Step Wise Protocols for Somatic Embryogenesis of Important Woody Plants Shri Mohan Jain, Pramod Gupta, 2018-05-30 World population is increasing at an alarming rate and this has resulted in increasing tremendously the demand for tree products such as wood for construction materials fuel and paper fruits oils and medicines etc This has put immense pressure on the world's supplies of trees and raw material to industry and will continue to do so as long as human population continues to grow Also the quality of human diet especially nutritional components is adversely affected due to limited genetic improvement of most of fruit trees Thus there is an immediate need to increase productivity of trees Improvement has been made through conventional breeding methods however conventional breeding is very slow due to long life cycle of trees A basic strategy in tree improvement is to capture genetic gain through clonal propagation Clonal propagation via organogenesis is being used for the production of selected elite individual trees However the methods are labour intensive costly and produce low volumes Genetic gain can now be captured through somatic embryogenesis Formation of embryos from somatic cells by a process resembling zygotic embryogenesis is one of the most important features of plants In 1958 Reinert in Germany and Steward in USA independently reported somatic embryogenesis in carrot cultures Since then tremendous progress in somatic embryogenesis of woody and non woody plants has taken place It offers a potentially large scale propagation system for superior clones

The European Garden Flora Flowering Plants James Cullen, Sabina G. Knees, H. Suzanne Cubey, J. M. H. Shaw, 2011-08-11 The European Garden Flora is the definitive manual for the accurate identification of cultivated ornamental flowering plants Designed to meet the highest scientific standards the vocabulary has nevertheless been kept as uncomplicated as possible so that the work is fully accessible to the informed gardener as well as to the professional botanist This new edition has been thoroughly reorganised and revised bringing it into line with modern taxonomic knowledge Although European in name the Flora covers plants cultivated in most areas of the United States and Canada as well as in non tropical parts of Asia and Australasia Volume 4 contains accounts of 82 families mostly rather small but including the Primulaceae with *Primula* as its largest genus and Ericaceae with *Rhododendron* the largest genus in the Flora

Minor Fruits Sajad Ahmad Sofi, Khalid Muzaffar, Basharat Nabi Dar, Shabir Ahmad Mir, 2025-02-10 Minor fruits are often recognized as poor man's crops and include neglected underutilized and some rare fruits that can contribute high nutritional medicinal and antioxidant properties that are useful for health and curing many diseases This book Minor Fruits Nutritional Composition Bioactive Potential and Their Food Applications highlights the potential of minor fruits in the human diet and their health benefits due to presence of the rich source of phytochemicals fiber vitamins and minerals The book is unique in that it provides a full length study of several minor fruits and their nutritional and bioactive potential general characteristics and opportunities for their use in various functional food products It also provides an overview of the postharvest techniques used for minor fruits to preserve quality enhance shelf life streamline fruit processing and develop new value added products

It also provides knowledge on the proper utilization of minor fruits in meeting the demand for food and nutritional security challenges growing worldwide by offering a promising alternative source of fruit and fruit based products with health benefits. Important features of the book include: Highlights the importance of minor fruits in terms of nutrition and their role in combating malnutrition; Provides knowledge regarding the major minor fruits and their biodiversity; Details bioactive compounds of minor fruits and their health benefits; Looks at the role of minor fruits in combating diet related diseases; Discusses minor fruit based food products and their nutraceutical potentials. This book is a comprehensive reference written for teachers, scientists, researchers, students and others with an interest in minor fruits and their use in fruit processing value addition, byproducts and their utilization for combating malnutrition and nutritional security.

The Ecology and Evolution of Heliconius Butterflies Chris D. Jiggins, 2017-01-27. The Heliconius butterflies are one of the classic systems in evolutionary biology and have contributed hugely to our understanding of evolution over the last 150 years. Their dramatic radiation and remarkable mimicry has fascinated biologists since the days of Bates, Wallace and Darwin. *The Ecology and Evolution of Heliconius Butterflies* is the first thorough and accessible treatment of the ecology, genetics and behaviour of these butterflies, exploring how they offer remarkable insights into tropical biodiversity. The book starts by outlining some of the evolutionary questions that Heliconius research has helped to address, then moves on to an overview of the butterflies themselves and their ecology and behaviour, before focussing on wing pattern evolution and finally speciation. Richly illustrated with 32 colour plates, this book makes the extensive scientific literature on Heliconius butterflies accessible to a wide audience of professional ecologists, evolutionary biologists, entomologists and amateur collectors.

