

The background of the book cover is a photograph of a person, likely a detective, walking in a dark, rainy street at night. The person is wearing a dark trench coat and a hat, and is walking away from the camera. The street is wet, and there are reflections of light on the pavement. A strong green light source, possibly a street lamp or a neon sign, is visible in the background, casting a green glow on the scene. The overall mood is mysterious and noir.

Clausewitz and Contemporary War Antulio J. Echevarria II, Antulio Joseph Echevarria, 2007-09-27 An engaging new interpretation of Clausewitz's classic *On War* and its relevance to contemporary world conflicts

Conflict in Cyber Space Karsten Friis, Jens Ringsmose, 2016-03-31 Adopting a multidisciplinary perspective this book explores the key challenges associated with the proliferation of cyber capabilities Over the past two decades a new man made domain of conflict has materialized Alongside armed conflict in the domains of land sea air and space hostilities between different types of political actors are now taking place in cyberspace This volume addresses the challenges posed by cyberspace hostility from theoretical political strategic and legal perspectives In doing so and in contrast to current literature cyber security is analysed through a multidimensional lens as opposed to being treated solely as a military or criminal issues for example The individual chapters map out the different scholarly and political positions associated with various key aspects of cyber conflict and seek to answer the following questions do existing theories provide

sufficient answers to the current challenges posed by conflict in cyberspace and if not could alternative approaches be developed how do states and non state actors make use of cyber weapons when pursuing strategic and political aims and how does the advent of conflict in cyberspace challenge our established legal framework By asking important strategic questions on the theoretical strategic ethical and legal implications and challenges of the proliferation of cyber warfare capabilities the book seeks to stimulate research into an area that has hitherto been neglected This book will be of much interest to students of cyber conflict and cyber warfare war and conflict studies international relations and security studies *Clausewitz in the Twenty-First Century* Hew Strachan, Andreas Herberg-Rothe, 2007-09-13 The volume considers Clausewitz's timeless *On War* against the background of actual armed conflict With scholars from a range of disciplines and countries it throws new light on a classic text and contemporary issues Understanding Contemporary Strategy David J. Lonsdale, Thomas M. Kane, 2012-03-12 *Understanding Contemporary Strategy* provides an accessible and comprehensive introduction to the theory and practice of modern strategy Covering all the main issues in the field the book explores the major themes through a combination of classical and modern strategic theory history and current practice The book is split into three main sections Definition and Context including discussion of the human technological intelligence ethical and grand strategic dimensions Strategy in the Geographic Environments land sea air and space Contemporary Strategic Challenges terrorism insurgency and nuclear strategy Each chapter presents the reader with a succinct summary of the topic but also provides a challenging analysis of current issues supporting students with pedagogical features such as suggested further reading boxed case studies and study questions This book will be essential reading for upper level students of strategic studies war studies military history and international security *Clausewitz and America* Stuart Kinross, 2009-10-16 This book demonstrates how Clausewitzian thought influenced American strategic thinking between the Vietnam War and the current conflict in Iraq Carl von Clausewitz's thought played a part in the process of military reform and the transition in US policy that took place after the Vietnam War By the time of the 1991 Gulf War American policy makers demonstrated that they understood the Clausewitzian notion of utilizing military force to fulfil a clear political objective The US armed forces bridged the operational and strategic levels during that conflict in accordance with Clausewitz's conviction that war plans should be tailored to fulfil a political objective With the end of the Cold War and an increasing predilection for technological solutions American policy makers and the military moved away from Clausewitz It was only the events of 11 September 2001 that reminded Americans of his intrinsic value However while many aspects of the War on Terror and the conflict in Iraq can be accommodated within the Clausewitzian paradigm the lack of a clear policy for countering insurgency in Iraq suggests that the US may have returned full circle to the flawed strategic approach evident in Vietnam *Clausewitz and America* will be of great interest to students of strategy military history international security and US politics Order Wars and Floating Balance Andreas Herberg-Rothe, Key-young Son, 2017-07-14 A sense of order has irreversibly retreated at the turn of the twenty first century

with the rise of such ancient civilizations as China and India and the militant resurgence of Islamic groups The United States and like minded states want to maintain the once dominant international and global order buttressed by a set of mainly Western value systems and institutions Nevertheless challengers have sought to redraw the international and global order according to their own ideas and preferences while selectively accommodating and taking advantage of the established order Because of this the entire world is teetering on the brink of an order war This book is a synthesis of two separate bodies of thoughts from Western and East Asian ideas and philosophies respectively The authors deploy the major ideas of key Western and East Asian thinkers to shed a new light on their usefulness in understanding the transition of global order They locate new ideas to overcome the contradictions of the late modern world and provide some ideational building blocks of a new global order The new concepts proposed are recognition between the great civilizations a harmony and floating balance between and within contrasts individual versus community freedom versus equality and mediation between friends and foes As the former Israeli Prime Minister Yitzhak Rabin put it you don't need to make peace with your friends you have to make peace with your foes The values of the West as well as that of the East cannot survive in a globalized world by taking them as absolute but only by balancing them to those of the other great civilizations of the world
