Non-Conventional Copyright Enrico Bonadio, Nicola Lucchi, 2018-10-26

Copyright law has always somehow managed to adapt to new technological and social developments as well as to new artistic and creative practices. However, every time such a development occurs, the legitimate question arises: if the system is adaptable or if the breakthrough is so gigantic that a new system needs to be elaborated. In any case, new scholarly reflections are needed in regular intervals, and that is exactly the purpose of this fascinating edited collection by Enrico Bonadio and Nicola Lucchi on non-conventional copyright, exploring from various angles the copyright issues of all sorts of creations ranging from unconventional art forms, new music, and atypical cultural practices to new advances in technology, not forgetting to investigate the delicate issues around copyright on illegal and immoral works.

Christophe Geiger, University of Strasbourg, France: Copyright law constantly evolves to keep up with societal changes and technological advances. Contemporary forms of creativity can threaten the comfortable conceptions of copyright law as creative people continually find new ways of expressing themselves. In this context, *Non-Conventional Copyright* identifies possible new spaces for copyright protection. With current copyright law in mind, the contributions explore if the law should be more flexible as to whether new or unconventional forms of expression, including graffiti, tattoos, land art, conceptual art, and bio art, engineered DNA, sport movements, jokes, magic tricks, DJ sets, perfume, making typefaces, or illegal and immoral works, deserve protection. Vitally, the contributors suggest that it may be time to challenge some of the basic tenets of copyright laws by embracing more flexible ways to identify protectable works and interpret the current requirements for protection. Additionally, some contributors cast doubts about whether copyright is the right instrument to address and regulate these forms of expression.

Contemporary in topic, this thought-provoking book will be essential reading for intellectual property law scholars, practitioners, and policymakers. Creative people and those involved in the creative industries will also find this book an engaging read. Contributors include E. Bonadio, S. Burke, C. Cronin, T. Dagne, T. W. Dornis, F. J. Dougherty, T. M. Gates, M. P. George, E. Haber, S. Karapapa, Y. M. King, T. Iverson, N. Lucchi, G. Mazziotti, J. McCutcheon, L. McDonagh, M. Maggiore, P. Mezei, M. Mimler, A. G. Scaria, C. Y. N. Smith, X. Tang.

The Future of intellectual property rights in the Age of Artificial Intelligence Dr. Ahmed Adel, AI technologies have the potential to revolutionize various industries including healthcare, finance, transportation, and entertainment. They can automate repetitive tasks, enhance decision-making processes, improve efficiency, and enable the development of innovative products and services. However, the rapid advancement of AI also raises significant challenges and implications for intellectual property rights. AI systems generate valuable outputs such as creative works, inventions, and data-driven insights. These outputs can be subject to intellectual property protection, which grants exclusive rights to the creators or owners of the intellectual assets. Intellectual property rights encompass various legal mechanisms, including copyright, patents, trademarks, and trade secrets, which are designed to incentivize innovation and creativity. As artificial intelligence

continues to advance the challenge lies in striking a balance between fostering innovation and protecting intellectual property The future will require a nuanced approach that encourages creativity while addressing the ethical and legal implications of AI driven inventions In the era of artificial intelligence intellectual property rights will be at the forefront of the innovation landscape The evolving nature of AI raises crucial questions about ownership accountability and the need for adaptive legal frameworks to safeguard the rights of creators and innovators in this rapidly changing landscape Patent It Yourself David Pressman, David E.
