Past And Future People:

Genes And Future People Walter Glannon, 2018-03-05 Advances in genetic technology in general and medical genetics in particular will enable us to intervene in the process of human biological development which extends from zygotes and embryos to people. This will allow us to control to a great extent the identities and the length and quality of the lives of people who already exist as well as those we bring into existence in the near and distant future. *Genes and Future People* explores two general philosophical questions: one metaphysical, the other moral. 1. How do genes and different forms of genetic intervention (gene therapy, genetic enhancement, presymptomatic genetic testing of adults, genetic testing of preimplantation embryos) affect the identities of the people who already exist and those we bring into existence? 2. How do these interventions benefit or harm the people we cause to exist in the near future and those who will exist in the distant future by satisfying or defeating their interest in having reasonably long and disease-free lives? *Genes and Future People* begins by explaining the connection between genes and disease, placing genetics within a framework of evolutionary biology. It then discusses such topics as how genes and genetic intervention influence personal identity, what genetic testing of individuals and the knowledge resulting from it entails about responsibility to others who may be at risk, as well as how gene therapy and genetic enhancement can affect the identities of people and benefit or harm them. Furthermore, it discusses various moral aspects of cloning human beings and body parts. Finally, it explores the metaphysical and moral implications of genetic manipulation of the mechanisms of aging to extend the human life span. The aim of *Genes and Future People* is to move philosophers, bioethicists, and readers in general to reflect on the extent to which genes determine whether we are healthy or diseased, our identities as persons, the quality of our lives, and our moral obligations to future generations of people.

What We Owe to Future People Elizabeth Finneron-Burns, 2024 What do we owe future people? Intergenerational ethics is of great philosophical and practical importance given human beings' ability to affect not only the quality of life of future people but also how many of them there will be, if any at all. This book develops a distinctly contractualist answer to this question: we need to justify our actions to them on grounds they could not reasonably reject. The book explores what future people could or could not reasonably reject in terms of intergenerational resource distribution, individual procreative decisions, optimal population size, and risk imposition.

Catalyst One Robert E. Rushton, 2004 A matrix of Morality, wisdom, Philosophy, insights, Diplomatic cynicism, Common sense impressions, Whimsy, freak notions, Personal love relations, Societal love relations, War, Guerilla War, Assassinations, New political terminology and conceptions. And much more for you, the story maker, to ponder, extract, and catalyze into your very own story using your genius to flesh it out in your name, a legend of our time. Storysmiths will delight in the wisdom given in the various sections on love that may be extracted here from and fashioned into a story line. A refreshing change of outlook on this subject both from society's point of view and from the individual's intuitive instincts. The parabolic sections on Front Line War, Guerilla War, and Assassination will offer the story maker pause for

thought on these subjects The story maker s own abstraction and reworking of these new concepts will leave ample scope for metamorphosis into ones own powerful narrative The cynical section on diplomacy takes the subject to new horizons that will lead one from fresh works in this subject thus adding modern scope to those works of Michiavelli The story maker s extraction modification and reapplication of the various other sections of this work may possibly lead to new higher ground in plot constructs This book will both entertain and enlighten you A revolutionary and extraordinary book that crosses the boundaries of religion philosophy and intellectual thought with purity lucidity and protraction laid out in an order that allows full scope of craft a blueprint for your own book in word erection This book of parables venerates the probity of extraordinary events in the life and times of contemporary society and doings It validates and encourages responsibility for creating your own truly insightful work The book requires some effort in understanding fresh ground breaking concepts and thus willingness to learn and grasp new terminology

