Public-Private Dynamics in Higher Education Jürgen Enders, Ben Jongbloed, 2015-09-15 Worldwide scholarship and policy making develop new ideas and models for the role of higher education and research in society and economy. This development points to changing relationships and boundaries between the public and private spheres in higher education, including their public and private steering and funding. public private partnerships between universities and firms, the rise of private higher education and of business models in the management of universities. The contributions to this edited volume investigate into the dynamics of blurring boundaries between the public and the private in higher education and their consequences for the university. **A World of Private Higher Education** Daniel C. Levy, 2024-05-13 A World of Private Higher Education is the definitive treatment of a sector accounting for a third of the world's 200 million higher education enrolment, yet remaining largely unknown even to scholars of higher education and widely mischaracterized when it is considered by stakeholders or the general public. Beyond the eye-popping numbers, several inter-related thematic findings regarding the Private and the Public underscore the subject matter's importance. First, private/public differences are significant; it matters that so many students are in a sector that not long ago was only marginal in much of the world. Second, private higher education (PHE) itself is increasingly diverse, with significant and private/public differences. Third, the overlaying of the first two realities yields increasing diversity in private/public higher education distinctions. Especially for its pioneering mapping of PHE globally, regionally, and nationally, the book draws on the pioneering dataset of the pioneering scholarly program for research on PHE, Program for Research on Private Higher Education. Unprecedented in geographical scope, the dataset is unprecedented in longitudinal coverage, too, dating back to 2000. Empirical methods allow for extensive analysis, and theoretical analysis draws on key private/public concepts embedded in literatures on privatization, nonprofit studies, and policy models. For the major challenge of penetrating inside the increasingly diverse private sector of higher education, Levy revises his heralded and widely employed PHE typology. *Rethinking Private Higher Education*, 2016-10-11

Rethinking Private Higher Education takes the university as a core institution in modern nation states which is currently undergoing a serious revision. It offers fresh insights into the actual meaning of private in different higher education contexts contributing to a deeper understanding of the actual effects of global policies in local contexts through ethnographies. This book explores how private universities were established their context and history and their changing business models and operations. The strengths of this book are its ethnographic detail which shows the complexity and fast changing forms of private higher education and its reluctance to jump to simplified labelling of public and private. It is a model for further ethnographic studies of local developments in higher education. Published annually since 1985 the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities Towards the Private Funding of Higher Education David Palfreyman, Ted Tapper, Scott Thomas, 2017-11-08. An almost universal driving force for contemporary change in universities is the shifting view of higher education as more of a private than a public good. Towards the Private Funding of Higher Education presents a contemporary global picture of this move towards the privatisation of higher education and examines how these shifts in ideology and funding priorities have significant policy implications. The resulting developments such as the imposition and escalation of student tuition fees and the emergence of online providers of higher education emerge out of a combination of economic political and ideological pressures further enhanced by technological changes. By using multiple international and regional examples to analyse the various pressures for privatisation this book examines the different forms

privatisation has taken whilst offering an analytical interpretation of why the privatisation drive emerged why it has been resisted in some instances and what forms it is likely to assume in the future Towards the Private Funding of Higher Education illustrates and challenges the emergence of a new relationship between the university government and society It is an essential read for higher education professors university managers and higher education policy makers across the world