Studies in Natural Products Chemistry Atta-ur Rahman, 2021-09-22. *Studies in Natural Products Chemistry* Volume 71 covers the synthesis, testing and recording of the medicinal properties of natural products, providing cutting edge accounts of the fascinating developments in the isolation, structure elucidation, synthesis, biosynthesis and pharmacology of a diverse array of bioactive natural products. With the rapid developments in spectroscopic techniques and accompanying advances in high throughput screening techniques, it has become possible to isolate and then determine the structures and biological activity of natural products rapidly, thus opening up exciting opportunities in the field of new drug development to the pharmaceutical industry. Natural products in the plant and animal kingdom offer a huge diversity of chemical structures that are the result of biosynthetic processes that have been modulated over the millennia through genetic effects; hence users will find the detailed information in this book to be a great resource on the topics covered. Focuses on the chemistry of bioactive natural products. Contains contributions by leading authorities in the field. Presents sources of new pharmacophores.

Postharvest Biology and Technology of Tropical and Subtropical Fruits Elhadi M. Yahia, 2011-06-30. While products such as bananas, pineapples, kiwifruit and citrus have long been available to consumers in temperate zones, new fruits such as lychee, longan, carambola and mangosteen are now also entering the market. Confirmation of the health benefits of tropical and subtropical

fruit may also promote consumption further Tropical and subtropical fruits are particularly vulnerable to postharvest losses and are also transported long distances for sale Therefore maximising their quality postharvest is essential and there have been many recent advances in this area Many tropical fruits are processed further into purees juices and other value added products so quality optimisation of processed products is also important The books cover current state of the art and emerging post harvest and processing technologies Volume 1 contains chapters on particular production stages and issues whereas Volumes 2 3 and 4 contain chapters focused on particular fruit Chapters in Volume 4 review the factors affecting the quality of different tropical and subtropical fruits from mangosteen to white sapote Important issues relevant to each product are discussed including means of maintaining quality and minimising losses postharvest recommended storage and transport conditions and processing methods among other topics With its distinguished editor and international team of contributors Volume 4 of Postharvest biology and technology of tropical and subtropical fruits along with the other volumes in the collection are essential references both for professionals involved in the postharvest handling and processing of tropical and subtropical fruits and for academics and researchers working in the area Along with the other volumes in the collection Volume 4 is an essential reference for professionals involved in the postharvest handling and processing of tropical and subtropical fruits and for academics and researchers working in the area Reviews factors affecting the quality of different tropical and subtropical fruits concentrating on postharvest biology and technology Important issues relevant to each particular fruit are discussed such as postharvest physiology preharvest factors affecting postharvest quality and pests and diseases

Meiosis Andrew Swan,2012-02-29 Meiosis the process of forming gametes in preparation for sexual reproduction has long been a focus of intense study Meiosis has been studied at the cytological genetic molecular and cellular levels Studies in model systems have revealed common underlying mechanisms while in parallel studies in diverse organisms have revealed the incredible variation in meiotic mechanisms This book brings together many of the diverse strands of investigation into this fascinating and challenging field of biology

Edible Medicinal And Non-Medicinal Plants T. K. Lim,2012-06-11 This book continues as volume 4 of a multi compendium on Edible Medicinal and Non Medicinal Plants It covers edible fruits seeds used fresh or processed as vegetables spices stimulants edible oils and beverages It encompasses selected species from the following families Fagaceae Grossulariaceae Hypoxidaceae Myrsinaceae Olacaceae Oleaceae Orchidaceae Oxalidaceae Pandanaceae Passifloraceae Pedaliaceae Phyllanthaceae Pinaceae Piperaceae Rosaceae and Rutaceae This work will be of significant interest to scientists researchers medical practitioners pharmacologists ethnobotanists horticulturists food nutritionists agriculturists botanists conservationists lecturers students and the general public Topics covered include taxonomy common English and vernacular names origin and distribution agroecology edible plant parts and uses botany nutritive and pharmacological properties medicinal uses and research findings nonedible uses and selected references

