Tommaso Campanella Germana Ernst,2010-03-16 A friend of Galileo and author of the renowned utopia *The City of the Sun* Tommaso Campanella Stilo Calabria 1568 Paris 1639 is one of the most significant and original thinkers of the early modern period His philosophical project centred upon the idea of reconciling Renaissance philosophy with a radical reform of science and society He produced a complex and articulate synthesis of all fields of knowledge including magic and astrology During his early formative years as a Dominican friar he manifested a restless impatience towards Aristotelian philosophy and its followers As a reaction he enthusiastically embraced Bernardino Telesio's view that knowledge could only be acquired through the observation of things themselves investigated through the senses and based on a correct understanding of the link between words and objects Campanella's new natural philosophy rested on the principle that the books written by men needed to be compared with God's infinite book of nature allowing them to correct the mistakes scattered throughout the human copies which were always imperfect partial and liable to revisions It is in the light of these principles that he defended Galileo's right to read the book of nature while denouncing the mistake of those be they Aristotelian philosophers or theologians who wanted to stop him from carrying on his natural investigations However Campanella maintained that the book of nature far from being written in mathematical characters was a living organism in which each natural being was endowed with life and a degree of sensibility that was appropriate for its preservation and propagation Nature as a whole was an organism in which each single part was directed towards the common good This is the reason why Campanella thought that nature had to be regarded as an ideal model for any political organisation Political structures were often ruled by injustice and violence precisely because they had departed from that natural model This book charts Campanella's intellectual life by showing the origin development and persistence of some of the fundamental tenets of his thought 3 BKS OF OCCULT PHILOSOPHY OR Heinrich Cornelius Agrippa,2007-12-01 Edgar Allan Poe called it a quaint and curious volume of forgotten lore This classic work of Renaissance esoteric by German magician and alchemist HEINRICH CORNELIUS AGRIPPA 1486 1535 one of the important figures in the occult history and philosophy of Europe is vital reading for anyone fascinated by the Jewish Kabbalah Christian mysteries and other arcane traditions This replica of an 1897 edition featuring all the original charts and illustrations reveals Agrippa's understanding of the mysteries of magic the elements the heavens the natural and occult virtues of all things and much more Religious Individualisation Martin Fuchs,Antje Linkenbach,Martin Mulsow,Bernd-Christian Otto,Rahul Bjørn Parson,Jörg Rüpke,2019-12-16 This volume brings together key findings of the long term research project Religious Individualisation in Historical Perspective Max Weber Centre for Advanced Cultural and Social Studies Erfurt University Combining a wide range of disciplinary approaches methods and theories the volume assembles over 50 contributions that explore and compare processes of religious individualisation in different religious environments and historical periods in particular in Asia the Mediterranean and

Europe from antiquity to the recent past Contrary to standard theories of modernisation which tend to regard religious individualisation as a specifically modern or early modern as well as an essentially Western or Christian phenomenon the chapters reveal processes of religious individualisation in a large variety of non Western and pre modern scenarios Furthermore the volume challenges prevalent views that regard religions primarily as collective phenomena and provides nuanced perspectives on the appropriation of religious agency the pluralisation of religious options dynamics of de traditionalisation and privatisation the development of elaborated notions of the self the facilitation of religious deviance and on the notion of dividuality *Catalogue of the Public Library of the City of Detroit* Henry M. Crittenden, 2024-08-24 Reprint of the original first published in 1877 *John Dee's Natural Philosophy* Nicholas Clulee, 2013-02-15 This is the definitive study of John Dee and his intellectual career Originally published in 1988 this interpretation is far more detailed than any that came before and is an authoritative account for anyone interested in the history literature and scientific developments of the Renaissance or the occult John Dee has fascinated successive generations Mathematician scientist astrologer and magus at the court of Elizabeth I he still provokes controversy To some he is the genius whose contributions to navigation made possible the feats of Elizabethan explorers and colonists to others an alchemist and charlatan Thoroughly examining Dee's natural philosophy this book provides a balanced evaluation of his place and the role of the occult in sixteenth century intellectual history It brings together insights from a study of Dee's writings the available biographical material and his sources as reflected in his extensive library and more importantly numerous surviving annotated volumes from it *The Philosophy of Natural Magic* Henry Cornelius Agrippa Von Nettesheim, 2013-05-09 THE PHILOSOPHY OF NATURAL MAGIC By HENRY CORNELIUS AGRIPPA VON NETTESHEIM COUNSELOR TO CHARLES THE FIFTH EMPEROR OF GERMANY AND JUDGE OF THE PREROGATIVE COURT OFFICIAL EDITION A COMPLETE WORK ON Natural Magic White Magic Black Magic Divination Occult Binding Sorceries And Their Power Unctions Love Medicines And Their Virtues The Occult Virtue Of Things Which Are In Them Only In Their Life Time And Such As Remain In Them Even After Their Death The Occult Or Magical Virtue Of All Things etc **The Philosophy of Natural Magic** Henry Agrippa, 2016-01-12 Originally published in 1531 3 De occulta philosophia libri tres Three books of Occult Philosophy proposed that magic existed and it could be studied and used by devout Christians as it was derived from God not the Devil Agrippa had a huge influence on Renaissance esoteric philosophers particularly Giordano Bruno This is the English version *Instruments and the Imagination* Thomas L. Hankins, Robert J. Silverman, 2014-07-14 Thomas Hankins and Robert Silverman investigate an array of instruments from the seventeenth through the nineteenth century that seem at first to be marginal to science magnetic clocks that were said to operate by the movements of sunflower seeds magic lanterns ocular harpsichords machines that played different colored lights in harmonious mixtures Aeolian harps a form of wind chime and other instruments of natural magic designed to produce wondrous effects By looking at these and the first recording instruments the stereoscope and speaking machines the

authors show that scientific instruments first made their appearance as devices used to evoke wonder in the beholder as in works of magic and the theater The authors also demonstrate that these instruments even though they were often tricks were seen by their inventors as more than trickery In the view of Athanasius Kircher for instance the sunflower clock was not merely a hoax but an effort to demonstrate however fraudulently his truly held belief that the ability of a flower to follow the sun was due to the same cosmic magnetic influence as that which moved the planets and caused the rotation of the earth The marvels revealed in this work raise and answer questions about the connections between natural science and natural magic the meaning of demonstration the role of language and the senses in science and the connections among art music literature and natural science Originally published in 1995 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Knowledge is Power (Icon Science) John Henry, 2017-11-02 Francis Bacon a leading figure in the history of science never made a major discovery provided a lasting explanation of any physical phenomena or revealed any hidden laws of nature How then can he rank as he does alongside Newton Bacon was the first major thinker to describe how science should be done and to explain why Scientific knowledge should not be gathered for its own sake but for practical benefit to mankind And Bacon promoted experimentation coming to outline and define the rigorous procedures of the scientific method that today form the very bedrock of modern scientific progress John Henry gives a dramatic account of the background to Bacon's innovations and the sometimes unconventional sources for his ideas Why was he so concerned to revolutionize the attitude to scientific knowledge and why do his ideas for reform still resonate today
