Patches Of Fire:

Patches of Fire Albert French, 1997 *Patches of Fire* is the story of a young man's encounter with a war and with deaths beyond his understanding of his return to a country torn by racial unrest in the wake of the assassination of Martin Luther King Jr and of his painstaking efforts to defeat his inner demons and make a place for himself as a black man in white America With a starkness tempered by humor French brings to life the horrors of Vietnam and recounts in compelling detail his uneasy tenure as a newspaper photographer his heady days as publisher of his own magazine his confrontations with the ghostly images of Vietnam that haunted his dreams and the sense of renewal and purpose he achieved as a novelist The very personal story of French's trials and triumphs *Patches of Fire* is also a revealing exploration of the black soldier's experience in Vietnam the plight of the Vietnam veteran and the redemptive power of writing BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved [Eldorado National Forest \(N.F.\), Power Fire Restoration](#)

,2005 **The Ecological Importance of Mixed-Severity Fires** Dominick A. DellaSala, Chad Hanson, 2015-06-08 The Ecological Importance of High Severity Fires presents information on the current paradigm shift in the way people think about wildfire and ecosystems While much of the current forest management in fire adapted ecosystems especially forests is focused on fire prevention and suppression little has been reported on the ecological role of fire and nothing has been presented on the importance of high severity fire with regards to the maintenance of native biodiversity and fire dependent ecosystems and species This text fills that void providing a comprehensive reference for documenting and synthesizing fire's ecological role Offers the first reference written on mixed and high severity fires and their relevance for biodiversity Contains a broad synthesis of the ecology of mixed and high severity fires covering such topics as vegetation birds mammals insects aquatics and management actions Explores the conservation vs public controversy issues around megafires in a rapidly warming world [Fire Science](#) Francisco Castro Rego, Penelope Morgan, Paulo Fernandes, Chad Hoffman, 2021-09-24 This textbook provides students and academics with a conceptual understanding of fire behavior and fire effects on people and ecosystems to support effective integrated fire management Through case studies interactive spreadsheets programmed with equations and graphics and clear explanations the book provides undergraduate graduate and professional readers with a straightforward learning path The authors draw from years of experience in successfully teaching fundamental concepts and applications synthesizing cutting edge science and applying lessons learned from fire practitioners We discuss fire as part of environmental and human health Our process based comprehensive and quantitative approach encompasses combustion and heat transfer and fire effects on people plants soils and animals in forest grassland and woodland ecosystems from around the Earth Case studies and examples link fundamental concepts to local landscape and global fire implications including social ecological systems Globally fire science and integrated fire management have made major strides in the last few decades Society faces numerous fire related challenges including the increasing occurrence of large fires that threaten

people and property smoke that poses a health hazard and lengthening fire seasons worldwide Fires are useful to suppress fires conserve wildlife and habitat enhance livestock grazing manage fuels and in ecological restoration Understanding fire science is critical to forecasting the implication of global change for fires and their effects Increasing the positive effects of fire fuels reduction enhanced habitat for many plants and animals ecosystem services increased while reducing the negative impacts of fires loss of human lives smoke and carbon emissions that threaten health etc is part of making fires good servants rather than bad masters
