Passion For Life Psychology The Human:

Passion for Work Robert J. Vallerand, Nathalie Houliort, 2019-05-31 Passion is a pervasive concept in the work domain. Workers aspire to be passionate in the hope of finding meaning and satisfaction from their professional life while employers dream of passionate employees who will ensure organizational performance. Does passion for work matter? Does passion invariably bring about the anticipated positive outcomes or is there a darker side to passion for work that can also lead to negative outcomes for individuals and organizations? The goal of this book is to address these issues. This volume reviews major theories of work passion focusing specifically on the dominant theory, the Dualistic Model of Passion. This theory distinguishes between two types of passion: harmonious and obsessive, and their associated determinants and consequences. This volume provides a comprehensive understanding of passion for work by addressing the origin of the concept and its theoretical issues: how can passion for work be developed? what are the consequences to be expected at the individual and organizational levels? and how can passion for work shed new light on contemporary issues in the workplace? Passion for Work: Theory, Research, and Applications synthesizes a vast body of existing research in the area, provides insights into new and exciting research avenues, and explores how passion for work can be cultivated in work settings in order to fulfill both workers' and employers' hopes for a productive and satisfying work life.

Personality, Human Development, and Culture Ralf Schwarzer, Peter Frensch, 2010-06-17 Volumes 1 and 2 of the Invited Lectures present the main contributions from the 29th International Congress of Psychology held in Berlin in 2008.

Human Paleopsychology K. Bailey, 2013-08-21 First Published in 1986. In this book, the author seeks to demonstrate his belief that any credible view must grapple not only with human distinctiveness (e.g., learning capacity, language, rationality, and culture) but the dark sides of senseless violence and social disorder as well. Any such grappling with the dark side must necessarily confront our animal natures as well as our distinctly human natures.

Human Sexuality Ami Rokach, Karishma Patel, 2021-01-22 Human sexuality touches us all, pun intended. We all either enjoy it, struggle with it, or may have been victims of it. Sexuality is not just about sex but about human sexual function, the physiology of sex, the hormones involved, and how they affect us, and the cultural norms related to it. Sexual function and dysfunction are closely tied to one's self-esteem, self-respect, and to relationships with intimate partners. Human Sexuality: Function, Dysfunction, Paraphilias, and Relationships explores the interplay of intimacy and sexuality, how it can enhance relationships and how it can negatively affect them or be affected by them. When individuals or partners encounter sexual problems or dysfunctions, it can have a long-lasting affect both biologically and psychologically. Dr. Rokach explores the causes and the reasons that these dysfunctions are maintained and successful treatment methods. Chapters on sexual offenses and paraphilias and what treatment options are available to sexual offenders are also included. This book is the first book to place sexuality where it belongs within the context of relationships, demonstrating how sexuality relates to intimacy by both enhancing and negatively affecting it. Explains psychological, biological, and sociological theories of sexuality.

Addresses sexual dysfunctions according to various models of sex therapy Discusses the biological developmental and sociological theories of sexual orientation Explores the specific hormones in male and female sexual behavior

The Psychology of Passion Dr Robert J. Vallerand, 2015-05-01 Winner of the 2017 APA William James Book Award The concept of passion is one we regularly use to describe our interests and yet there is no broad theory that can explain the development and consequences of passion for activities across people's lives In *The Psychology of Passion* Robert J Vallerand presents the first such theory providing a complete presentation of the Dualistic Model of Passion and the empirical evidence that supports it Vallerand conceives of two types of passion harmonious passion which remains under the person's control and obsessive passion which controls the person While the first typically leads to adaptive behaviors the obsessive form of passion leads to less adaptive and at times maladaptive behaviors Vallerand highlights the effects of these two types of passion on a number of psychological phenomena such as cognition emotions performance relationships aggression and violence He also discusses the development of passion and reviews a range of literature on passion for activities

