Places Through the Body Heidi J. Nast, Steve Pile, 1998 This exciting collection opens up many new conversations on BodyPlace and introduces new theories of embodied places and the placing of bodies Extensive introductory and concluding sections guide students through the key debates and themes Places Through the Body draws on a wide range of contemporary examples and creative ideas to address such topics as How racist ideologies are embedded in modern architectural discourse and practice How urban spaces make bodies disabled How the seemingly virtual worlds of knowledge and technology are embodied How gyms enable women body builders to make new kinds of bodies How male bodies are placed onto the silver screen New kinds of femininity Here geographers architects anthropologists artists film theorists theorists of cultural studies and psycho analysis work alongside each other to make clear connections between bodies and places

The Water Footprint of Modern Consumer Society Arjen Y. Hoekstra, 2019-06-28 Using the water footprint concept this impactful book aids our understanding of how we can reduce water consumption and pollution to sustainable levels Since the publication of the first edition the question of how to reduce our water footprint has become even more urgent Freshwater scarcity is increasingly perceived as a global systemic risk and overconsumption of water is widespread The water footprint a concept founded by the author is an indicator of direct and indirect freshwater use by a consumer or producer that can be used to analyze water usage along supply chains and assess the sustainability efficiency and fairness of our water use This new edition is fully revised and updated to reflect continued developments in this rapidly growing field of knowledge New chapters are added covering the history of the water footprint concept the environmental footprint of the human species versus planetary boundaries and the human right to water as a foundation to equitable sharing All other chapters are fully revised with new findings applications and references including major new research on energy vegetarian diets and intelligent water allocation over competing demands The Water Footprint of Modern Consumer Society is a key textbook for students of interdisciplinary water studies and those taking other related courses within the environmental sciences It will also be of interest to those working in the governmental sector environmental and consumer organizations the business sector and UN institutions where there is growing interest in the water footprint concept
