The State of the Universe Pedro Ferreira, 2012-10-18 A masterly overview of the development of cosmological thinking from the Greeks via Newton and Einstein to the present day It is science's last and greatest challenge fathoming the depths of the night sky The objective to crack the cosmic code to unravel the blueprint for nature's grandest conception a machine constructed on an unimaginably vast scale the Universe itself Today's model of an expanding Universe the big bang cosmology is actually built on principles derived from a few simple mathematical equations Gravity warped space time quantum mechanics the physics of the subatomic these crucial insights stemming from Einstein's revolutionary theories of relativity have led to a simple and elegant framework within which the whole of the Universe over billions of years has been described But recent evidence has begun to make wrinkles in the neat fabric of the big bang cosmology There is now overwhelming evidence that there is far

more stuff in the Universe than we can see What and where is this dark matter And it now appears that the expansion of the Universe is accelerating something out there some exotic dark energy is acting against gravity to push space and time apart While offering a critical view of how all the pieces in our current model fit together Pedro Ferreira argues that Einstein s Universe may be just another stepping stone towards a new more profound and effective cosmology in the future

Mis-spent Robert Parker,2023-11-21 Worship in church can be very challenging especially with young people This book contains a range of services ideas designed especially for but not only young people Many of those who lead worship in churches schools youth centres etc need to become very focussed on young people around Christmas time but even when they think creatively they have neither time nor the resources to implement their ideas This book offers a wide off the peg range of services addresses for Advent and Christmas through which we believe it possible to create a sense of wonder awe and excitement We hope that as worship leaders explore what follows they will feel stimulated to dip into the contents offered and then create their own events and special services As readers explore man s relationship with God they will be led along paths that are as varied as the individual characteristics of those people Each and every path leads to moments of personal discovery and with these come satisfaction great humour and joy This book shares some of these awesome discoveries The ideas that follow are an attempt to demonstrate how different congregations have explored the God Man relationship and we hope the reader will be hugely stimulated and want to become creative in their own way this is the main purpose for this book The book is divided into 3 parts Section 1 is an event which can fill the Sermon Slot in a family service or a school assembly whether it is a Eucharist or another form of worship Section 2 is made up of a number of complete

services each of which stands in its own right Section 3 contains some ideas for embellishing both Sections 1 2 These can also be used as standalone pieces or interwoven with other themes created by the reader
