Nature, Action and the Future Katrina Forrester, Sophie Smith, 2018-01-25 Leading scholars of political thought demonstrate how the history of political ideas makes sense of environmental politics and climate change *Decentring the Renaissance* Germaine Warkentin, Carolyn Podruchny, 2001-01-01 Eighteen innovative essays explore not only how the European Renaissance helped form Canada but also how more significantly the experience of Canada touched the Renaissance and those who first came to the shores of North America

Natural Science and the Origins of the British Empire Sarah Irving, 2015-09-30 Represents a history of the British Empire that takes account of the sense of empire as intellectual as well as geographic dominion the historiography of the British Empire with its preoccupation of empire as geographically unchallenged sovereignty overlooks the idea of empire as intellectual dominion

Magical Realism and the History of the Emotions in Latin America Jerónimo Arellano, 2015-05-21 Iconoclastic in spirit *Magical Realism and the History of the Emotions in Latin America* is the first study of affect and emotion in magical realist literature Against the grain of a vast body of scholarship it argues that magical realism is neither exotic commodity nor postcolonial resistance but an art form fueled by a search for spaces of wonder in a disenchanted world Linking the rise and fall of magical realism and kindred narrative forms to the shifting value of wonder as an emotional experience this thought provoking study proposes a radical new approach to canonical novels such as *One Hundred Years of Solitude* Received as one of the most convincing manifestations of the turn to affect in contemporary Latin American critical thought *Magical Realism and the History of the Emotions* draws on affect theory the history of emotions and new materialism to reframe key questions in Latin American literature and culture

Kohl, Irina Podgorny, Stefanie Gänger, 2014-12-04 *Nature and Antiquities* examines the relation between the natural sciences anthropology and archaeology in the Americas in the nineteenth and early twentieth centuries Taking the reader across the Americas from the Southern Cone to Canada across the Andes the Brazilian Amazon Mesoamerica and the United States the book explores the early history of archaeology from a Pan American perspective The volume breaks new ground by entreating archaeologists to acknowledge the importance of ways of knowing that resulted from the study of nature in the history of archaeology Some of the contributions to this volume trace the part conventions practices and concepts from natural history and the natural sciences played in the history and making of the discipline Others set out to uncover reassemble or adjust our vision of collections that research historians of archaeology have disregarded or misrepresented because their nineteenth century makers would refuse to comply with today's disciplinary borders and study natural specimens and antiquities in conjunction under the rubric of the territorial the curious or the universal Other contributions trace the sociopolitical implications of studying nature in conjunction with indigenous peoples in the Americas inquiring into what it meant and entailed to comprehend the inhabitants of the American continent in and through a state of nature

A Politics of All Dean Caivano, 2024-04-08 No historical figure is more

synonymous with establishing American democracy than Thomas Jefferson Revolutionary iconoclastic yet pragmatic the legacy of Jefferson as an intellectual and politician continues to reverberate across academic and public circles However Jefferson's writings on power authority and politics point to a different understanding of self government than dominant liberal and republican interpretations suggest Dean Caivano's interpretation of Jefferson's political anthropological and sociological meditations on power reveals an unknown Jefferson who conceives the American nation state as a network of dynamic autonomous communities enacted by a politics of all Caivano pointedly argues that this unknown Jefferson fittingly aligns with historical and contemporary projects of radical democracy stressing the need for constant resistance inquiry and dialogue In a period fraught with political division and hyper partisanship this timely innovative reading of Jefferson invites a reappraisal of how we understand a vital founder of the American republic and what is at stake in the battle to save American democracy

Avenging Nature Eduardo Valls Oyarzun, Rebeca Gualberto Valverde, Noelia Malla Garcia, María Colom Jiménez, Rebeca Cordero Sánchez, 2020-09-28 Nature thou art my goddess Edmund's bold assertion in King Lear could easily inspire and at the same time function as a lamentation of the inadequate respect of nature in culture In this volume international experts provide multidisciplinary exploration of the insubordinate representations of nature in modern and contemporary literature and art The work foregrounds the need to reassess how nature is already and has been for a while striking back against human domination From the perspective of literary studies art history media studies ethics and philosophy and ethnology and anthropology *Avenging Nature* highlights the need of assessing insurgent discourses that converging with counter discourses of race gender or class realize the empowerment of nature from its subaltern position Acknowledging the argument that cultural representations of nature establish a relationship of domination and exploitation of human discourse over nonhuman reality and that in consequence our regard for nature as humanist critics is instrumental and anthropocentric the present volume advocates for the view that the time has come to finally perceive nature's vengeance and to critically probe into nature's ongoing revenge against the exploitation of culture
