**Passion in Theory** Robin Ferrell, 2006-08-21 Philosophy had either ignored or attacked psychoanalysis such responses are neither warranted nor helpful One hundred years after its inception isn't it time to find out what psychoanalysis has to offer us In *Passion in Theory* Robyn Ferrell does just that and returns with some surprising answers Concentrating on the work of Freud and Lacan Robyn Ferrell asks why their work had been so influential in European philosophy yet so marginal in the Anglo American circles *Passion in Theory* explores their conception of the relationship between mind and body and how it provides a key to many current philosophical questions *Passion in Theory* is designed for students and researchers in psychoanalysis traditional and continental philosophy *The SAGE Handbook of Feminist Theory* Mary Evans, Clare Hemmings, Marsha Henry, Hazel Johnstone, Sumi Madhok, Ania Plomien, Sadie Wearing, 2014-08-12 At no point in recorded history has there been an absence of intense and heated discussion about the subject of how to conduct relations between women and men This Handbook provides a comprehensive guide to these omnipresent issues and debates mapping the present and future of thinking about feminist theory The chapters gathered here present the state of the art in scholarship in the field covering Epistemology and marginality Literary visual and cultural representations Sexuality Macro and microeconomics of gender Conflict and peace The most important consensus in this volume is that a central organizing tenet of feminism is its willingness to examine the ways in which gender and relations between women and men have been and are organized The authors bring a shared commitment to the critical appraisal of gender relations as well as a recognition that to think theoretically is not to detach concerns from lived experience but to extend the possibilities of understanding With this focus on theory and theorizing about the world in which we live this Handbook asks us across all disciplines and situations to abandon our taken for granted assumptions about the world and interrogate both the origin and the implications of our ideas about gender relations and feminism It is an essential reference work for advanced students and academics not only of feminist theory but of gender and sexuality across the humanities and social sciences ***The Cambridge Companion to Lacan*** Jean-Michel Rabaté, 2003-07-31 This collection of specially commissioned essays by academics and practising psychoanalysts first published in 2003 explores key dimensions of Jacques Lacan's life and works Lacan is renowned as a theoretician of psychoanalysis whose work is still influential in many countries He refashioned psychoanalysis in the name of philosophy and linguistics at the time when it underwent a certain intellectual decline Advocating a return to Freud by which he meant a close reading in the original of Freud's works he stressed the idea that the unconscious functions like a language All essays in this Companion focus on key terms in Lacan's often difficult and idiosyncratic developments of psychoanalysis This volume will bring fresh accessible perspectives to the work of this formidable and influential thinker These essays supported by a useful chronology and guide to further reading will prove invaluable to students and teachers alike ***The Mind's Affective Life*** Gemma Fiumara Corradi, 2014-06-11 *The Mind's Affective Life* is a refreshing and innovative

examination of the relationship between feeling and thinking Our thoughts and behaviour are shaped by both our emotions and reason yet until recently most of the literature analysing thought has concentrated largely on philosophical reasoning and neglected emotions This book is an original and provocative contribution to the rapidly growing literature on the neglected affective dimensions of modern thought The author draws on contemporary psychoanalysis philosophy feminist theory and recent innovations in neuroscience to argue that in order to understand thought we need to consider not only both emotional and rational aspects of thought but also the complex interactions between these different aspects Only through such a rich and complicated understanding of modern thought can we hope to avoid what the author identifies as a significant contemporary problems for individuals and cultures that is suppression or denial of intolerable states of feeling The *Mind's Affective Life* will appeal to and inspire students and practitioners of philosophy psychoanalysis psychotherapy and women's studies It will also be of great interest to anyone interested in the interaction of feeling and thinking

N. Trakakis, Lynda Burns, Steven Gardner, Fiona Leigh, 2011-02-22 Philosophy in both Australia and New Zealand has been experiencing for some time now something of a golden age exercising an influence in the global arena that is disproportionate to the population of the two countries To capture the distinctive and internationally recognised contributions Australasian philosophers have made to their discipline a series of public talks by leading Australasian philosophers was convened at various literary events and festivals across Australia and New Zealand from 2006 to 2009 These engaging and often entertaining talks attracted large audiences and covered diverse themes ranging from local histories of philosophy in particular the fortunes of philosophy in Melbourne Sydney Brisbane Adelaide and New Zealand to discussions of specific topics including love free will religion ecology feminism and civilisation especially as these have featured in the Australasian philosophy and to examinations of the intellectual state of universities in Australasia at the

representations of women reveal his concerns about the corruption of modern society **Poststructuralist Geographies**

Theory in the Prose of Cristina Peri Rossi examines three works of the contemporary Uruguayan author who lives in exile as she dialogues with the psychoanalytic discourse endemic to patriarchal society Peri Rossi s prose structured like unconscious productions that give free expression to desire and passion as emanating from the forbidden recesses of the psyche powerfully reveals the message as a treatment for an ill society The language in the three works studied facilitates and

reveals the male protagonist s interaction with the desired female object as a regression to a semiotic pre oedipal state in a type of return of the repressed of consuming desire that has been written out of mainstream patriarchy and that serves to challenge its rational symbolic order It is from this vantage point that the author attempts to re write the conclusions obtained through Lacanian and patriarchal discourse so that woman can emerge as a subject in her own right **The**

**Copula** Robyn Ferrell,2012-02-01 How will the ability to manipulate human reproduction change our social world and the relationship between the sexes Taking an explicitly interdisciplinary approach to gender and reproductive technology Robyn Ferrell examines this question in the light of feminist theories of sexual equality and sexual difference arguing that

technology itself can be seen as a kind of reproduction Invoking a concept of reproduction that understands it as generic Ferrell asserts that in any reproduction something is produced of a kind that was there before and yet that is also new Technology is therefore generically reproductive since it produces new matter of the same kind In addition to key figures in French feminism Ferrell draws from psychoanalysis and contemporary continental thinkers ranging from Heidegger to Haraway
