Robertson, 2000-08-01 For over seventy five years Word Pictures in the New Testament has been a cornerstone of Bible scholarship Now the classic six volume set has been condensed into a one volume edition to make in depth New Testament study accessible and enjoyable to a wider audience than ever Each New Testament book is carefully examined chapter by chapter and accompanied by the unique and unmistakable commentary of A T Robertson a leading authority on the Greek New Testament **The Indiscrete Image** Thomas A. Carlson, 2009-05-15 Humanity s creative capacity has never been more unsettling than it is at our current moment when it has ushered us into new technological worlds that challenge the very definition of the human Those anxious to safeguard the human against techno scientific threats often appeal to religious traditions to protect the place and dignity of the human But how well do we understand both theological tradition and today s technological culture In The Indiscrete Image Thomas A Carlson challenges our common ideas about both arguing instead that it may be humanity s final lack of definition that first enables and calls for human creativity and its correlates including technology tradition and their inextricable interplay within religious existence Framed in response to Martin Heidegger s influential account of the relation between technological modernity and theological tradition The Indiscrete Image builds an understanding of creativity as conditioned by insurmountable unknowing and incalculable possibility through alternative readings of Christian theological tradition and technological culture and the surprising resonance between these two Carlson concludes that the always ongoing work of world creation tied essentially to human self creation implies neither an idol s closure nor an icon s transcendence but the indiscrete image whose love makes possible by keeping open both the human and its world *The Complete Story of Civilization* Will Durant, 2014-01-21 The Complete Story of Civilization by Will Durant represents the most comprehensive attempt in our times to embrace the vast panorama of man s history and culture This eleven volume set includes Volume One Our Oriental Heritage Volume Two The Life of Greece Volume Three Caesar and Christ Volume Four The Age of Faith Volume Five The Renaissance Volume Six The Reformation Volume Seven The Age of Reason Begins Volume Eight The Age of Louis XIV Volume Nine The Age of Voltaire Volume Ten Rousseau and Revolution Volume Eleven The Age of Napoleon **The Big Picture** Sean Carroll, 2016-05-10 The instant New York Times bestseller

about humanity's place in the universe and how we understand it Vivid impressive Splendidly informative The New York Times Succeeds spectacularly Science A tour de force Salon Already internationally acclaimed for his elegant lucid writing on the most challenging notions in modern physics Sean Carroll is emerging as one of the greatest humanist thinkers of his generation as he brings his extraordinary intellect to bear not only on Higgs bosons and extra dimensions but now also on our deepest personal questions Where are we Who are we Are our emotions our beliefs and our hopes and dreams ultimately meaningless out there in the void Do human purpose and meaning fit into a scientific worldview In short chapters filled with intriguing historical anecdotes personal asides and rigorous exposition readers learn the difference between how the world works at the quantum level the cosmic level and the human level and then how each connects to the other Carroll's presentation of the principles that have guided the scientific revolution from Darwin and Einstein to the origins of life consciousness and the universe is dazzlingly unique Carroll shows how an avalanche of discoveries in the past few hundred years has changed our world and what really matters to us Our lives are dwarfed like never before by the immensity of space and time but they are redeemed by our capacity to comprehend it and give it meaning The Big Picture is an unprecedented scientific worldview a tour de force that will sit on shelves alongside the works of Stephen Hawking Carl Sagan Daniel Dennett and E O Wilson for years to come
