Davies,2012-06-09 Emigrating Beyond Earth puts space colonization into the context of human evolution Rather than focusing on the technologies and strategies needed to colonize space the authors examine the human and societal reasons for space colonization They make space colonization seems like a natural step by demonstrating that if will continue the human species 4 million year old legacy of adaptation to difficult new environments The authors present many examples from the history of human expansion into new environments including two amazing tales of human colonization the prehistoric settlement of the upper Arctic around 5 000 years ago and the colonization of the Pacific islands around 3 000 years ago which show that space exploration is no more about rockets and robots that Arctic exploration was about boating      Human Adaptability Emilio F. Bardon,2008-08 The Knowledge Drive is an optimistic book that demonstrates how new more accurate information conveys survival value and inevitably supplants our dysfunctional mythological beliefs Before there was time for the accumulation of knowledge early man created legends and religious myths to understand the world and ease the paralyzing awareness of his own mortality and the fear of natural forces beyond his control We are increasingly aware of how these magical beliefs can lead to divisive religious practices violence and mans continuing inhumanity to fellow man Change is clearly needed Now rapid advances in many fields are giving us the techniques to modify our evolution and curtail our virulence We can establish a more universal equitable morality based on more accurate intelligence about our origins and place in the universe Nevertheless it is up to us as a species to choose our own future directions We are thus in charge of our own destiny a threatening thought to many No prayers or appeals to magical forces will help Dr Bardon analyzes how our quest for knowledge is a basic human drive similar to the sex and nourishment drives It arises from our survival instinct and is not based on moral or altruistic factors Along with establishing knowledge as a source of power the author discusses the Knowledge Drive from many other perspectives its various motivations the fact that it can be used for many purposes even destructive ones how it learns from adversity how it often exacerbates inequality and how it does not solve social problems unless given the necessary direction Dr Bardon looks at the multiple forces aligned against our efforts to obtain more reliable information He shows how the Knowledge Drive not only triumphs over but also learns from these negative elements Warnings about the fragility of our search for knowledge are misguided it is rather the people mired in mythology who are vulnerable and need our compassion
