The Natural Law Tradition, Public Reason, and Bioethics

Dominic Farrell LC – Joseph Tham LC

Pontifical Athenaeum Regina Apostolorum (Rome)

Over the last fifty years, many countries have passed legislation to permit a series of controversial biomedical practices such as in-vitro fertilization, surrogate pregnancies, abortion, and euthanasia. In each case, the change in legislation has enjoyed a certain amount of public support and has been defended as bringing both moral progress and social benefits. Normally, however, a significant sector of the public has opposed it on moral grounds. Consequently, there is generally a heated debate surrounding such legislation, and rightly so. What is at stake in these debates over first-order ethical issues is not just another matter of public policy, but conflicting views on important underlying second-order questions, such as personal identity and human dignity. But by what standard can our political and legal institutions settle first-order bioethical issues and the underlying second-order questions legitimately?

This is where theories of 'public reason' are promising. In contemporary philosophical parlance, this term of art has gained currency thanks to the influential work of John Rawls. In his anti-perfectionist liberalism, the political and legal rules of a society are just and legitimate if and only if they pass the test of public reason: if they are acceptable to all reasonable persons.
