prehistory **A Prehistory of Ordinary People** Monica L. Smith, 2021-11-23 For the past million years individuals have engaged in multitasking as they interact with the surrounding environment and with each other for the acquisition of daily necessities such as food and goods Although culture is often perceived as a collective process it is individual people who use language experience illness expend energy perceive landscapes and create memories These processes were sustained at the individual and household level from the time of the earliest social groups to the beginnings of settled agricultural communities and the eventual development of complex societies in the form of chiefdoms states and empires Even after the advent of civilization about 6 000 years ago human culture has for the most part been created and maintained not by the actions of elites as is commonly proclaimed by many archaeological theorists but by the many thousands of daily actions carried out by average citizens With this book Monica L. Smith examines how the archaeological record of ordinary objects used by ordinary people constitutes a manifestation of humankind's cognitive and social development A Prehistory of Ordinary People offers an impressive synthesis and accessible style that will appeal to archaeologists cultural anthropologists and others interested in the long history of human decision making

Ancient Pakistan - An Archaeological History Mukhtar Ahmed, 2014-05-29 Ancient Pakistan An Archaeological History deals with the prehistory of Pakistan from the Stone Age to the end of the Indus Civilization This particular volume The Stone Age concerns with the first appearance of man in northern Pakistan more than a million years ago and traces his cultural history up to the emergence of agriculture and sedentary living in this region The book is written for students of ancient history anthropology and archaeology The material is generously illustrated with a large number of maps tables drawings and colored photographs Each Section is provided with extensive references to the text and a comprehensive bibliography is provided for those who want to dig deeper into the subject Although the book primarily deals with the Greater Indus Valley its scope is much wider the subject has been discussed in context with the paleolithic of India Central Asia and Iran The story of human evolution provides a constant background

The Unfolding of Time Michael A. Susko, 2025-05-01 The Unfolding of Time A Logarithmic Model for Astronomical Biological and Cultural Evolution presents a unifying framework for understanding complexity across cosmic biological and cultural domains Rather than treating the history of the universe as a linear sequence of disconnected events this work proposes that major evolutionary thresholds from the formation of galaxies and rocky planets to the emergence of life and symbolic culture follow a rhythmic pattern when plotted on a logarithmic timescale Drawing on current astronomical research evolutionary biology and anthropological insight the model suggests that complexity emerges in distinct pulses each nested within a broader unfolding This interdisciplinary synthesis invites a rethinking of time's structure not as a flat continuum but as a layered rhythm of transformation The result is a compelling vision of the universe's evolution in which deep regularities shape the appearance of novelty across scales

Mythos & Symbolic Humanity Michael A. Susko, 2025-07-20 Mythos Symbolic Humanity presents an integrated literary scientific exploration of the emergence of

Ancient Near Eastern History and Culture William H. Stiebing Jr., 2016-07-01 This introduction to the Ancient Near East includes coverage of Egypt and a balance of political social and cultural coverage Organized by the periods kingdoms and empires generally used in Near Eastern political history the text interlaces social and cultural history with the political narrative This combination allows students to get a rounded introduction to the subject of Ancient Near Eastern history An emphasis on problems and areas of uncertainty helps students understand how evidence is used to create interpretations and allows them to realize that several different interpretations of the same evidence are possible This introduction to the Ancient Near East includes coverage of Egypt and a balance of political social and cultural coverage

The Past in Perspective Kenneth L. Feder, 2000 This engaging introduction to the human prehistoric past presents the chronicle of human physical and cultural evolution Rather than an encyclopedic all inclusive survey of the human evolutionary story this text presents human prehistory within a framework of themes issues and debates

Color Struck Julius O. Adekunle, Hettie V. Williams, 2010-02-24 Color Struck Essays of Race and Ethnicity in

Global Perspective is a compilation of expositions on race and ethnicity written from multiple disciplinary approaches including history sociology women s studies and anthropology This book is organized around a topical chronological framework and is divided into three sections beginning with the earliest times to the contemporary world The term race has nearly become synonymous with the word ethnicity given the most recent findings in the study of human genetics that have led to the mapping of human DNA Color Struck attempts to answer questions and provide scholarly insight into issues related to race and ethnicity

