Isotopography Niels Wilde, 2024-08-19 While the concept of place remains undertheorized in Kierkegaard research this study argues that place is at the center of Kierkegaard's thinking The first part of the book shows that Kierkegaard's notion of situatedness as being placed in a socio historical situation conditioned by a situation prior to situatedness points to a realist position and a flat ontology Secondly the book develops a detailed analysis of the ontological structure of the existential place the place we ourselves are and concrete places the places where we are Place opens a qualified space within bounds the existence sphere an atmosphere of elemental attunement and attuned elementality Finally the book collects the dots from part one and two in a topological realist approach to Kierkegaard's theology and three main definitions of God God is love God is that everything is possible and God is the middle term The book concludes that Kierkegaard's existential topography reveals a realist position where we are is never exhausted by being the place where we are

Magic Ernesto de Martino, 2015-06-15 Though his work was little known outside Italian intellectual circles for most of the twentieth century anthropologist and historian of religions Ernesto de Martino is now recognized as one of the most original thinkers in the field This book is testament to de Martino's innovation and engagement with Hegelian historicism and phenomenology a work of ethnographic theory way ahead of its time This new translation of *Sud e Magia* his 1959 study of ceremonial magic and witchcraft in southern Italy shows how De Martino is not interested in the question of whether magic is rational or irrational but rather in why it came to be perceived as a problem of knowledge in the first place Setting his exploration within his wider pathbreaking theorization of ritual as well as in the context of his politically sensitive analysis of the global south's historical encounters with Western science he presents the development of magic and ritual in Enlightenment Naples as a paradigmatic example of the complex dynamics between dominant and subaltern cultures Far ahead of its time Magic is still relevant as anthropologists continue to wrestle with modernity's relationship with magical thinking

The Enchantments of Technology Lee Bailey,2010-10-01 In *The Enchantments of Technology* Lee Worth Bailey erases the conventional distinction between myth and machine in order to explore the passionate foundations concealed in technological culture and address its complex ethical moral and social implications Bailey argues that technological society does not simply disenchant the world with its reductive methods and mechanical metaphors then shape machines with political motives but is also borne by a deeper subversive undertow of enchantment Addressing examples to explore the complexities of these enchantments his thought is full of illuminating examinations of seductively engaging technologies ranging from the old camera obscura to new automobiles robots airplanes and spaceships This volume builds on the work of numerous scholars including Jacques Ellul and Jean Brun on the phenomenological and spiritual aspects of technology Carl Jung on the archetypal collective unconscious approach to myth and Martin Heidegger on Being itself Bailey creates a dynamic interdisciplinary postmodern examination of how our machines and their environments embody not only reason but also desires
