National Parks and Protected Areas James Gordon Nelson, Rafal Serafin,2013-06-29 National parks and protected areas offer a wealth of ecological and social contributions or services to humans and life on earth. This book describes the strengths of national parks and protected areas in different parts of Europe and North America and the challenges to the full realization of their goals. It shows that they are useful not only in conserving rare species and biodiversity but also in protecting water supply and other resources necessary to tourism and to economic and social development generally. Ideas and information on useful planning, management, and decision-making arrangements are presented, and research needs are identified.

Beyond the Global City James Gordon Nelson,2012 Looking beyond the smoke screen of Toronto's rapid and costly growth to re-envision sustainable planning in Ontario's neglected regions. *Planning Canadian Regions* Gerald Hodge, Ira M. Robinson,2007-10-01 *Planning Canadian Regions* is the first book to consolidate the history, evolution, current practice, and future prospects for regional planning in Canada. As planners grapple with challenges wrought by globalization, the evolution of massive new city regions, and the pressures for sustainable and community economic development, a deeper understanding of Canada's approaches is invaluable. Hodge and Robinson identify the intellectual and conceptual foundations of regional planning and review the history and main modes of regional planning for rural regions, economic development regions, resource development regions, and metropolitan and city regions. They draw lessons from Canada's past experience and conclude by proposing a new paradigm addressing the needs of regional planning now and in the future, emphasizing regional governance, greater inclusiveness, and integration of physical planning with planning for economic sustainability and natural ecosystems. *Planning Canadian Regions* will be a much-needed text for students and teachers of regional planning and an indispensable reference for planning practitioners. It will also find a receptive audience in such disciplines as urban planning, environmental studies,
