Navajo Infancy An Ethological Study Of Child Development:

Navajo Infancy James S. Chisholm, Combining the concepts and methods of classical ethology with those of social cultural anthropology *Navajo Infancy* describes the major sources of change and continuity in Navajo infant development as a vehicle for discussing the relationships between human nature and culture The theoretical framework includes adaptation and natural selection as key background variables but in the important context of recent advances in evolutionary biology which argue for a high degree of developmental plasticity in human ontogeny and the unique adaptive value of human epigenetics and socialization *Navajo Infancy* James S. Chisholm, 2017 *Navajo Infancy* describes the major sources of change and continuity in Navajo infant development It does so by combining concepts and methods of classical ethology with those of social cultural anthropology The goal is to establish the relationships between human nature and culture By considering the nature of adaptation and the evolution of human developmental patterns and through analyses of the determinants of change and continuity in Navajo infant development *Navajo Infancy* outlines how the process of development itself may bridge nature and culture With its special focus on the effect of the cradleboard on Navajo mother infant interaction *Navajo Infancy* raises important developmental issues in its analyses of why the effects of the cradleboard do not last Incorporating the Brazelton Neonatal Behavioral Assessment Scale into its ethological anthropological methods *Navajo Infancy* demonstrates significant Navajo Anglo American differences in newborn temperament It finds a strong correlation between newborn behavior and prenatal environmental factors arguing that racial and ethnic differences in behavior at birth go well beyond simple gene pool differences *Navajo Infancy* also describes the individual and group differences in the development of Navajo and Anglo American children's fear of strangers and patterns of mother infant interaction Aspects of attachment theory transactional theories of development and anthropological theories of socialization are related to this broad new evolutionary approach to the process of development and nature culture interaction Provided by publisher

The Anthropology of Learning in Childhood David F.

Lancy, John Bock, Suzanne Gaskins, 2010-01-15 The Anthropology of Learning in Childhood offers a large mural like portrait of childhood across time culture species and environment Even a casual reading of the literature on childhood will persuade one that learning is a very important topic that commands the attention of tens of thousands of scholars and practitioners Yet anthropological research on children has exerted relatively little influence on this community This book will change that The book demonstrates that anthropologists studying childhood can offer a description and theoretically sophisticated account of children s learning and its role in their development socialization and enculturation Further it demonstrates the particular contribution that children s learning makes to the construction of society and culture as well as the role that culture acquiring children play in human evolution Chapters have been contributed in archaeology primatology biological and cultural anthropology and cross cultural psychology

Anthropology and Child Development Robert A. LeVine, Rebecca S.

New, 2008-02-11 This unprecedented collection of articles is an introduction to the study of cultural variations in childhood across the world and to the theoretical frameworks for investigating and interpreting them Presents a history of cross cultural approaches to child development Recent articles examine diverse contexts of childhood in ecological semiotic and sociolinguistic terms Includes ethnographic studies of childhood in the Pacific Africa Latin America East Asia Europe and North America Illuminates the process through which people become the bearers of culturally historically specific identities Serves as an ideal text for anthropology courses focusing on childhood as well as classes on development psychology

Psychobiology and Early Development H. Rauh, H.-C. Steinhausen, 1987-06-01 This volume is the outcome of an

international symposium held in Berlin FRG which brought together researchers in the field of infant development The contributors are from Europe and North America and have as their primary professional interest either pediatrics biology or psychology These fields in spite of common involvement and large overlap still have to overcome communication problems and differences in scientific approaches The emphasis of this book is on the efforts of the participants towards reaching a mutual understanding In spite of disciplinary diversity the papers in this book complement each other and set the scene for future multidisciplinary research and exchange in the field of infant development

Brain Maturation and Cognitive Development Kathleen Rita Gibson, Anne C. Petersen, This volume adopts a unique multidisciplinary approach to the study

of the development of the human brain and early behavior Evolutionary neurological genetic psychological linguistic and cross cultural studies of brain behavior interactions in human development are integrated for the first time within a biosocial framework Contributors draw upon both classic anatomical and modern physiological and biochemical techniques to chart

postnatal brain development as well as comparative primate and human brain and behavior maturation *Child Development* Martin J. Packer, 2017-03-25 Every child is born into a community a society with a culture in which he or she will live grow and develop Cultures lead to differences in children s development but equally important culture is an essential component of every child s psychological development Child Development takes a chronological approach from prenatal development to adolescence in which social cognitive emotional and physical aspects of development are interwoven Martin Packer integrates cross cultural examples from different parts of the world to illustrate how culture plays a constitutive role in children s development This book includes an in depth discussion of human evolution the history of language and the human lifespan as well as the theoretical perspectives of scientific research on children s development This textbook is essential reading for undergraduate students taking an introductory course in child development or developmental psychology Attachment Reconsidered N. Quinn, J. Mageo, 2013-12-18 Since the 1950s the study of early attachment and separation has been dominated by a school of psychology that is Euro American in its theoretical assumptions Based on ethnographic studies in a range of locales this book goes beyond prior efforts to critique attachment theory providing a cross cultural basis for understanding human development *New Directions in Psychological Anthropology* Theodore Schwartz, Geoffrey M. White, Catherine A. Lutz, 1992 The field of psychological anthropology has changed a great deal since the 1940s and 1950s when it was often known as Culture and Personality Studies Rooted in psychoanalytic psychology its early practitioners sought to extend that psychology through the study of cross cultural variation in personality and child rearing practices Psychological anthropology has since developed in a number of new directions Tensions between individual experience and collective meanings remain as central to the field as they were fifty years ago but alongside fresh versions of the psychoanalytic approach other approaches to the study of cognition emotion the body and the very nature of subjectivity have been introduced And in the place of an earlier tendency to treat a culture as an undifferentiated whole psychological anthropology now recognizes the complex internal structure of cultures The contributors to this state of the art collection are all leading figures in contemporary psychological anthropology and they write about recent developments in the field Sections of the book discuss cognition developmental psychology biology psychiatry and psychoanalysis areas that have always been integral to psychological anthropology but which are now being transformed by new perspectives on the body meaning agency and communicative practice
