Jack S. Crumley II

Naturalizing Epistemology:

Naturalizing Epistemology Hilary Kornblith, 1994-01 explores the interaction between psychology and epistemology and addresses empirical questions about how we should arrive at our beliefs and whether the processes by which we arrive at our beliefs are the ones by which we ought to arrive at our beliefs

Naturalizing Epistemology Hilary Kornblith, 1994 The second edition of *Naturalizing Epistemology* has been updated and expanded to include seven new articles that take up ongoing debates in the field As with the first edition it explores the interaction between psychology and epistemology and addresses empirical questions about how we should arrive at our beliefs and whether the processes by which we arrive at our beliefs are the ones by which we ought to arrive at our beliefs The new material includes a critical examination of Quine's views on epistemology by Jaegwon Kim and an interesting psychological approach to our understanding of natural kinds by Ellen Markman In other new chapters Jerry Fodor places the notion of observation in a naturalistic perspective Christopher Cherniak shows how work in the theory of computational complexity bears on the form of an epistemological theory and Alvin Goldman looks at the relationship between our ordinary epistemological concepts and those of a scientific epistemology The prospects for improving our inductive inferences are examined by John Holland Keith Holyoak Richard Nisbett and Paul Thagard and Stephen Stich suggests a way in which normative concepts may be integrated into a naturalistic epistemology The book retains articles by W V O Quine Alvin I Goldman Hilary Kornblith Philip Kircher Michael Friedman Fred Dretske Richard Nisbett and Lee Ross Gilbert Harman and Stephen P Stich Hilary Kornblith is Professor and Chair of the Department of Philosophy at the University of Vermont

Naturalizing Logico-Mathematical Knowledge Sorin Bangu, 2018-02-01 This book is meant as a part of the larger contemporary philosophical project of naturalizing logico mathematical knowledge and addresses the key question that motivates most of the work in this field What is philosophically relevant about the nature of logico mathematical knowledge in recent research in psychology and cognitive science The question about this distinctive kind of knowledge is rooted in Plato's dialogues and virtually all major philosophers have expressed interest in it The essays in this collection tackle this important philosophical query from the perspective of the modern sciences of cognition namely cognitive psychology and neuroscience *Naturalizing Logico Mathematical Knowledge* contributes to consolidating a new emerging direction in the philosophy of mathematics which while keeping the traditional concerns of this sub discipline in sight aims to engage with them in a scientifically informed manner A subsequent aim is to signal the philosophers willingness to enter into a fruitful dialogue with the community of cognitive scientists and psychologists by examining their methods and interpretive strategies

Nietzsche's Will to Power Naturalized Brian Lightbody, 2017-01-31 The world viewed from the inside the world defined and determined according to its intelligible character it would be will to power and nothing else Cryptic passages like this one from section 36 of *Beyond Good and Evil* have been the source of much intrigue speculation and puzzlement in the Nietzschean secondary literature This passage in particular along with many others have sparked a

slew of questions in recent decades such as What is the will to power Is will to power a metaphysical principle Is it an empirical assertion Or is will to power merely a hypothesis that Nietzsche himself rejected Although asked ad nauseam in the literature the multitude of answers given to the above questions never seem to satisfy In this book Brian Lightbody shed light on Nietzsche's most famous esoteric teaching by explaining what the will to power is and what it denotes He then demonstrates how will to power may be naturalized in an attempt to show that the doctrine is epistemically and empirically defensible Finally he uses will to power as a philological key of sorts to unlock Nietzsche's philosophy as a whole by showing that his ontology epistemology and ethics are only properly understood once a coherent naturalized rendering of will to power is produced

Feminist Interpretations of W. V. Quine Jack Nelson, 2010-11-01 As one of the preeminent philosophers of the twentieth century W V Quine 1908-2000 made groundbreaking contributions to the philosophy of science mathematical logic and the philosophy of language This collection of essays examines Quine's views particularly his holism and naturalism for their value and their limitations to feminist theorizing today Some contributors to this volume see Quine as severely challenging basic tenets of the logico-empiricist tradition in the philosophy of science the analytic synthetic distinction verificationism foundationalism and accept various of his positions as potential resources for feminist critique Other contributors regard Quine as an unrepentant empiricist and unlike feminists who seek to use or extend his arguments they interpret his positions as far less radical and more problematic In particular critics and advocates of Quine's arguments that the philosophy of science should be naturalized understood and pursued as an enterprise continuous with the sciences proper disagree deeply about whether such a naturalized philosophy is philosophy enough Central issues at stake in these disagreements reflect current questions of special interest to feminists and also bridge the analytic and postmodern traditions They include questions about whether and how the philosophy of science as a form of practice is or can be normative as well as questions concerning the implications of Quine's philosophy of language for the transparency and stability of meaning In representing feminist philosophy centrally engaged with the analytic tradition this volume is important not only for what it contributes to the understanding of Quine and naturalized epistemology but also for what it accomplishes in working against restrictive conceptions of the place of feminism within the discipline Aside from the editors the contributors are Kathryn Pyne Addelson Louise M Antony Richmond Campbell Lorraine Code Jane Duran Maureen Linker Phyllis Rooney and Paul A Roth

