Navigators Universe Libro De Cosmographi:

A Navigator's Universe Pedro de Medina,1972

Cosmographers and Pilots of the Spanish Maritime Empire

Ursula Lamb,2024-10-28 These essays deal with questions of navigation and more broadly the intellectual challenges posed by Spain's acquisition of an empire across the Atlantic. Crudely they had to find out what was where and how to get there. The first section of the volume looks at the 16th century Sevillian cosmographers and pilots charged with this task: their achievements, the social and political context in which they worked and the methods used to establish scientific truths including the resort to litigation. Ursula Lamb then turns to examine specific problems from the routing of transatlantic shipping to the application of cartographic coordinates to allocate unexplored territories. The final articles move forward to the time when after a lapse of two centuries Spanish nautical science became revitalised and the Spanish Hydrographic Office was established.

Explorers, Fortunes and Love Letters

New Netherland Institute,2010-04-01 When Henry Hudson sailing on the Half Moon for the Dutch East India Company first laid eyes on the entrance to the Hudson River in 1609 a world of seemingly infinite possibilities lay before him and his crew. In 1624 the Dutch would take advantage of these opportunities and create the colony of New Netherland, building homes and communities that stretched from the Delaware Bay up along the Hudson River Valley to present-day Albany, New York. The story of New Netherland is often overlooked in tales of the founding of America. The essays in *Explorers, Fortunes and Love Letters: A Window on New Netherland* offer a new perspective that takes the spotlight off the Puritans of New England and the settlers of Jamestown, Virginia, and instead offers striking arguments for casting the Dutch as central players in the American narrative. These twelve essays, written by preeminent historians of New Netherland, pull from diverse perspectives: social, cultural, intellectual, economic, and political, to weave together the dynamic and diverse history of the Dutch in America. These scholars explore all aspects of Dutch life, ranging from sailing methods to factional politics to written expressions of love. The authors discuss how settlers retained traditions from the Netherlands, such as the baking of bread, and how these traditions changed over time and became engrained in American culture, including the transformation of the Dutch St. Nicholas into today's Santa Claus. The colony of New Netherland was marked by its diversity, and this topic is explored in discussions of the relationship between Native Americans and Dutch settlers in the Mohawk Valley, the role of Jews in New Netherland, and the practice of slavery throughout the colony. The Dutch perspective on child-rearing practices is also examined, as well as the dream of attaining fortune in the New World. The Dutch colony of New Netherland and the development of America are not separate stories but are inextricably linked together through historical moments and present realities. Dutch settlers played critical roles in building the nation; their influences are not lost and forgotten but are clearly evident even today. *Explorers, Fortunes and Love Letters* brings the reader into the everyday life of New Netherland and displays just how prominently the Dutch shaped America.

Medieval Ethnographies Joan-Pau Rubies, 2017-05-15 From the twelfth century a growing sense of cultural confidence in the Latin West at the same time that the central lands of Islam suffered from numerous waves of conquest and devastation was accompanied by the increasing importance of the genre of empirical ethnographies From a global perspective what is most distinctive of Europe is the genre's long term impact rather than its mere empirical potential or its ethnocentrism all of which can also be found in China and in Islamic cultures Hence what needs emphasizing is the multiplication of original writings over time their increased circulation and their authoritative status as a scientific discourse The empirical bent was more characteristic of travel accounts than of theological disputations in fact the less elaborate the theological discourse the stronger the ethnographic impulse although many travel writers were clerics This anthology of classic articles in the history of medieval ethnographies illustrates this theme with reference to the contexts and genres of travel writing the transformation of enduring myths ranging from oriental marvels to the virtuous ascetics of India or Prester John the practical expression of particular encounters from the Mongols to the Atlantic and the various attempts to explain cultural differences either through the concept of barbarism or through geography and climate
