Celebrity Advocacy and International Development Dan Brockington, 2014-04-03 Celebrity advocacy is a curious phenomenon It occupies a significant proportion of the public domain but does so without engaging particularly well with much of the public Yet this may not matter very much Many people at the core of advocacy and in political and business elites simply do not notice any lack of engagement In these circles celebrity advocacy can be remarkably effective Celebrity Advocacy and International Development examines the work of celebrity advocacy and lobbying in international development Its purpose is to understand the alliances resulting their history consequences wider contexts and implications It argues that celebrity advocacy signals a new aspect of elite rule For populist celebrity advocacy can mark ironically a disengagement between the public and politics and particularly the public and civil society Recognising this poses new challenges but also presents new opportunities for the development movement This book gives students and researchers in development studies and media studies a wealth of original empirical data including interviews across the NGO sector media and celebrity industries newspaper analysis large surveys of public opinion and focus group research

Development Centre Studies Public Attitudes and International Development Co-operation North-South Centre of the Council of Europe, OECD, 1998-11-20 This collection of studies of public attitudes to development co operation in OECD Development Assistance Committee DAC Member countries demonstrates that the concept of aid fatigue is misplaced A serious lack of adequate knowledge about

Canadian International Development Assistance Policies Cranford Pratt, 1996 For 25 years Canadians have argued whether the Canadian International Development Agency is the primary vehicle for helping basic human and development needs of the poorest countries and people or a tool for commercial exploitation and foreign policy Contributors from the government development organizations and academia analyze the components of Canadian aid the issues the agency has to deal with and the pressures it responds to Annotation copyright by Book News Inc Portland OR

Anti-Corruption in International Development Ingrida Kerusauskaite, 2018-02-06

Corruption is linked to a wide range of developmental issues including undermining democratic institutions slowing economic development and contributing to government instability poverty and inequality It is estimated that corruption costs more than 5 per cent of global GDP and that more than one trillion US dollars are paid in bribes each year This book unpacks the concept of corruption its political and ethical influences its measurement commitments to combat corruption and ways that this is being attempted Building on the research on the nature causes and consequences of corruption this book analyses international anti corruption interventions in particular It discusses approaches to focus efforts to tackle corruption in developing countries on where they are most likely to be successful The efforts of the UK are considered as a detailed case study with comparisons brought in as necessary from other countries and multilateral institutions anti corruption efforts Bridging a range of disciplines Anti Corruption in International Development will be of interest to students and scholars of international development public administration management international relations politics and criminal justice The Globalization of Foreign Aid Liam Swiss, 2017-12-01 Why do aid agencies from wealthy donor countries with diverse domestic political and economic contexts arrive at very similar positions on a wide array of aid policies and priorities This book suggests that this homogenization of policy represents the effects of common processes of globalization manifest in the aid sector Drawing on both quantitative and qualitative analysis of policy adoption the book argues that we need to examine macro level globalizing influences at the same time as understanding the micro level social processes at work within aid agencies in order to adequately explain the so called emerging global consensus that constitutes the globalization of aid The book explores how global influences on aid agencies in Canada Sweden and the United States are mediated through micro level processes Using a mixed methods approach the book combines cross national statistical analysis at the global level with two comparative case studies which look at the adoption of common policy priorities in the fields of gender and security The Globalization of Foreign Aid will be useful to researchers of foreign aid development international relations and globalization as well as to the aid policy community The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY 4.0 license **Global Learning and International Development in the Age of Neoliberalism** Stephen McCloskey, 2021-10-13 This book argues that the international development sector is in crisis which can be mostly sourced to its side stepping the dominant development question of our age the neoliberal growth paradigm It argues that this crisis can be addressed at least in part by the sector's re engagement with the radical development education process that it helped to foster and sustain for over two decades The recent safeguarding scandal is symptomatic of a sector that is becoming overly hierarchical brand conscious and disconnected from its base This book argues that many of the problems the sector is facing can be sourced to its failings in grappling with the question of neoliberalism and formulating a coherent critique of how market orthodoxy has accelerated poverty in the global North and South This book recommends re embracing the radical origins of global learning situated in

the participative methodology and praxis reflection and action of Paulo Freire both as internal capacity building and external public engagement The book proposes a new development paradigm focusing on bottomup participative approaches to policy making based on the needs of those NGOs claim to represent the poor marginalised and voiceless rather than constantly following the agenda of donors and governments The recommendations made by this book will serve as an important resource for researchers and students of international development and global learning as well as to NGOs civil society activists and education practitioners looking for solutions to the problems within the sector International Development and Food Assistance Act of 1975 United States.