Introducing Philosophy: Knowledge and Reality Jack S. Crumley II, 2016-08-08 This book introduces the central issues of metaphysics and epistemology from skepticism justification and perception to universals personal identity and free will Though topically organized the book integrates positions and examples from the history of philosophy Plato Descartes and Leibniz are discussed alongside Quine Kripke and Haslanger Peripheral ideas and related historical asides are offered in boxes interspersed within the text providing further depth without disrupting the author's lucid explanations of central themes and arguments Original illustrations by Gillian Wilson are included throughout

giving interesting and clear visual representations of many of the book's examples and thought experiments

Minds, Brains, and Law Michael S. Pardo, Dennis Patterson, 2015 In *Minds Brains and Law* Michael S Pardo and Dennis Patterson analyze questions that lie at the core of implementing neuroscientific research and technology within the legal system They examine the arguments favoring increased use of neuroscience in law the scientific evidence available for the reliability of neuroscientific evidence in legal proceedings and the integration of neuroscientific research into substantive legal doctrines This paperback edition contains a new Preface covering developments in this subject since the hardcover edition published in 2013

Scientific Imperialism Uskali Mäki, Adrian Walsh, Manuela Fernández Pinto, 2017-10-16 The growing body of research on interdisciplinarity has encouraged a more in depth analysis of the relations that hold among academic disciplines In particular the incursion of one scientific discipline into another discipline's traditional domain also known as scientific imperialism has been a matter of increasing debate Following this trend Scientific Imperialism aims to bring together philosophers of science and historians of science interested in the topic of scientific imperialism and in particular interested in the conceptual clarification empirical identification and normative assessment of the idea of scientific imperialism Thus this innovative volume has two main goals Indeed the authors first seek to understand interdisciplinary relations emerging from the incursion of one scientific discipline into one or more other disciplines such as in cases in which the conventions and procedures of one discipline or field are imposed on other fields or more weakly when a scientific discipline seeks to explain phenomena that are traditionally considered proper of another discipline's domain Secondly the authors explore ways of distinguishing imperialistic from non imperialistic interactions between disciplines and research fields The first sustained study of scientific imperialism this volume will appeal to postgraduate students and postdoctoral researchers interested in fields such as Science and Technology Studies Sociology of Science Technology Philosophy of Science and History of Science

Epistemics Jane Duran, 1989 This author explores the intersection between cognitive science as exemplified by the computational model of mind and epistemology specifically epistemic justification theory Her analysis leads to the conclusion that some very specific and somewhat technical issues in epistemic justification theory can be at least partially resolved if not entirely cleared up by the use of the computational model The third and fourth chapters of this work are devoted directly to that effort Chapter one examines in detail epistemology and cognitive sciences while chapters two and three offer a thorough introduction to standard epistemic justification theory Finally chapter five is a critique of the computational model

The Philosophical Challenge from China Brian Bruya, 2015-04-03 For too long analytic philosophy discounted insights from the Chinese philosophical tradition In the last decade or so however philosophers have begun to bring the insights of Chinese to bear on current philosophical issues This volume brings together leading scholars from East and West who are working at the intersection of traditional Chinese philosophy and mainstream analytic philosophy Their essays draw on the work of Chinese philosophers ranging from early Daoists and Confucians to twentieth century Chinese thinkers offering new

perspectives on issues in moral psychology political philosophy ethics metaphysics and epistemology Taken together these essays show that serious engagement with Chinese philosophy can not only enrich modern philosophical discussion but also shift the debate in a meaningful way Each essay challenges a current position in the philosophical literature including positions expressed by John Rawls Peter Singer Nel Noddings W V Quine and Harry Frankfurt The topics include compassion as a developmental virtue empathy human worth and democracy ethical self restriction epistemological naturalism ideas of oneness know how and action without agency Inside jacket flap
