Natural Resources Management In Agriculture Methods For Assessing Economic And Environmental Impacts:

Natural Resources Management in Agriculture Bekele Shiferaw,H. Ade Freeman,Scott M. Swinton,2005 In response to increasing concerns about the degradation of natural resources and the sustainability of agriculture many research programmes have been established in natural resource management NRM However although methods for evaluating the impacts of crop improvement technologies are well developed there is a dearth of methods for evaluating the impacts of NRM interventions This is partly due to the complexity of interactions among natural resources spatial and temporal dimensions of impact and the valuation of direct and indirect environmental costs and benefits This book discusses the unique features and methodological difficulties of NRM impact assessment It examines the strengths and weaknesses of various impact assessment approaches including econometric bio economic and more direct methods It also assesses and identifies data requirements for developing impact indicators and recommends suitable methodologies for assessing the impacts of NRM technologies on issues such as soil and water conservation and watershed and biodiversity management

Natural Resources Management in Agriculture Bekele Shiferaw,H. Ade Freeman,Scott M. Swinton,2005 Part I Introduction Part II Valuation of ecosystem services and biophysical indicators of NRM impacts Part III Methodological advances for a comprehensive impact assessment Part IV NRM impact assessment in practice *Research Topics in Agricultural and Applied Economics* Anthony N. Rezitis,2012 The aim of the Ebook series of Research Topics in Agricultural Applied Economics RTAAE is to publish high quality economic researches applied to both the agricultural and non agricultural sectors of the economy The subject areas of this E book series include among others supply and demand analysis technical change and productivity industrial organization labor economics growth and development environmental economics marketing business economics and finance By covering a broad variety of economic research topics this Ebook series should prove to be of considerable interest to a **Meta-impact assessment of the irrigated rice research consortium** R.M. Rejesus,A.M. Martin,P. Gypmantasiri, *Handbook of Agricultural Economics* Robert E. Evenson,Prabhu Pingali,2009-10-20 Advances in agriculture offer many countries the best and only chance of reducing poverty Yet economic growth and population increases are driving higher demand for food and rising real prices What solutions have successfully promoted agriculture This volume examines national and international food agriculture policies and how they enhance agricultural productivity growth It provides unique historical reviews on policies and their effects and it clearly articulates both positive and negative lessons for promoting agriculture lead growth With chapters written by international authorities this book recognizes that agriculture is not just about providing food for today but about growing it in an environmentally sustainable way that can help people work their ways out of poverty Chapters cover international macro economic policies and trade farm structure in developing countries regional experiences in agriculture and regional studies on agricultural productivity policies Learning to make change Paul Kibwika,2023-08-28 Universities represent the highest level of education yet they

are notoriously slow in responding to a rapidly changing world Deeply entrenched elitism and routines a continued emphasis on reproductive learning and the continued dominance of disciplinary thinking have in many instances created bastions of educational conservatism unable to contribute meaningfully to the development of people businesses and communities within a finite global ecosystem This book focuses on an African university s efforts to become more innovative and responsive to community needs and the challenges posed by sustainability A central concept is innovation competence as a pre requisite for transforming learning research and consultancy Making change in society requires innovation competences over and above disciplinary expertise and these competences have to be learnt by both staff and students Kibwika not only shows that it is imperative that African universities re orient their programmes to produce graduates capable of enhancing innovation and social change in the community he also provides a number of solid stepping stones for capacity building and curriculum development that in time will result in an innovative university able to contribute to a world that is more sustainable than the one currently in prospect

Natural Capital Peter Kareiva, Heather Tallis, Taylor H. Ricketts, Gretchen C. Daily, Stephen Polasky, 2011-04-07 In 2005 The Millennium Ecosystem Assessment MA provided the first global assessment of the world s ecosystems and ecosystem services It concluded that recent trends in ecosystem change threatened human wellbeing due to declining ecosystem services This bleak prophecy has galvanized conservation organizations ecologists and economists to work toward rigorous valuations of ecosystem services at a spatial scale and with a resolution that can inform public policy The editors have assembled the world s leading scientists in the fields of conservation policy analysis and resource economics to provide the most intensive and best technical analyses of ecosystem services to date A key idea that guides the science is that the modelling and valuation approaches being developed should use data that are readily available around the world In addition the book documents a toolbox of ecosystem service mapping modeling and valuation models that both The Nature Conservancy and the World Wide Fund for Nature WWF are beginning to apply around the world as they transform conservation from a biodiversity only to a people and ecosystem services agenda The book addresses land freshwater and marine systems at a variety of spatial scales and includes discussion of how to treat both climate change and cultural values when examining tradeoffs among ecosystem services
