

A scenic view of a rural landscape featuring lush green rice fields in the foreground and middle ground. In the background, there are several traditional houses with thatched roofs and dense tropical vegetation, including palm trees. The sky is a clear, pale blue. The entire image is framed by a white, hand-drawn style border with rounded corners.

Nature And Society:

Nature and Society in Historical Context Mikulas Teich, Roy Porter, Bo Gustafsson, 1997-02-13 A collection of essays describing the historical connection between nature and society *Extreme Events in Nature and Society* Sergio Albeverio, Volker Jentsch, Holger Kantz, 2006-02-18 Significant and usually unwelcome surprises such as floods financial crisis epileptic seizures or material rupture are the topics of *Extreme Events in Nature and Society* The book authored by foremost experts in these fields reveals unifying and distinguishing features of extreme events including problems of understanding and modelling their origin spatial and temporal extension and potential impact The chapters converge towards the difficult problem of anticipation forecasting the event and proposing measures to moderate or prevent it *Extreme Events in Nature and Society* will interest not only specialists but also the general reader eager to learn how the multifaceted field of extreme events can be viewed as a coherent whole **Co-Evolution of Nature and Society** Jens Jetzkowitz, 2018-08-27 This book offers support for interdisciplinary research on the interactions of nature and society It is based on the hypothesis that a science of coevolution is needed to explore paths to a sustainable future Jens Jetzkowitz initially discusses why social science knowledge only rarely finds its way into sustainability discourse One significant issue is a view of science that separates knowing and acting and the book illustrates current problems in conceptualising interdisciplinary knowledge production It then goes one step further and introduces a workable alternative concept taking philosophical pragmatism as a point of departure Sustainable development goals and transdisciplinarity are currently subject to widespread discussions and Jetzkowitz takes a stance on the debates from the perspective of coevolutionary science This book will appeal to scholars and students interested in environmental and sustainability discourses and to anyone willing to think outside the box *Society and Exploitation Through Nature* Martin Phillips, Tim Mighall, 2014-06-06 *Society and Exploitation Through Nature* offers an integrated approach to the environment linking the philosophical social and physical sciences to environmental problems and issues The text covers three main themes exploitation of nature and society the limits of exploitation through sustainability and managing environmental problems These themes are illustrated throughout the book with global case studies

Nature, Society, and Justice in the Anthropocene Alfred Hornborg, Alf Hornborg, 2019-06-27 Money and market prices obscure an unequal global exchange of resources which is a prerequisite to what we perceive as technological progress *Nature, Society, and Marginality* Pushkar K. Pradhan, Walter Leimgruber, 2023-01-01 This book focuses on the interrelations between nature and humans in particular on those segments of societies that have been left behind marginal groups Nature is both the friend of humans and their adversary depending on the way people treat and use it Consequently the book adopts a wide perspective of marginality nature that has been marginalized by man ecological marginality but also social groups marginalized by politics economic interests and value judgements imbedded in culture Many chapters deal specifically with issues in Nepal but along with the other chapters with case studies from Southeast Asia and other regions

they demonstrate that the major man nature problems are the same everywhere and can only be solved by constructive politics through clear regulations convincing actions and general acceptance **The Social Construction of Nature** Klaus Eder,1996-10-14 This is a unique and agenda setting interpretation of nature and ecology that will become the essential reference in any debate on environmental politics and sociology Society and Nature Peter Dickens,1992 In this wide ranging effort to theorize about the relationships between society and nature Peter Dickens attempts to reconstruct social theory in a way that enables it to speak to contemporary environmental issues After reviewing existing sociological traditions he draws on the early work of Karl Marx to suggest that processes and relations in the workplace are the main source of people s separation from nature In addition people s understanding of nature tends to mirror their experience of the social world Redefining the work of Anthony Giddens in an ecological direction Dickens analyzes developments in biological thinking that seem consistent with this approach He considers the role of culture and he critiques the contemporary deep green and deep ecology movements Focusing on the alienation of human beings from the natural world and the place of nature in their deep mental structures the author works in part from a Marxist perspective but draws a wide variety of social psychological and biological theories into the discussion Society and Nature not only addresses a central debate in contemporary social science regarding this interrelationship but also responds to the intellectual challenge presented by natural scientific concepts of environmental problems that oversimplify or ignore their political or social relational dimensions Author note Peter Dickens is Senior Lecturer in Urban Studies and Social Policy at the University of Sussex UK and the author of Urban Sociology Society Locality and Human Nature **Transactions of the Indiana Horticultural Society ...** Indiana Horticultural Society,1890 *Transactions of the Indiana Horticultural Society for the Year ...* Indiana Horticultural Society. Meeting,1890