Plant Cell Culture Protocols Víctor Loyola-Vargas,Neftalí Ochoa-Alejo,2024-07-10 This fifth

edition provides new and updated protocols on plant cell tissue and organ cultures Chapters are divided into five parts that cover topics from general methodologies statistical analysis and contamination control highly specialized techniques and laborious process of measuring the epigenetics changes in tissue cultures Written in the highly successful Methods in Molecular Biology series format chapters include introductions to their respective topics lists of the necessary materials and reagents step by step readily reproducible laboratory protocols and key tips on troubleshooting and avoiding known pitfalls Authoritative and cutting edge Plant Cell Culture Protocols Fifth Edition aims to ensure successful results in the further study of this vital field

Global Scientific Practice in an Age of Revolutions, 1750-1850 Patrick Manning, Daniel Rood, 2016-09-27 The century from 1750 to 1850 was a period of dramatic transformations in world history fostering several types of revolutionary change beyond the political landscape Independence movements in Europe the Americas and other parts of the world were catalysts for radical economic social and cultural reform And it was during this age of revolutions an era of rapidly expanding scientific investigation that profound changes in scientific knowledge and practice also took place In this volume an esteemed group of international historians examines key elements of science in societies across Spanish America Europe West Africa India and Asia as they overlapped each other increasingly Chapters focus on the range of participants in eighteenth and nineteenth century science their concentrated effort in description and taxonomy and advances in techniques for sharing knowledge Together contributors highlight the role of scientific change and development in tightening global and imperial connections encouraging a deeper conversation among historians of science and world historians and shedding new light on a pivotal moment in history for both fields

The Deformation Susanna Berger, 2025-07-29 A fascinating account of the use and meaning of visual and spatial distortions in seventeenth century art and architecture During the Catholic Reformation patrons artists architects and viewers especially in Rome were strongly drawn to visual and spatial distortions or deformations works of art and architecture that were designed to be visually incomprehensible at least initially From Borromini's San Carlo alle Quattro Fontane in Rome to the attention grabbing prospettiva in the city's Palazzo Spada and the anamorphoses that define the corridors and walls of Minim and Jesuit buildings The Deformation explores what this intriguing phenomenon reveals about contemporary religious belief optics and the natural sciences as well as wider questions about attention and discernment Failing to conform to an established ideal deformations required a reformation to achieve that ideal Anamorphic deformations for example could only be reformed into clarity when viewed from a particular angle or through a special mirror Susanna Berger examines how deformations were experienced by beholders and how they were embraced or opposed by critics The book shows how deformations and related works whether altar tabernacles ephemeral religious architecture churches monumental sundials colonnades with accelerated perspective illusionistic frescoes turned ivories or painted anamorphoses focused observers attention on theological mysteries and the social power and sophistication of patrons The book's rich illustrations include two gatefolds

and some anamorphic images that can be seen without distortion by using an included reflective insert as a mirror Looking at writings as well as visual works in multiple artistic media not typically considered in relation to each other The Deformation offers a new interpretation of deformation that highlights the delay between perception and discernment Susanna Berger is associate professor of art history and philosophy at the University of Southern California She is the author of The Art of Philosophy Visual Thinking in Europe from the Late Renaissance to the Early Enlightenment Princeton **Genetic**

Diversity and Erosion in Plants M.R. Ahuja, S. Mohan Jain, 2015-12-16 Genetic erosion is the loss of genetic diversity within a species It can happen very quickly due to catastrophic events or changes in land use leading to habitat loss But it can also occur more gradually and remain unnoticed for a long time One of the main causes of genetic erosion is the replacement of local varieties by modern varieties Other causes include environmental degradation urbanization and land clearing through deforestation and brush fires In order to conserve biodiversity in plants it is important to target three independent levels that include ecosystems species and genes Genetic diversity is important to a species fitness long term viability and ability to adapt to changing environmental conditions Chapters in this book are written by leading geneticists molecular biologists and other specialists on relevant topics on genetic erosion and conservation genetic diversity in plants This divisible set of two volumes deals with a broad spectrum of topics on genetic erosion and approaches to biodiversity conservation in crop plants and trees Volume 1 deals with indicators and prevention of genetic erosion while volume 2 covers genetic diversity and erosion in a number of plants species These two volumes will also be useful to botanists biotechnologists environmentalists policy makers conservationists and NGOs working to manage genetic erosion and biodiversity
