As you read these pages you will understand why I so admire Peter Wohlleben and am so in love with his work JANE GOODALL Nature is full of surprises deciduous trees affect the rotation of the Earth cranes sabotage the production of Iberian ham and coniferous forests can make it rain But what are the processes that drive these incredible phenomena And why do they matter In The Secret Wisdom of Nature master storyteller and international sensation Peter Wohlleben takes readers on a thought provoking exploration of the vast natural systems that make life on Earth possible In this tour of an almost unfathomable world Wohlleben describes the fascinating interplay between animals and plants and answers such questions as How do they influence each other Do lifeforms communicate across species boundaries And what happens when this finely tuned system gets out of sync By introducing us to the latest scientific discoveries and recounting his own insights from decades of observing nature one of the world's most famous foresters shows us how to recapture our sense of awe so we can see the world around us with completely new eyes Published in Partnership with the David Suzuki Institute **The Animal in the Secret World of Darwin** Michel Bergeron, 2011-03-03 Scientist Charles Darwin discretely opened the possibility of a purely animalistic origin for the human species He repeatedly insisted that the differences between humans and others were a question of degree only Sciences were however taken in the opposite direction where

these differences cannot have been generated by the natural processes of biological evolution In *The Animal in the Secret World of Darwin* author Michel Bergeron discusses the effects on the sciences caused by the presence of questions on humanity only answerable with religious beliefs His investigation suggests that significant elements of perceived humanity have remained sufficiently narrowly defined to continue to agree with religious beliefs over the entire period starting with the scientific revolution centuries ago and reaching the present Instead he questions could we be the simple animal who can only live on the belief not to be a simple animal To alleviate these biases on the sciences of life Bergeron advocates a different synthesis between Darwinism and Lamarckism He further asks How can sciences pretend to a cosmology neutral in term of religious influence since all of its complex mathematical developments were made under the constraint that we can link the present directly to the Big Bang

The Secret Life of Kids James W. Peterson, 2000-10-29 It all began when James Peterson was a camp counselor and two children watching him meditate described the colors they saw around his form we saw colors coming out of his stomach And the outside was purple then it was blue then it was yellow then reddish and light yellow in the middle Studies indicate that almost seven percent of young children have such psychic experiences For the most part they don't tell anybody about them for fear of being ridiculed But the author believes it would be psychologically healthy for them to relate such occurrences to adults if they feel the need In this book Peterson has put together a charming collection of case histories about such psychic episodes He believes they should be accepted as factual that frequently they emanate from the wisdom of innocence present in youngsters The question of the secret life of kids is examined by Peterson from the point of view of philosophy occultism and child psychology He suggests why and how such experiences manifest and their potential value to the child's growth pattern
