Top Pay in the Public Sector Great Britain: Parliament: House of Commons: Public Administration Select Committee, 2009 This report calls for a Top Pay Commission to name and shame public sector organisations that pay excessive salaries to their top officials The Commission would produce principles and benchmarks to be followed by pay setters and would be able to launch investigations where these were breached PASC believes a Top Pay Commission would ensure greater coherence to the setting of top pay across the public sector PASC concludes that massive increases in private sector executive salaries over the last ten years have led to smaller but sometimes still very large increases at the top of the public sector This contagion effect has meant that the highest salaries in both sectors have increased much faster than average earnings PASC also identified a number of weaknesses with current arrangements for setting pay in the public sector These include variable levels of transparency tensions between devolved and centralised pay setting systems a perception that some public servants have been rewarded for failure and a tendency for some parts of the public sector to compete against others for a small number of experienced candidates rather than growing talent internally Some of the Committee's other key recommendations include a call for better human resource management across the public sector to ensure talent is promoted from within and failure is not rewarded recommendations that would lead to publication of salaries and bonuses across the public sector more in line with the requirements placed on listed companies and a proposal to ensure all public sector executive reward packages are drawn up either by independent bodies or remuneration committees with a majority of independent members

The New Public Service Paul C. Light, 2001-09-19 According to Paul C Light's controversial new book *The New Public Service* this January's 4.8 percent federal pay increase will do little to compensate for what potential employees think is currently missing from federal careers Talented Americans are not saying show me the money but show me the job And federal jobs just do not show well All job offers being equal Light argues that the pay increase would matter But all

offers are not equal Light's research on what graduates of the top public policy and administration graduate programs want indicates that the federal government is usually so far behind its private and nonprofit competitors that pay never comes into play Light argues that the federal government is losing the talent war on three fronts First its hiring system for recruiting talent top to bottom underwhelms at almost every task it undertakes Second its annual performance appraisal system is so inflated that federal employees are not only all above average they are well on their way to outstanding Third and most importantly the federal government is so clogged with needless layers and convoluted career paths that it cannot deliver the kind of challenging work that talented Americans expect None of these problems would matter Light argues if the government centered public service was still looking for work Unfortunately as Light's book demonstrates federal careers were designed for a workforce that has not punched since the 1960s and certainly not for one that grew up in an era of corporate downsizing and mergers The government centered public service is mostly a thing of the past replaced by a multisectoral public service in which employees switch jobs and sectors with ease Light concludes his book by offering the federal government a simple choice It can either ignore the new public service and troll further and further down the class lists for new recruits while hoping that a tiny pay in

The Brown Government Matt Beech, Simon Lee, 2013-10-18 The Brown Government provides an interim evaluation of Gordon Brown's Labour administration through identifying continuities and discontinuities with the Blair governments from 1997 By focusing on key ideas and areas of public policy it presents an analysis of the first 18 months of Brown's government This book is notable for its topicality particularly for the discussions of the credit crunch the British banking crises and the interconnectedness of these events with the global economic downturn A study of Brown's handling of these crises in the economy is important as it is arguable that the present recession and credit crunch will reach unprecedented proportions and therefore define the character and content of British politics in the coming years By conducting an examination of the Brown Government's public policy

priorities one can begin to decipher its aims and values and by so doing begin to understand the next phase of the New Labour project In this sense the book is a contribution to the ongoing study of contemporary British social democracy This book was published as a special issue of Policy Studies **The Contract System of Employment for Senior Government Officials** Faamausili Dr Matagialofi Lua'iufi, S. Omar Z. Mowlana, 2011 This publication reviews the effects of the reforms implemented under the new public management programme on the roles and conditions of service of permanent secretaries in the Cook Islands Papua New Guinea Samoa Tonga and Vanuatu These countries introduced the contract system of employment and their experiences highlight the importance of acknowledging context in considering the implications of the contract system and the challenges of implementation **Public Services Or Corporate Welfare** Dexter Whitfield, 2001-01-20 Explains the need for public ownership and the welfare state in the face of increasing globalization

Daly, 2006-01-16 Based on empirical analysis using configuration theory and multi dimensional scaling this book provides insight into types of relationships that can be found between groups of countries with certain institutional context features and into the quality and equity of their education system In this volume the authors take up the challenge of considering what a European settlement might look like In doing so they take into account worldwide trends and the increasing evidence of convergence across educational systems The outcomes of comparative analyses seem to suggest that strong education systems in terms of finance governance and choice could be preferable To a greater or lesser extent therefore all the systems of education currently in use in Europe face some common challenges The way in which these challenges are addressed will determine the future of these systems Key elements in the current debate that are considered in greater detail in this volume include changing views on a centre local relations with signs of an increasing commitment to decentralisation as a guiding principle for developing school governance b school autonomy which is now increasingly regarded as the engine room for school improvement especially in relation to sustaining it and c the celebration of community and school choice as a means of securing higher levels of parental involvement This volume will be of interest to researchers and practitioners working in education educational research and sociology of education It will also be of relevance to those interested in the comparison of various education systems and in governance funding of education and school choice
