*On the Margins of Japanese Society* Carolyn S. Stevens, 2003-09-02 The popular perception of Japanese society is that it possesses a homogeneity and cultural conformity unlike anything to be found in the West. In fact, Japan has its own underclass living outside the mainstream in economic circumstances that are radically different to the more usual perception of a wealthy and successful society. Carolyn S. Stevens has produced a new study that intimately explores the lives of Japan's social outcasts as well as those volunteers who seek to help them and as a consequence become socially marginalized themselves.

Political Conflict and Development in East Asia and Latin America Richard Boyd, Galjart Benno, Tak-Wing Ngo, 2007-01-24 Long-run processes of socio-economic change generate prodigious problems of social conflict and social control and governments responsible for these processes must therefore manage the resultant conflict. Consequently, the success or failure of a government's management of such conflicts is a crucial factor in development outcomes. This volume investigates the political struggle for development specifically in two vital regions: East Asia and Latin America. This analysis calls into question the dominant emphasis on institutional and cultural bases for stable growth. A careful historical account of the two regions is presented which permits the rigorous testing of conventional wisdoms regarding development. Of importance to a broad range of academics in the spheres of development studies, politics, political economy and sociology, this book will also make an interesting read for those with a general interest in these areas.
