Past Futures:

Contemporary Discourses in Social Exclusion Aminkeng A. Alemanji, Clara Marlijn Meijer, Martins Kwazema, Francis Ethelbert Kwabena Benyah, 2023-01-01 This book looks into different forms of social exclusion in different societies or contexts It is important to note that in some cases social exclusion is fueled by the deprivation of economic resources political and social rights In contrast social constructs or cultural norms constitute significant factors in other cases At the subject macro level this book opens up an avenue where researchers from different subjects can look into how central issues of their subject can be understood through the lenses of social exclusion For example historical perspectives of social exclusion sociological perspectives of social exclusion religiosity and social exclusion gender perspectives of social exclusion educational perspectives of social exclusion etc At the thematic micro level this book looks into how specific themes like racism the corona virus pandemic albinism media sexuality and gender intersect with social exclusion In doing all these the book also provides a much needed multidisciplinary and methodological understanding of issues of social exclusion

Understanding Naturalism Jack Ritchie, 2014-12-05 Many contemporary Anglo American philosophers describe themselves as naturalists But what do they mean by that term Popular naturalist slogans like there is no first philosophy or philosophy is continuous with the natural sciences are far from illuminating Understanding Naturalism provides a clear and readable survey of the main strands in recent naturalist thought The origin and development of naturalist ideas in epistemology metaphysics and semantics is explained through the works of Quine Goldman Kuhn Chalmers Papineau Millikan and others The most common objections to the naturalist project that it involves a change of subject and fails to engage with real philosophical problems that it is self refuting and that naturalism cannot deal with normative notions like truth justification and meaning are all discussed Understanding Naturalism distinguishes two strands of naturalist thinking the constructive and the deflationary and explains how this distinction can invigorate naturalism and the future of philosophical research

The Anthem Companion to Maurice Halbwachs Robert Leroux, Jean-Christophe Marcel, 2021-07-06 This book seeks to place Halbwachs in his historical and intellectual context showing that his work was sensitive to the events of his time and that the development of his analysis could be influenced by happenstance The book does this not by summarizing or synthesizing his thinking by the growing literature embodied by many sociologists and historians of social sciences published for the most part in scientific journals that focus on the sociological thought that Halbwachs developed in his writings Then come many studies that emerge from the history of ideas and epistemology these are entirely devoted to a particular facet of Halbwachs work either to place it in its scientific context or to discuss it on the basis of fundamental cognitive issues

An Introduction to Philosophical Analysis John Hospers, 1967 This book provides an in depth problem oriented introduction to philosophical analysis using an extremely clear readable approach The Fourth Edition does not only update coverage throughout the book but also restores the introductory chapter Words and the World the most distinguished

widely acclaimed feature of the first two editions The Problems of Philosophy Bertrand Russell,1924 *The Problems of Philosophy* Bertrand Russell,2015-02-24 Bertrand Russell's classic primer on Western philosophy and the greatest thinkers of the past three millennia With zest and rigor Bertrand Russell applies twentieth century thinking to age old philosophy from the works of Plato and Aristotle to those of Ren Descartes and John Locke In *The Problems of Philosophy* he reviews the Western canon's most influential ideas and thought experiments offering a comprehensive and enlightening text for curious and seasoned philosophy readers alike Infused with Russell's own observations and critiques this study offers reviews of topics such as idealism knowledge and the natures of truth reality and existence Including the author's prominent thinking on knowledge by acquaintance versus knowledge by description *The Problems of Philosophy* is a critical look at the major philosophical accomplishments spanning from classical Greece to the twentieth century This ebook has been professionally proofread to ensure accuracy and readability on all devices **Visions of the Future in Roman Frontier Kingdoms 100**

