

Princes rule the people, and their own  
passions rule Princes; but Providence can  
over-rule the whole, and draw the  
instruments of his inscrutable purposes from  
the vices, no less than the virtues of Kings.

Charles Caleb Colton

**Freedom in French Enlightenment Thought** Mary Efrosini Gregory, 2010 Freedom in French Enlightenment Thought examines how five eighteenth century French theorists Montesquieu Diderot Rousseau Voltaire and Condorcet kindled the flame of freedom in America and France Each thinker laid down a building block that would eventually inspire the language in constitutions around the world They held that citizens have certain inalienable rights that are dictated by natural law and endowed to all by our Creator that these rights include equality before the law justice safety and security of persons and property and freedom of speech press assembly and religion Montesquieu recommended three separate branches of government that function independently of each other Diderot held that there is no true sovereign except the nation that there is no true legislator except the people Rousseau advised that the individual will must be subordinate to the general will and private interest to that of the community he warned against legislators who act from their own financial interests and enact laws to aggrandize themselves Voltaire believed that selfishness greed and the desire for luxury are not only part of human nature but that they compel people to achieve trade with others search explore and invent the passions are the engine that makes capitalism run and that stimulate all human endeavor Condorcet a champion of civil rights boldly proclaimed equality for women blacks and the poor The philosophes held that free and universal public education will permit more citizens to participate in the progress of the arts and sciences and will improve the standard of living among all strata of society An unrestrained press permits citizens to make informed decisions Their polemics have indeed changed the face of the world

**The Tory World** Jeremy Black, 2016-03-03 Political decisions are never taken in a vacuum but are shaped both by current events and historical context In other words long term developments and patterns in which the accumulated memory of what came earlier can greatly and sometimes subconsciously influence subsequent policy choices Working forward from the later seventeenth century this book explores the deep history of the changing and competing understandings within the Tory party of the role Britain has aspired to play on a world stage Conservatism has long been one of the major British political tendencies committed to the defence of established institutions with a strong sense of the national interest and embracing both liberal and authoritarian views of empire The Tory party has moreover at several times been deeply divided if not convulsed by different perspectives on Britain's international orientation and different positions on foreign and imperial policy Underlying Tory beliefs upon which views of Britain's global role were built were often not stated but assumed As a result they tend to be obscured from historical view This book seeks to recover and reconsider those beliefs and to understand how the Tory party has sought to navigate its way through the difficult pathways of foreign and imperial politics and why this determination outlasted Britain's rapid decolonisation and was apparently remarkably little affected by it With a supporting cast from Pitt to Disraeli Churchill to Thatcher the book provides a fascinating insight into the influence of history over politics Moreover it argues that there has been an inherent politicisation of the concept of national interests such that strategic culture and foreign policy cannot be understood other than in terms of a historically distorted political debate
