**Passions and Politics** Paul Ginsborg,Sergio Labate,2019-01-18 The dominant model of democratic politics emphasizes reason at the expense of the passions Passions have been treated as dangerous the opposite of reason and the enemy of virtue Paul Ginsborg and Sergio Labate challenge this model and put forward a very different view developing an account of modern democratic politics in which both passions and reason play a crucial role To do justice to the role of passions in politics we must pay close attention to the way in which they circulate among us then we must develop a suitable language to describe them an alphabet of the passions that enables us to understand how they combine with one another and connect with certain states of mind in order to shape political outcomes Adopting this approach enables the authors to shed new light on one of the major phenomena of our time the triumph of neoliberalism on a world scale Neoliberalism has worked so well because it has incorporated its own romantic and individualist version of the passions into its worldview seducing both individuals and families with the allure of consumption By developing a new model of democratic politics based on the interplay of passions and reason Ginsborg and Labate provide a much needed framework for understanding the crucial role that passions play in the unfolding of political life At a time when populist leaders are on the ascendancy and political processes are shaped as much by anger resentment and fear as they are by reason and argument this refocusing of political analysis on the role of the passions could not be more timely
