Navies And Global Defense Theories And Strategy:

Navies and Global Defense Roch Legault,1995-11-20 These essays explore the link between the naval strength and global power of Great Britain and the United States from 1815 to the present The British Way of Warfare assumed that the country with control of the sea could ensure safe and rapid communications for its commerce The American theory of naval strategy on the other hand assumed that one had to engage the enemy in order to assure command of the sea These case studies illustrate once again that naval history must include cultural economic political and social contexts *Imperialism at Sea* Rolf Hobson,2021-10-01 Was Grand Admiral Alfred von Tirpitz plan for naval expansion and the development of a risk fleet as a way to position Wilhelmine Germany as a world power to rival Britain so unique This comparative study of the modern naval strategy of Germany Britain France and the United States seeks to answer that question First Hobson is the only naval scholar to simultaneously compare the Tirpitz Plan with plans of the other leading nations of that time Second Hobson also interacts with how other scholars have assessed the complex interplay between naval history both in and outside Germany maritime law and naval strategy Hobson offers a unique interpretation of the causes and objectives of the German Imperial Navy at the end of the nineteenth century forces that ultimately led to the First World War *Navies and Global Defense* Keith Neilson,Elizabeth Jane Errington,1995-11-20 These essays explore the link between the naval strength and global power of Great Britain and the United States from 1815 to the present The British Way of Warfare assumed that the country with control of the sea could ensure safe and rapid communications for its commerce The American theory of naval strategy on the other hand assumed that one had to engage the enemy in order to assure command of the sea These case studies illustrate once again that naval history must include cultural economic political and social contexts Global Geostrategy Brian Blouet,2013-05-13 This is a new examination of Halford Mackinder s seminal global geostrategic work from the perspective of geography diplomatic history political science international relations imperial history and the space age Mackinder was a man ahead of his time He foresaw many of the key strategic issues that came to dominate the twentieth century Until the disintegration of the Soviet Union western defence strategists feared that one power or alliance might come to dominate Eurasia Admiral Mahan discussed this issue in *The Problem of Asia* 1900 but Mackinder made the most authoritative statement in *The Geographical Pivot of History* 1904 He argued that in the closed Heart Land of Euroasia was a strategically placed region with great resources that if controlled by one force could be the basis of a World Empire James Kurth in *Foreign Affairs* has commented that it has taken two World Wars and the Cold War to prevent Mackinder s prophecy becoming reality In World War I and World War II Germany achieved huge territorial gains at the expense of the Russian empire and the Soviet Union In the former conflict the Russian empire was defeated by Germany but the western powers insisted that the territorial gains made by Germany at the treaty of Brest Litovsk be given up In World War II Britain and the US gave material support to Stalin s totalitarian regime to prevent Nazi Germany gaining control of the territory and

resources that might have been a basis for world domination The west highly conscious of Mackinder's dictum 1919 that Who rules East Europe commands the Heartland quickly adopted policies to contain the Soviet Union History has therefore proved Mackinder's work to be of vital importance to generations of strategic thinking and he remains a key influence in the new millennium This book will be of great interest to all students and scholars of strategic studies and military history and of geopolitics in particular