BCE-100 CE Richard Teverson,2024-09-03 This is the first book length exploration of the ways art from the edges of the Roman Empire represented the future examining visual representations of time and the role of artwork in Roman imperial systems This book focuses on four kingdoms from across the empire Cottius's Alpine kingdom in the north King Juba II's Mauretania in the south west Herodian Judea in the east and Kommagene to the north east Art from the imperial frontier is rarely considered through the lens of the aesthetics of time and Roman provincial art and the monuments of allied rulers are typically interpreted as evidence of the interaction between Roman and local identities In this interdisciplinary study which explores statues wall paintings coins monuments and inscriptions readers learn that these artworks served as something more they were created to represent the futures that allied rulers and their people foresaw The pressure of Roman imperialism drove patrons and artists on the empire's borders to imbue their creations with increasingly sophisticated ideas about the future as they wrestled with consequential decisions made under periods of intense political pressure Comprehensively illustrated and providing an important new approach to Roman material culture at the edge of empire *Visions of the Future in Roman Frontier Kingdoms 100 BCE 100 CE* is suitable for students and scholars working on Rome and its frontiers as well as Roman material culture more broadly and those studying the aesthetics of time in art and art history Staging the Promises Deana Jovanović,2025-01-15 *Staging the Promises* reveals how inhabitants of Bor a Serbian copper processing and mining town that lived through prosperous Yugoslav times and a post socialist decline were the audience theatrically performed promises of aspirational futures Deana Jovanovi chronicles the efforts of the copper processing company and the town's authorities to theatrically perform promises of better economic urban environmental infrastructural and post industrial futures Her book asks What impact did the staging of promises have on the residents What temporal material and political effects did these performances generate How did they shape the citizens futures and their present Jovanovi offers many ethnographic examples of ambivalence in people's orientation to their futures while residents

balanced hope with despair disillusionment and dismay Staging the Promises highlights how the performances shaped the present and how in a Gramscian twist they sustained hope alongside power dynamics that residents often criticized Staging the Promises assesses the performative ways through which contemporary capitalist futures are remade For Jovanovi Bor represents a site that reflects a current global trend staging the promises of enhanced futures today play a significant role in contemporary populist politics Through them she argues distant futures become gradually withdrawn from people s horizons

Working with Time in Qualitative Research Keri Facer,Johan Siebers,Bradon Smith,2021-12-30 This collection brings together researchers and scholars from across the Arts Humanities and Social Sciences who are actively exploring the many different ways in which time might be understood imagined and used in qualitative research Taken together the contributions begin to trace the contours of what it might mean to work reflexively with time as an epistemologically constitutive element of research design The book explores how the choice to work with pasts or futures with speed or delay with clocks or the time of the body with utopias or failed futures among other things reframe how social and cultural phenomena are perceived and brought into existence in qualitative research Drawing on fields as disparate as futures studies and history literary analysis and urban design utopian studies and science and technology studies this collection serves as a resource for both new and experienced researchers in the humanities and social sciences It is a critically important resource for beginning to explore the wide repertoire of theoretical and methodological tools for working with time in the research process The book also draws attention to the way that institutional research timescapes from university workload patterns to funding processes and project timescales themselves shape how and what it is possible to know in and about the world It concludes with a rousing manifesto for scholars and researchers proposing 10 key attributes of temporally reflexive research

Subjective Lives and Economic Transformations in Mongolia Rebecca M. Empson,2020-06-01 Almost 10 years ago the mineral rich country of Mongolia experienced very rapid economic growth fuelled by China s need for coal and copper New subjects buildings and businesses flourished and future dreams were imagined and hoped for This period of growth is however now over Mongolia is instead facing high levels of public and private debt conflicts over land and sovereignty and a changed political climate that threatens its fragile democratic institutions Subjective Lives and Economic Transformations in Mongolia details this complex story through the intimate lives of five women Building on long term friendships which span over 20 years Rebecca documents their personal journeys in an ever shifting landscape She reveals how these women use experiences of living a life in the gap to survive the hard reality between desired outcomes and their actual daily lives In doing so she offers a completely different picture from that presented by economists and statisticians of what it is like to live in this fluctuating extractive economy

Nostalgia, Religion and Popular Culture Chris Deacy,2025-01-09 Drawing on the event of Queen Elizabeth II s death in 2022 as a central case study this book explores the way we navigate the relationship between nostalgia and religion Focusing on the lived experiences of ordinary people and in tandem with the turn to the self

discourse Deacy suggests that our relationship with nostalgia illustrates the shift from objective and transcendent value systems towards the domain of everyday experience love and loss This book revisits the way we understand religion and the secular using the medium of popular culture such as radio film TV and music to interrogate the nostalgia as religion narrative The interpersonal and social elements of nostalgia are explored such as through the way radio fostered virtual communities and played a key role regarding national religious and cultural memory during the mourning of the Queen Attention is given to how nostalgia has evolved over time and how it can be understood as a religious process which transforms our lives at a time of loss and contributes to an eschatological future On Metaphoring Wu,2022-05-20

