Chapter 13

Process Evaluation and Implementation Theory

"A single governmental strategy may involve the complex and interrelated activities of several levels of governmental bureaus and agencies, private organizations, professional associations, interest groups, and clientele populations. How can this profusion of activities be controlled and directed? This question is at the heart of what has come to be known ... as the "implementation problem."

-Eugene Bardach

The extent to which government interventions contribute to measured results is central to public sector evaluation. Occasionally, evaluations ought to aspire to even higher ambitions. They should try to answer why outcomes do or do not stem from the measures enacted. Following the lead of Urban Dahllöf and several other scholars, I wish to emphasize strongly that the evaluation of at least established interventions should have this extended explanatory ambition. Apart from data on output, outcomes, and general intervention impact on results, evaluations should include more specific information on why installed interventions have succeeded or failed. The evaluation of vintage measures ought to be a theoretical enterprise in the meaning of trying to explain in more detail why the measures have conditioned the impacts or not. I shall call this process evaluation.

Public Policy And Program Evaluation:

Public Policy and Program Evaluation Evert Vedung, 2017-07-12 Evaluation is a controversial and little understood strategy of public governance control and decision making As early as classical antiquity scholars were summoned to court to counsel kings Public policy and program evaluation is a recent addition to the great chain of attempts to use the brainpower of scholars and scientists to further the interests of the state Evaluation scholars are asked to provide retrospective assessments of the implementation output and outcome of government measures in order to effect deeper understanding and well grounded decisions on the part of those in charge of government operations Evaluation is the process of distinguishing the worthwhile from the worthless the precious from the useless evaluation implies looking backward in order to be able to steer forward better Written from a political science perspective Public Policy and Program Evaluation provides an overview of the possibilities and limits of public sector evaluation Evert Vedung examines evaluation as a mechanism for monitoring systematizing and grading government activities and their results so that public officials in their future oriented work will be able to act as responsibly creatively and efficiently as possible Topics discussed include Evaluation Rationality and Theories of Public Management Models of Evaluation Internal or External Evaluation Impact Assessment as Tryout and Social Experimentation Process Evaluation and Implementation Theory The Eight Problems Approach to Evaluation and Uses and Users of Evaluation All evaluation rests upon the idea that perceptions opinions intentions judgments in short everything concerned with the world of human consciousness play such interesting roles in political and administrative action that their functions are worth investigating Through experience humans may learn from past actions The interventions of the modern state are so extensive their execu

The Politics of Program Evaluation Dennis J. Palumbo, 1987 Evaluation and politics are related in a number of ways While programme evaluators have traditionally tried to be neutral objective and scientific in their assessment of programmes the results of evaluation are inherently political and are used by politicians programme administrators special interest groups and other stakeholders for political purposes The contributors argue that since evaluation cannot be divorced from its political context the political dimension must be understood in order to conduct effective evaluations

Program Evaluation and

the Management of Government Eliot Freidson, Ray Rist, 2020-02-18 This book appears at an opportune time in the history of evaluation. Its detailed and up to date account of the organization and use of evaluation in eight Western democratic countries: Canada, Germany, United Kingdom, United States, Denmark, Holland, Norway, and Switzerland, shows how evaluation functions at different levels of development. Focusing on the national or federal level of government, this volume presents a systematic and comparative view of eight nations at different stages of the development, institutionalization, and utilization of evaluations. All of these original contributions have been written by academics and government officials involved in the production and use of evaluation findings. Each shows how their respective country has moved to institutionalize evaluation at the federal level and each explores the reasons for that institutionalization. Among them are managerial accountability, the increased complexity of the decisions facing policymakers, federally sponsored social change that needs to be tracked and assessed, and the increasing recognition that political power comes to those who possess such information. Program Evaluation and the Management of Government is tightly integrated. The contributions share coherence, a common analytic framework, and use of key terms resulting from the authors' three year dialogue as members of the Working Group on Policy and Program Evaluation sponsored by the International Institute for Administrative Sciences located in Belgium. Their shared commitment to working together has given us the first systematic effort to assess evaluation across such a large number of countries. It will be of interest to applied social scientists and policymakers, especially those interested in comparative research.

Public Policy Analysis William N. Dunn, 2015-07-22 Dunn presents a problem oriented, integrated, multidisciplinary synthesis of concepts and methods of public policy analysis. The text draws from political science, public administration, economics, decision analysis, and social and political theory. *Encyclopedia of Public Administration and Public Policy: K-Z* Jack Rabin, 2003 From the Nuremberg trials to the Civil Service Reform Act of 1978 to recent budget reconciliation bills, the *Encyclopedia of Public Administration and Public Policy* provides detailed coverage of watershed policies and decisions from such fields as privatization, biomedical ethics, education, and diversity. This second edition features a wide range of new topics including military administration, government procurement, social theory, and justice administration in developed democracies. It also addresses current issues such as the creation of the Department of Homeland Security and covers public administration in the Middle East, Africa, Southeast Asia, the Pacific, and Latin America.

Handbook of Public Policy Evaluation Frédéric Varone, Steve Jacob, Pirmin Bundi, 2023-10-06 This comprehensive Handbook examines public policy evaluation in democracies. Focusing on the political dimension of the evaluation process, it argues that policy evaluation can be an emancipatory tool, reducing social inequalities and exclusion, and offers novel suggestions on how evaluations can be used to improve democratic policymaking.
