## The history of Earth

Earth is the planet we live on, and it has a very long and interesting history! Scientists believe that Earth formed about 4.5 billion years ago, which is a really long time. At first, Earth was a hot and molten ball of rock, but over time it cooled down and became the planet we know today. Dinosaurs were some of the most famous animals that lived on Earth long ago, but they are now extinct. Humans have only been around for a very short time compared to the history of Earth. But in that time, we have done many things to change the planet both good and bad. Earth Day is a day when people all over the world come together to celebrate our planet and learn how we can take care of it for future generations.

1. How old is Earth believed to be?

2. What was Earth like when it first formed?

3. What is Earth Day and why is it important?

Name: \_\_\_\_\_ Date: \_\_\_\_\_

## Recycling

Recycling is an important way to help the environment. When we recycle, we take things that we don't need anymore and turn them into new things. This helps reduce the amount of waste that goes into landfills and saves resources like paper, plastic, and metal. Recycling also helps reduce pollution and saves energy. There are many things that we can recycle, including paper, plastic, metal, and glass. When we recycle, we are helping to keep our planet clean and healthy for the future.

1. What is recycling and why is it important?

2. What are some things that can be recycled?

Name: \_\_\_\_\_ Date: \_\_\_\_\_

## Renewable Energy

Renewable energy is energy that comes from natural resources that are constantly replenished. Unlike fossil fuels, which take millions of years to form, renewable energy sources like wind, solar, and hydropower can be used over and over again. Renewable energy is clean and does not produce greenhouse gases, which help to reduce climate change. Using renewable energy can also save money in the long run because the resources are free and the technology is getting better and cheaper.

1. What is renewable energy and why is it important?

2. What are some examples of renewable energy?

**Fill the Earth** Matthew Newkirk, 2020-03-09 Why does the church engage in missions Where in the Bible do we find support for this work These questions have been asked and answered by many throughout the centuries though rarely does the investigation span across the entire canon of Scripture In this study Newkirk explores the breadth and depth of biblical teaching concerning God's mission for his people and the church's call to spread the gospel to the ends of the earth By beginning with creation and ending with new creation this study reveals that rather than simply deriving from a few missions verses the church's call to missions is grounded in the full spectrum of biblical revelation

**To Live as Long as Heaven and Earth** Robert F. Campany, 2002-04-08 In late classical and early medieval China ascetics strove to become transcendent deathless beings with supernormal powers Practitioners developed dietetic alchemical meditative gymnastic sexual and medicinal disciplines some of which are still practiced today to perfect themselves and thus transcend death Narratives of their achievements circulated widely Ge Hong 283-343 CE collected and preserved many of their stories in his *Traditions of Divine Transcendents* affording us a window onto this extraordinary response to human mortality Robert Ford Campany's groundbreaking and carefully researched text offers the first complete critical translation and commentary for this important Chinese religious work at the same time establishing a method for reconstructing lost texts from medieval China Clear exacting and annotated the translation comprises over a hundred lively engaging narratives of individuals deemed to have fought death and won Additionally *To Live as Long as Heaven and Earth* systematically introduces the Chinese quest for transcendence illuminating a poorly understood tradition that was an important source of Daoist religion and a major social cultural and religious phenomenon in its own right

**Galileo, Bellarmine, and the Bible** Richard J. Blackwell, 1991-01-31

Considered the paradigm case of the troubled interaction between science and religion the conflict between Galileo and the Church continues to generate new research and lively debate Richard J Blackwell offers a fresh approach to the Galileo case using as his primary focus the biblical and ecclesiastical issues that were the battleground for the celebrated confrontation Blackwell s research in the Vatican manuscript collection and the Jesuit archives in Rome enables him to re create a vivid picture of the trends and counter trends that influenced leading Catholic thinkers of the period the conservative reaction to the Reformation the role of authority in biblical exegesis and in guarding orthodoxy from the inroads of unbridled spirits and the position taken by Cardinal Bellarmine and the Jesuits in attempting to weigh the discoveries of the new science in the context of traditional philosophy and theology A centerpiece of Blackwell s investigation is his careful reading of the brief treatise Letter on the Motion of the Earth by Paolo Antonio Foscarini a Carmelite scholar arguing for the compatibility of the Copernican system with the Bible Blackwell appends the first modern translation into English of this important and neglected document which was placed on the Index of Forbidden Books in 1616 Though there were differing and competing theories of biblical interpretation advocated in Galileo s time the legacy of the Council of Trent the views of Cardinal Bellarmine the most influential churchman of his time and finally the claims of authority and obedience that weakened the ability of Jesuit scientists to support the new science all contributed to the eventual condemnation of Galileo in 1633 Blackwell argues convincingly that the maintenance of ecclesiastical authority not the scientific issues themselves led to that tragic trial