The Logarithmic Nature of Time Michael A. Susko, 2024-12-27 The two works collated here encompass a vast time from the start of life until the dawn to what we refer to as civilization In the first volume a consistent logarithmic pulsing was found in biological evolution from life s beginning to the first humans The evidence for these first ten nodes was primarily fossils or other life signatures in a given setting The second volume continues the logarithmic patterning with human evolution even after the change is primarily occurring in the symbolic domain Here the evidence increasingly becomes geometric objects fashioned by humans which became tools and symbols as well as red ochre used to decorate and signify a charged object for use in ritual Basically what we mean by logarithmic patterning is that we are halving the units from the past to the future such as 4 Gyr to 2 Gyr to 1 Gyr billions of years then moving on to 500 Myr 250 Myr and on millions of years Here a base two with exponents were used to half units and identify more refined points What we consistently found was evidence for increasingly complexity an acceleration of events logarithmically such that Major Change kept happening in less time or more precisely half the time as the previous change That means that change occurred in pulsed logarithmic intervals I have attempted to why this happens but that is better left for another work For now we leave this task largely to readers to wonder about and make their own theories We will however take on the humble and diligent task of assembling the evidence and ordering it on a logarithmic scale Such as a scale can be updated and I have begun some of that process What I found was that new evidence surfacing was increasingly confirming of the logarithmic structuring outlined here We will let you judge yourself as to how sufficient the evidence is and what that might say about the universe It is an exciting process and one which can only be in process to be continually updated and refined by others such as yourself Let us then discover together

Encyclopedia of Dubious Archaeology Kenneth L. Feder, 2010-10-11 This book provides a fascinating encyclopedic antidote for the mysticism and pseudoscience surrounding well known or highly publicized archaeological and anthropological discoveries Archaeology attempts to answer the question where do we come from in the broadest sense possible as a result it is a highly interesting topic for all mankind When did human beings first walk the earth How did civilization develop What compelled our human ancestors to build things like the pyramids the Great Sphinx or Monk s Mound This book presents the widely unknown scientific facts behind the most popular and enthralling mysteries of our world from an expert archaeological perspective and lays out the information and research in a manner that is approachable engaging and entertaining for any reader Encyclopedia of Dubious Archaeology From Atlantis to the Walam

Olum contains detailed and highly descriptive definitions for and explanations of terms related to extraordinary claims about human antiquity and its study. Some of the terms in this extensive list of topics relate to archaeological hoaxes. Many of the entries relate to dubious interpretations of the human past; some of the terms relate to far-fetched arguments that actually have produced evidence in support of their veracity. **Bioarchaeologists Speak Out** Jane E. Buikstra, 2018-10-26

Bioarchaeologists who study human remains in ancient, historic, and contemporary settings are securely anchored within anthropology as anthropologists, yet they have not taken on the punditry the way other subdisciplines within anthropology have. Popular science authors frequently and selectively use bioarchaeological data on demography, disease, violence, migration, and diet to buttress their poorly formed arguments about general trends in human behavior and health beginning with our earliest ancestors. While bioarchaeologists are experts on these subjects, bioarchaeology and bioarchaeological approaches have largely remained invisible to the public eye. Current issues such as climate change, droughts, warfare, violence, famine, and the effects of disease are media mainstays and are subjects familiar to bioarchaeologists, many of whom have empirical data and informed viewpoints both for topical exploration and also for predictions based on human behavior in deep time. The contributions in this volume will explore the how and where the data has been misused, present new ways of using evidence in the service of making new discoveries, and demonstrate ways that our long-term interdisciplinarity lends itself to transdisciplinary wisdom. We also consider possible reasons for bioarchaeological invisibility and offer advice concerning the absolute necessity of bioarchaeologists speaking out through social media. *Ten Nodes of Symbolizing*

Humanity Michael A. Susko, 2024-09-06 *Ten Nodes of Symbolizing Humanity* applies a scientific model of logarithmic time to human cultural evolution, charting how symbolic capacity unfolded in distinct, accelerating stages over the last 8 million years. Beginning with the first hominins and culminating near the rise of civilization, this work identifies ten major nodes of symbolic emergence, from habitual bipedalism and the earliest stone tools to abstract image making and burial of the dead. Each node is supported by archaeological and paleontological evidence and interpreted through a framework of logarithmic halving, revealing a patterned pulse of cultural and cognitive breakthroughs. This study proposes that symbolic behavior evolved in tandem with biological change and was central to the human lineage. Bridging anthropology, evolutionary theory, and systems modeling, this work invites renewed scientific inquiry into the rhythmic structure of human evolution. **Native**

American Archaeology in the Parks Kenneth L. Feder, 2023-01-09 Historian Wallace Stegner characterized America's National Park system as the best idea we ever had. One can quibble with that, but indeed it was a pretty good idea. This book specifically is a guide and a celebration of 30 of those national parks, national historical parks, and national monuments that each in its own way reveals the histories and cultures of America's first inhabitants, the Native Americans. Its pages will take you to great mounds in Ohio where the dead were laid to rest in sumptuous splendor 2,000 years ago; a place in Iowa where 1,000 years ago Native Americans sculpted earth into the forms of giant bears and birds; a quarry in Minnesota where Native
