Natural Step For Business Wealth Ecology And The Evolutionary Corporation:

The Natural Step for Business Brian Nattrass, Mary Altomare, 1999-01-01 The Natural Step for Business examines how four very successful evolutionary corporations in Sweden and the United States including IKEA and Scandic Hotels in Sweden and Collins Pine and Interface in the U S are positioning themselves for long term competitiveness using The Natural Step as a central part of their corporate strategy Nattrass and Altomare puncture the myth that a company must choose between profitability and care for the natural environment and present a timely and practical application of this exciting model for global sustainability

Do Good Anne Bahr Thompson, 2017-11-30 Increasingly today in every age group consumers are committing to brands that show good citizenship from fair employment practices to social responsibility to charitable giving In fact support of these generous and socially aware companies is so high that good works and charitable giving are necessary for companies that aspire for financial success Do Good documents the sea of change that has impacted the twenty first century marketplace more than even the most optimistic of business forecasters including examples such as Toms grew into a 600 million company by giving away 35 million pair of shoes Patagonia s profits have climbed year after year even as it funnels heavy investments into sustainability CVS s strategic decision to start destocking cigarettes in all stores Customers have shown with their wallets the types of businesses they will support and that they will quickly call out negligence Buyers today demand more than half hearted pledges from companies who are clearly just trying to show less profits and decrease their taxes By implementing the five step model for the new rules of business laid out in Do Good Trust Enrichment Responsibility Community and Contribution companies can take the necessary steps to embed social consciousness into their DNA in turn capturing both markets and hearts

Leadership for Environmental Sustainability Benjamin W. Redekop, 2010-07-02 As the first book in the field of leadership studies to approach sustainability as a multi faceted leadership challenge Leadership for Environmental Sustainability will help to set the terms of the discussion on this topic among students scholars and practitioners of leadership for years to come It explores the connection between leadership and sustainability from a variety of disciplinary perspectives including sociology history psychology business literature communication and the arts With short chapters edited for readability the book is aimed at

scholars practitioners students and educated lay readers interested in cutting edge research and thinking on this topic

Evaluating Sustainable Development Peter S. Brandon, Patrizia Lombardi, 2009-02-18 Sustainable development has been characterised by an emphasis on environmental issues and an ad hoc approach to structuring the subject which hinders the development of knowledge in a systematic way. The built environment contributes significantly to the environment but is also one of the major factors in determining whether a community is sustainable in the longer term. A structure is required which aids definition, provides a common set of values, establishes measurement methods to define progress and suggests a management system and decision protocol which enables practitioners to engage and use the resultant structures and information. This book provides a suggested structure in which all aspects of sustainable development can be included together with a set of evaluation techniques which can be used within the structure to provide assistance to decision making.

Design for Sustainability Tracy Bhamra, Vicky Lofthouse, 2016-04-22 Design for Sustainability is a practical approach to design which focuses on the challenges and issues faced by those designing consumer products in the 21st Century. It is written from a design perspective and aimed at both professional and student industrial and product designers and those involved in managing design. The book begins by summarising the historical and current issues of the environmental debate in the context of sustainable product development, highlighting the benefits gained from considering the impact on the environment and issues of sustainability when designing. The authors answer the questions: What is sustainable product development and why is it important? What are the main drivers of sustainable product development? They explain how design can help to control human impact on the environment by not only minimising pollution, waste, energy use and use of scarce resources but also by thinking outside the box to create systems and services that can reduce the number of products manufactured. The aim is to put sustainable development within a commercial context and introduce a new focus for design. Design for Sustainability outlines and assesses the methods, tools and techniques available to designers both for design innovation and design improvement. A wide range of case studies are presented across a number of product sectors including electrical goods, IT and furniture. Initially they demonstrate product improvement and redesign; examples include those that reduce waste, pollution and energy consumption; designing for recycling and reuse of parts. Further examples are then provided exemplifying the more radical approach of system and service design. The final section takes the reader through a whole sustainable design project from start to finish from brief to manufacture. References and sources of information are also included.

Emotional and Ecological Literacy for a More Sustainable Society Giuliana Panieri, Margherita Paola Poto, Emily Margaret Murray, 2024-05-22 This open access book aims to promote ecological and emotional research and education for sustainability by cultivating values and behaviours consistent with how nature makes us feel connected and nurtured. Built upon the intersection of ecological literacy and socio-emotional learning grounded in sustainability and relational thinking, the research developed in the book covers a wide range of themes connected to the Agenda 2030.
