Pastoral Cities Urban Ideals And The Symbolic Landscape Of America:

Pastoral Cities James L. Machor, 1987 What has the city meant to Americans James L Machor explores this question in a provocative analysis of American responses to urbanization in the context of the culture's tendency to valorize nature and the rural world Although much attention has been paid to American rural urban relations Machor focuses on a dimension largely overlooked by those seeking to explain American conceptions of the city While urban historians and literary critics have explicitly or implicitly emphasized the opposition between urban and rural sensibilities in America an equally important feature of American thought and writing has been the widespread interest in collapsing that division Convinced that the native landscape has offered special opportunities Americans since the age of settlement have sought to build a harmonious urban pastoral society combining the best of both worlds Moreover this goal has gone largely unchallenged in the culture except for the sophisticated responses in the writings of some of America's most eminent literary artists Pastoral Cities explains the development of urban pastoralism from its origins in the prophetic vision of the New Jerusalem applied to America in the sixteenth and seventeenth centuries through its secularization in the urban planning and reform of the 1800s Machor critiques the sophisticated treatment of urban pastoralism by writers such as Emerson Whitman Hawthorne Wharton and James by skillfully combining cultural analysis with a close reading of urban plans travel narratives sermons and popular novels The product of this multifaceted approach is an analysis that works to reveal both the strengths and weaknesses of the pastoral ideal as cultural mythology

Landscapes of Desire William Alexander McClung, 2002-05-31 An imaginative and provocative interpretation of the meaning of Los Angeles carefully thought out and beautifully written Robert Winter editor of *Toward a Simpler Way of Life* The Arts and Crafts Architects of California McClung's sharp eye and his ability to be both critic and analyst combine to make this a book of real timeliness It is unusual and it is smart William Deverell author of *Railroad Crossing Californians and the Railroad 1850-1910*

City of Refuge Michael J. Lewis, 2016-11-14 A fascinating exploration of the urbanism at the heart of Utopian thinking The vision of Utopia obsessed the nineteenth century mind shaping art literature and especially town planning In *City of Refuge* Michael Lewis takes readers across centuries and continents to show how Utopian town planning produced a distinctive type of settlement characterized by its square plan collective ownership of properties and communal dormitories Some of these settlements were sanctuaries from religious persecution like those of the German Rappites French Huguenots and American Shakers while others were sanctuaries from the Industrial Revolution like those imagined by Charles Fourier Robert Owen and other Utopian visionaries Because of their differences in ideology and theology these settlements have traditionally been viewed separately but Lewis shows how they are part of a continuous intellectual tradition that stretches from the early Protestant Reformation into modern times Through close readings of architectural plans and archival documents many previously unpublished he shows the network of connections between these seemingly disparate Utopian settlements including even such well known town

plans as those of New Haven and Philadelphia The most remarkable aspect of the city of refuge is the inventive way it fused its eclectic sources ranging from the encampments of the ancient Israelites as described in the Bible to the detailed social program of Thomas More's Utopia to modern thought about education science and technology Delving into the historical evolution and antecedents of Utopian towns and cities City of Refuge alters notions of what a Utopian community can and should be

Blake and the City Jennifer Davis Michael, 2006 Though usually classified as a Romantic Blake subverts and dissolves the binaries on which Romanticism turns self and other art and nature country and city Rather than reject the city outright like many of his contemporaries Blake embraces it as the intricate workshop of human imagination Each chapter of this book focuses on a specific text of Blake's that illustrates a particular conception of metaphorical embodiment of the city These shifting metaphors emphasize the construction of all human environments and the need for imaginative labor to build and interpret them This study seeks to bridge a gap between transcendent and historicist readings of Blake while at the same time challenging assumptions that still color our view of the city in the twenty first century Jennifer Davis Michael is Associate Professor of English at the University of the South

Interpreting Environments Robert Mugerauer, 2014-10-14 In this pioneering book Robert Mugerauer seeks to make deconstruction and hermeneutics accessible to people in the environmental disciplines including architecture planning urban studies environmental studies and cultural geography Mugerauer demonstrates each methodology through a case study The first study uses the traditional approach to recover the meaning of Jung's and Wittgenstein's houses by analyzing

their historical intentional contexts The second case study utilizes deconstruction to explore Egyptian French neoclassical and postmodern attempts to use pyramids to constitute a sense of lasting presence And the third case study employs hermeneutics to reveal how the American understanding of the natural landscape has evolved from religious to secular to ecological since the nineteenth century *The Environmental Imagination* Lawrence Buell,1995 With Thoreau's *Walden* as a touchstone Buell offers an account of environmental perception the place of nature in the history of Western thought and the consequences for literary scholarship of attempting to imagine a more ecocentric way of being In doing so he provides a profound rethinking of our literary and cultural reflections on nature **Modernism in the Green** Julia E. Daniel,Margaret Konkol,2020-04-15 *Modernism in the Green* traces a trans Atlantic modernist fascination with the creation use and representation of the modern green From the verdant public commons in the heart of cities to the lookout points on mountains in national parks planned green spaces serve as felicitous stages for the performance of modernism In its focus on designed and public green zones *Modernism in the Green* offers a new perspective on modernism's overlapping investments in the arts politics urbanism race class gender and the nature culture divide This collection of essays is the first to explore the prominent and diverse ways greens materialize in modern literature and culture along with the manner in which modernists represented them This volume presents the idea of the green as a point of exploration as our contributors analyze social organic spaces ranging from public parks to roadways and refuse piles Like the term green one that evokes both more than human natural zones and crafted public meeting places these chapters uncover the social and spatial intersection of nature and culture in the very architecture of parks gardens buildings highways and dumps This book argues that such greens facilitate modernists' exploration of how nature can manifest in an era of increasing urbanization and mechanization and what identities and communities the green now enables or prevents **American Studies** Jack Salzman,1990-05-25 This volume supplements the acclaimed three volume set published in 1986 and consists of an annotated listing of American Studies monographs published between 1984 and 1988 There are more than 6 000 descriptive entries in a wide range of categories anthropology and folklore art and architecture history literature music political science popular culture psychology religion science and technology and sociology **After the Siege** Jacqueline Barbara Carr,2005 During the late 1770s Boston's townspeople were struggling to rebuild a community devastated by British occupation the ensuing siege by the Continental Army and the Revolutionary war years After the British attacked Lexington and Concord on April 19 1775 Boston's population plummeted from 15 000 civilians to less than 3 000 property was destroyed and plundered and the economy was on the verge of collapse How the once thriving colonial seaport and its demoralized inhabitants recovered in the wake of such demographic physical and economic ruin is the subject of this compelling and well researched work Drawing on extensive primary sources including ward tax assessors' Taking Books church records census records birth and marriage records newspaper accounts and town directories Jacqueline Barbara Carr brings to life Boston's remarkable
