Summary The proliferation of weapons of mass destruction I and long range means of delivery continues to be a matter of serious concern as it can pose a direct threat to national and international security

Regional Deterrence Strategies for New Proliferation Threats Jerome H. Kahan, 1996 Report of the Secretary of Defense to the President and the Congress United States. Department of Defense, 1995 *Department of Defense appropriations for 2001* United States. Congress. House. Committee on Appropriations. Subcommittee on Department of Defense, 2004

Professional Journal of the United States Army, 1996 **Military Review**, 1996 America's Achilles' Heel Richard A Falkenrath, Robert D Newman, Bradley A. Thayer, 1998-07-08

Nuclear biological and chemical NBC weapons delivered covertly by terrorists or hostile governments pose a significant and growing threat to the United States and other countries Although the threat of NBC attack is widely recognized as a central national security issue most analysts have assumed that the primary danger is military use by states in war with traditional military means of delivery The threat of covert attack has been imprudently neglected Covert attack is hard to deter or prevent and NBC weapons suitable for covert attack are available to a growing range of states and groups hostile to the United States At the same time constraints on their use appear to be eroding This volume analyzes the nature and limits of the covert NBC threat and proposes a measured set of policy responses focused on improving intelligence and consequence management capabilities to reduce U S vulnerability About the authors Richard A Falkenrath is Assistant Professor of Public Policy at Harvard s Kennedy School of Government He served as Executive Director of the Belfer Center for Science and International Affairs BCSIA and before that as a Research Fellow He is the

author and co author of *Shaping Europe's Military Order* 1995 *Avoiding Nuclear Anarchy* 1996 *America's Achilles Heel* Nuclear Biological Chemical Terrorism and Covert Attack 1998 and numerous journal articles and chapters of edited volumes Falkenrath has been a Visiting Research Fellow at the German Society of Foreign Affairs DGAP in Bonn He holds a PhD from the Department of War Studies King's College London where he was a British Marshall Scholar and is a summa cum laude graduate of Occidental College Los Angeles with degrees in economics and international relations He is on leave in 2001 2002 and is currently serving as Director for Counterproliferation and Homeland Defense at the National Security Council Bradley A Thayer is Assistant Professor of Political Science at the University of Minnesota Duluth *Department of Defense Authorization for Appropriations for Fiscal Year 1998 and the Future Years Defense Program: Strategic forces* United States. Congress. Senate. Committee on Armed Services, 1997 NATO and Weapons of Mass Destruction Eric Terzuolo, 2009-05-07 NATO was hugely successful in facing off the Soviet Union during the Cold War But has it been equally successful in addressing the new threats of the post Cold War era This new study assesses the organization's political and military initiatives and how its outreach to Russia Ukraine and other countries in the Euro Atlantic and Mediterranean regions devoted considerable attention to WMD proliferation risks It also probes the political factors both inside and outside NATO as well as resource constraints which have limited the alliance's added value in the international community's effort to combat proliferation The events of 11 September 2001 and bitter intra alliance controversy over the 2003 Iraq intervention have highlighted questions regarding NATO's future role and even its continued viability This is a serious reflection on how the alliance should figure in the fight against WMD and terrorist threats and an examination of today's key issues including the use of force in international relations and the possibility of constructing new post Cold War collective security rules This is the first study to evaluate critically and in depth how a long standing security organization has adapted and must continue to adapt to the global security challenges of our time This book will be of great interest to all students and scholars of international politics military history and all readers interested in the future of NATO and international security
