proyecto de construcción de nuevas instalaciones de salud De acuerdo con la experiencia el costo económico de aplicar estos objetivos es menos al 4% del costo total de la obra y en algunos casos es prácticamente cero ya que solo ha implicado o la selección de una ubicación distinta o el cambio de una filosofía de diseño En todo caso este valor resulta marginal si se compara con los costos económicos de recuperar una estructura dañada por la acción de un fenómeno natural y con las consecuencias sociales políticas y económicas que genera la pérdida de un establecimiento de salud      *Catalog of Copyright Entries.