On Metaphoring engages in a metaphor way to communicate and inter learn among cultures Bundle A describes how metaphor bundles things similar into a group called a notion a category etc How does metaphor bundle things It familiarizes strange things with things that are familiar to enrich old familiar things with new things newly made familiar Such metaphoric bundling creates a new family of knowledge In this order Bundle B characterizes metaphor as the origin of thinking fit as a highway of intercultural communication where there is no shared way of thinking for each culture is a specific way of thinking Bundle C shows how effective metaphor is in interculturality handling various problems of life and thinking How metaphor works to intercultural exhibits in fact what metaphor is Such is how cultures understand one another a cultural hermetic *The Semantics of the Future* , **The Imperatives of Urban and Regional Planning** Anis Ur Rahmaan,2011-08-18

This book is comprised of articles and papers that have come about after years of academic and applied research endeavors of the practitioners and academicians in the field of urban and regional development planning Most of these articles have already been presented and deliberated in national and international conferences held in different parts of the world namely Indianapolis Newcastle upon Tyne Rome Istanbul Cairo Alexandria Vienna Stockholm Jeddah Riyadh Jubail Islamabad Penang and Bandung The concepts and case studies described in this book bring home the fact that the world is undergoing a gyrational transition Not only are developed and developing countries getting influenced by each other and transforming due to a process of circular causation but each of the two sets of countries are also undergoing a simultaneous internal transformation due to the differential infusion of technology and indigenous entrepreneurship As a consequence highly diversified urban systems are getting integrated interactively leading to the formation of a global village and achievement of a unity in diversity **Mobilities,**

Literature, Culture Marian Aguiar,Charlotte Mathieson,Lynne Pearce,2019-09-25 This is the first book dedicated to literary and cultural scholars engagement with mobilities scholarship As such the volume both advances new theoretical approaches to the study of culture and furthers the recent humanities turn in mobilities studies The book s scholarship is deeply informed by cultural geography s vision of a mobilised reconceptualisation of space and place but also by the contribution of literary scholars in articulating questions of travel technologies of transport post colonialism and migration through a close engagement with textual materials A comprehensive introduction maps pre histories and emerging directions of this exciting

interdisciplinary endeavor while taking up the theoretical and methodological challenges of the burgeoning subfield Contributions range across geographical and disciplinary boundaries to address questions of embodied subjectivities mobility and the nation geopolitics of migration and mobilities futures , The Basic Writings of Bertrand Russell Bertrand Russell,2009-03-04 Featuring seminal work in the philosophies of mathematics and language this comprehensive and assiduously edited collection also makes available his provocative and controversial views on religion and international relations **Models of Decision-Making** Paul Weirich,2015 This book explains and justifies efficient general methods of making decisions and will guide practical efforts to streamline rational choice **What is the Future?** John Urry,2016-09-06 Thinking about the future is essential for almost all organizations and societies States corporations universities cities NGOs and individuals believe they cannot miss the future But what exactly is the future It remains a mystery perhaps the greatest mystery especially because futures are unpredictable and often unknowable the outcome of many factors known and unknown The future is rarely a simple extrapolation from the present In this important book John Urry seeks to capture the many efforts that have been made to anticipate visualize and elaborate the future This includes examining the methods used to model the future from those of the RAND Corporation to imagined future worlds in philosophy literature art film TV and computer games He shows that futures are often contested and saturated with different interests especially in relation to future generations He also shows how analyses of social institutions practices and lives should be central to examining potential futures and issues such as who owns the future The future seems to be characterized by wicked problems There are multiple causes and solutions long term lock ins and complex interdependencies and different social groups have radically different frames for understanding what is at stake Urry explores these issues through case studies of 3D printing and the future of manufacturing mobilities in the city and the futures of energy and climate change *Problems of Philosophy* ,1973
