A Passion for Cultural Studies Ben Highmore, 2017-09-16 The culture that infiltrates our lives can provoke a range of feelings and afflictions culture can move you get under your skin and stir up your emotions Ben Highmore uses these feelings or passions to explore the culture that surrounds us and uses it as a basis to introduce and explain the key ideas debates and theories that are central to cultural studies Impressively accessible and packed with absorbing examples from everyday life this compact book is the ideal entry point into cultural studies The chapters examine problematic and complex issues that are core to cultural studies looking at the experience of migration the nature of the media the lure of commodities the world of taste and the culture of love Cleverly written in a way that is easy to follow and enjoyable to read the text gives a sense of the discipline as a way of thinking rather than an amalgamation of theories and whets the appetite of all those interested in cultural studies Whether you're a student who's new to the field or a seasoned scholar seeking a fresh idea about what cultural studies can do this clear and concise text encourages you to become truly passionate about cultural studies

Barrow, Jr.,2021-08-10 In the decades following the Civil War as industrialization urbanization and economic expansion increasingly reshaped the landscape many Americans began seeking adventure and aesthetic gratification through avian pursuits By the turn of the century hundreds of thousands of middle and upper class devotees were rushing to join Audubon societies purchase field guides and keep records of the species they encountered in the wild Mark Barrow vividly reconstructs this story not only through the experiences of birdwatchers collectors conservationists and taxidermists but also through those of a relatively

new breed of bird enthusiast the technically oriented ornithologist In exploring how ornithologists struggled to forge a discipline and profession amidst an explosion of popular interest in natural history *A Passion for Birds* provides the first book length history of American ornithology from the death of John James Audubon to the Second World War Barrow shows how efforts to form a scientific community distinct from popular birders met with only partial success The founding of the American Ornithologists Union in 1883 and the subsequent expansion of formal educational and employment opportunities in ornithology marked important milestones in this campaign Yet by the middle of the twentieth century when ornithology had finally achieved the status of a modern profession its practitioners remained dependent on the services of birdwatchers and other amateur enthusiasts Environmental issues also loom large in Barrow's account as he traces areas of both cooperation and conflict between ornithologists and wildlife conservationists Recounting a colorful story based on the interactions among a wide variety of bird lovers this book will interest historians of science environmental historians ornithologists birdwatchers and anyone curious about the historical roots of today's birding boom