Passions of the Earth in Human Existence, Creativity, and Literature Anna-Teresa Tymieniecka, 2012-12-06 Literature reveals that the hidden strings of the human passional soul are the creative source of the specifically human existence Continuing the inquiry into the elemental passions of the soul and the Human Creative Soul pursued in several previous volumes of this series the present volume focuses on the passions of the earth bringing to light some of the primogenital existential threads of the innermost bonds of the Human Condition and mother earth In Tymieniecka's words the studies purpose to unravel the essential bond between the living human being and the earth a bond that lies at the heart of our existence A heightened awareness of this bond should enlighten our situation and help us find our existential bearings

Hume, Passion, and Action Elizabeth S. Radcliffe, 2018-05-30 David Hume's theory of action is well known for several provocative theses including that passion and reason cannot be opposed over the direction of action Elizabeth S Radcliffe defends an original

interpretation of Hume's views on passion, reason and motivation which is consistent with other theses in Hume's philosophy loyal to his texts and historically situated. She challenges the now orthodox interpretation of Hume on motivation presenting an alternative that situates Hume closer to Humeans than many recent interpreters have. Part of the strategy is to examine the thinking of the early modern intellectuals to whom Hume responds. Most of these thinkers insisted that passions lead us to pursue harmful objects unless regulated by reason and most regarded passions as representations of good and evil which can be false. Understanding Hume's response to these claims requires appreciating his respective characterizations of reason and passion. The author argues that Hume's thesis that reason is practically impotent apart from passion is about beliefs generated by reason rather than about the capacity of reason. Furthermore, the argument makes sense of Hume's sometimes ridiculed description of passions as original existences having no reference to objects. The author also shows how Hume understood morality as intrinsically motivating while holding that moral beliefs are not themselves motives and why he thought of passions as self-regulating contrary to the admonitions of the rationalists.

From Passions to Emotions Thomas Dixon, 2003-06-05 Today there is a thriving emotions industry to which philosophers, psychologists, and neuroscientists are contributing. Yet until two centuries ago, the emotions did not exist. In this path-breaking study, Thomas Dixon shows how during the nineteenth century the emotions came into being as a distinct psychological category, replacing existing categories such as appetites, passions, sentiments, and affections. By examining medieval and eighteenth-century theological psychologies and placing Charles Darwin and William James within a broader and more complex nineteenth-century setting, Thomas Dixon argues that this domination by one single descriptive category is not healthy. Overinclusivity of the emotions hampers attempts to argue with any subtlety about the enormous range of mental states and stances of which humans are capable. This book is an important contribution to the debate about emotion and rationality, which has preoccupied western thinkers throughout the eighteenth and nineteenth centuries and has implications for contemporary debates.

Passion for Life John James, Muriel James, 1992 The spiritual search is as much a part of being human as eating, sleeping, working, and playing, but all too often we try to limit it to an hour on Sunday or ignore it all together. Now comes a guide to tapping the inner powers we all possess by the coauthor of one of the most successful and inspiring

books ever published in the field Born to Win 76 photos and drawings On Compassion, Healing, Suffering, and the Purpose of the Emotional Life Susan Wessel,2020-04-30 Reading Augustine presents concise personal readings of St Augustine of Hippo from leading philosophers and religion scholars Augustine of Hippo knew that this fallen world is a place of sadness and suffering In such a world he determined that compassion is the most suitable and virtuous response Its transformative powers could be accessed through the mind and its memories through the healing of the Incarnation and through the discernment of Christians who are forced to navigate through a corrupt and deceptive world Susan Wessel considers Augustine s theology of compassion by examining his personal experience of loss and his reflections concerning individual and corporate suffering in the context of the human condition and salvation **The Life of Reason or The Phases of Human Progress, critical edition, Volume 7** George Santayana,2024-03-12 The final book in Santayana s masterwork of philosophical naturalism argues that science crowns the life of reason Santayana s Life of Reason published in five books from 1905 to 1906 ranks as one of the greatest works in modern philosophical naturalism Acknowledging the natural material bases of human life Santayana traces the development of the human capacity for appreciating and cultivating ideals It is a capacity he exhibits as he articulates a continuity running through animal impulse practical intelligence and ideal harmony in reason society art religion and science The work is an exquisitely rendered vision of human life lived sanely In this fifth book Santayana concludes his monumental work with a defense of science and a critique of major rivals to the cognitive ascendancy of science Indeed Santayana writes that science crowns the whole life of Reason He finds two kinds of science physics and dialectic considers the role of history examines the mechanisms of nature defends scientific psychology discusses pre rational morality rational ethics and post rational morality and argues that science contains all trustworthy knowledge This Critical Edition volume VII of The Works of George Santayana includes notes textual commentary lists of variants and emendations an index and other tools useful to Santayana scholars The other four books of the volume are Reason in Common Sense Reason in Society Reason in Religion and Reason in Art **Rewired** Paul N. Markham,2007-07-01 Rewired begins with the claim that contemporary views of Christian spirituality particularly in the American evangelical tradition concentrate too exclusively on the interior and individual nature of spiritual experience Paul Markham argues that a reexamination of the doctrine of religious conversion is needed within American evangelicalism and finds resources for such a model in the Wesleyan theological tradition and from philosophical and scientific insights into a nonreductive physicalist view of human nature In considering data from theology and science this book represents an integrated work in science and religion **C. G. Jung and the Alchemical Imagination** Stanton Marlan,2020-12-29 Winner of the 2021 American Board Academy of Psychoanalysis Annual Book Prize for Best Theoretical Book in Psychoanalysis Stanton Marlan brings together writings which span the course of his career examining Jungian psychology and the alchemical imagination as an opening to the mysteries of psyche and soul Several chapters describe a telos that aims

