Lew,2021-07-19 Geographic space is a fundamental and essential construct of the physical reality within which we live move and construct our world Through space we create others anything that is any distance from us and we experience time by moving from one place point to another Because it is so fundamental to our experience we often take geographic space for granted Tourism Spaces Environments Locations and Movements shows some of the ways that geographers and other social scientists bring spatial considerations to the forefront of our research and understanding of tourism This is seen through the spatial arrangements and distributions of tourism phenomena such as attractions destinations and in the spatial behaviour of tourists themselves Today these spatial arrangements and patterns are increasingly being captured analysed and understood through various forms of formal and informal digital data The chapters in this book were originally published as a special issue of Tourism Geographies **Minds Alive** Patricia Demers,Toni Samek,2020 Minds Alive explores the enduring role and intrinsic value of libraries archives and public institutions in the digital age Featuring international contributors this volume delves into libraries and archives as institutions and institutional partners the professional responsibilities of librarians and archivists and the ways in which

librarians and archivists continue to respond to the networked age digital culture and digitization The endless possibilities and robust importance of libraries and archives are at the heart of this optimistic collection Topics include transformations in the networked digital age Indigenous issues and challenges in custodianship ownership and access the importance of the harmonization of memory institutions today and the overarching significance of libraries and archives in the public sphere Libraries and archives at once public institutions providing both communal and private havens of discovery are being repurposed and transformed in intercultural contexts Only by keeping pace with users changing needs can they continue to provide the richest resources for an informed citizenry