Justice to Future Generations and the Environment Hendrik Philip Visser 't Hooft,1999-06-30 This book contributes to the discussion about obligations to future generations by arguing that a principle of justice according to which we must share the environmental resources of the planet with future generations must be considered to be part of the just basic structure of society The argument is based on a close study of Rawls theory of justice and particularly of its treatment of the future generations issue But the author claims that the affirmation of a principle of justice towards future generations must be accompanied by the attempt to articulate the motives that shape a concern with the fate of future persons in the first place In order to consider and further its real chances we must put the perspective of justice between generations with its very detached character within the context of our view from the present such as it is situated in historical time This opens a fascinating but difficult field of inquiry about inter generational value and its different aspects Although it is centred on the theory of justice and on general ethics the

book also pays attention to the legal issues raised by the notion of a future oriented just basic structure of society

Temporal Asymmetries in Philosophy and Psychology Christoph Hoerl, Teresa McCormack, Alison Fernandes, 2022-02-24 Humans attitudes towards an event often vary depending on whether the event has already happened or has yet to take place The dread felt at the thought of a forthcoming exam turns into relief once it is over Recent research in psychology also shows that people value past events less than future ones such as offering less pay for work already carried out than for the same work to be carried out in the future This volume brings together philosophers and psychologists with a shared interest in such psychological past future asymmetries It asks questions such as What different kinds of psychological past future asymmetries are there and how are they related Under what conditions do humans exhibit them To what extent do they reflect features of time itself or particular beliefs people have about time Are they rational or at least rationally permissible or should we aspire to being temporally neutral What exactly does temporal neutrality consist of

Future Publics Michael K. MacKenzie, 2021-06-11 Scholars have often claimed that democracies whatever their virtues are functionally short sighted The evidence is clear we have been unable to manage many long term issues including climate change nuclear waste disposal natural disaster preparedness infrastructure maintenance and budget deficits If voters and influential actors such as interest groups and corporations have dominant short term interests it may be difficult for elected politicians to act in the long term interests of society even if they think that it would be the right thing to do To solve long term problems do we need political systems that are less democratic or even authoritarian This idea which Michael K MacKenzie calls the democratic myopia thesis is a sort of conventional wisdom it is an idea that scholars and pundits take for granted as a truth about democracy without subjecting it to adequate critical scrutiny In *Future Publics* MacKenzie challenges this conventional wisdom and articulates a deliberative democratic theory of future regarding collective action Specifically MacKenzie argues that each part of the democratic myopia problem can be addressed through democratic rather than authoritarian means At a more fundamental level once we recognize that democratic practices are world making activities that empower us to make our shared worlds together they should also be understood as future making activities Despite the short term dynamics associated with electoral democracy MacKenzie asserts that we need more inclusive and deliberative democracies if we are going to make shared futures that will work for us all

The Normative Status of Time Bias Kristie Miller, 2024-12-10 This book empirically investigates the nature of time biases Many philosophers think that it is rationally permissible to prefer a life that is overall worse to one that is overall better as long as the badness of that life lies in the past rather than the future These philosophers think that it is rationally permissible to be time biased Time biased individuals differently value the wellbeing of their various selves in virtue of where those selves are located in time This book focuses on three key kinds of time bias near present and future bias It presents a rich picture of the conditions under which we display these biases and it outlines several psychological explanations for them It then uses this new empirical research we conducted to inform arguments regarding the normative status of these biases At its heart it considers the question does having time biased preferences of one sort or another make us better off or worse off And it uses the

answers to these questions to inform our theorising about whether we have reason either to have or to avoid having such preferences

Politics of Time Leszek Koczanowicz, 2008-08-01 What has really happened in Poland since the election of 2005 After such spectacular events as the practice of lustration and the questioning of solidarity with the European Union one has to ask what is the nature of this newly emerging society As with many of the recent developments in former communist countries that seem to be mysterious and irrational the situation and ensuing problems are complex and the answers neither trivial nor easy This book by the distinguished Polish philosopher addresses these complexities through the role of the communist past in post communist Poland It describes the events that led to the collapse of the Solidarity program and the growing influence of the nationalistic and religious parties in the government The author investigates the nature of social and political temporality and develops a theoretical framework that allows him to apply his conclusions not only to Poland but also to other formerly communist countries