at the mysterious goal of the Philosophers Stone a move replete with classical and postmodern ideas catalysed by prompts from the unconscious dreams images fantasies and paradoxical conundrums Psyche and matter are seen with regards to soul light and darkness in terms of illumination and order and chaos as linked in the image of chaosmos Marlan explores the richness of the alchemical ideas of Carl Jung James Hillman and others and their value for a revisioning of psychology In doing so this volume challenges any tendency to literalism and essentialism and contributes to an integration between Jung's classical vision of a psychology of alchemy and Hillman's Alchemical Psychology C G Jung and the Alchemical Imagination will be a valuable resource for academics scholars and students of Jungian and post Jungian studies Jungian analysis and psychotherapy It will also be of great interest to Jungian psychologists and Jungian analysts in practice and in training

Herbert Spencer and the Invention of Modern Life Mark Francis, 2014-12-23 The English philosopher Herbert Spencer 1820-1903 was a colossus of the Victorian age His works ranked alongside those of Darwin and Marx in the development of disciplines as wide ranging as sociology anthropology political theory philosophy and psychology In this acclaimed study of Spencer the first for over thirty years and now available in paperback Mark Francis provides an authoritative and meticulously researched intellectual biography of this remarkable man that dispels the plethora of misinformation surrounding Spencer and shines new light on the broader cultural history of the nineteenth century In this major study of Spencer the first for over thirty years Mark Francis provides an authoritative and meticulously researched intellectual biography of this remarkable man Using archival material and contemporary printed sources Francis creates a fascinating portrait of a human being whose philosophical and scientific system was a unique attempt to explain modern life in all its biological psychological and sociological forms Herbert Spencer and the Invention of Modern Life fills what is perhaps the last big biographical gap in Victorian history An exceptional work of scholarship it not only dispels the plethora of misinformation surrounding Spencer but shines new light on the broader cultural history of the nineteenth century Elegantly written provocative and rich in insight it will be required reading for all students of the period *The Wisdom of Passion, Or, The Motives of Human Nature* Henry Guy Walters, 1901 **The Comedy of Human Life** Honoré de Balzac, 1901

Emotion and Cognitive Life in Medieval and Early Modern Philosophy Martin Pickavé, Lisa Shapiro, 2012-10-04 This volume offers a much needed shift of focus in the study of emotion in the history of philosophy Discussion has tended to focus on the moral relevance of emotions and except in ancient philosophy the role of emotions in cognitive life has received little attention Thirteen new essays investigate the continuities between medieval and early modern thinking about the emotions and open up a contemporary debate on the relationship between emotions cognition and reason and the way emotions figure in our own cognitive lives A team of leading philosophers of the medieval renaissance and early modern periods explore these ideas from the point of view of four key themes the situation of emotions within the human mind the intentionality of emotions and their role in cognition emotions and action the role of emotion in self understanding and the social situation of
