Public-domain Software Rusel DeMaria, George R. Fontaine, 1987 Business Software, 1988-06 *Nonacademic Writing* Ann Hill Duin, Craig J. Hansen, 2013-11-05 In this volume methodological cultural technological and political boundaries felt by writers are analyzed translated and challenged in a way that will appeal to researchers theorists graduate students instructors and managerial audiences Instead of extracting rules from previous research the contributors working from multidisciplinary perspectives describe and analyze the social and technological contexts surrounding nonacademic writing Their essays present a formative rather than summative outlook toward future research on nonacademic writing Collectively these chapters articulate a unique perspective toward nonacademic writing that considers The centrality of emerging communications technologies in nonacademic writing research and the need for a socio technological perspective New technologies reshape the concept of text and significantly impact the writing process and written products in nonacademic settings The relationship between the academy and the workplace A number of chapters challenge us sometimes from opposing perspectives to scrutinize our role as writing educators in preparing students for the workplace Should we support the interests of corporate employers or should we resist those interests Should we enculturate students in workplace writing practices by placing them in these environments or should we examine the tacit knowledge gained by workplace professionals and deliver this via classroom instruction New theory new research agendas Contributors from diverse fields offer new theoretical lenses or use established lenses in innovative ways expanding the agenda for nonacademic writing research This volume represents the vision the social landscape demands for research and pedagogy in nonacademic writing **DBMS.**, 1988-12 *Resisting Intellectual Property* Debora J. Halbert, 2006-02-01 Over the past decade the scope of copyright and patent law has grown significantly strengthening property rights even when such rights seem to infringe upon other more basic priorities This book investigates the ways in which activists scholars and communities are resisting the expansion of copyright and patent law in the information age Debora J Halbert explores how an alternative framework for understanding intellectual property including about how we ought to think about the issues the development of social movements around specific issues and civil disobedience has developed Each chapter in the book discusses how resistance is developing in relation to a particular copyright or patent issue such as access to patented medication access to copyrighted information and music via the Internet the patenting of genetic material This controversial book examines the ways in which the idea of intellectual property is being re thought by the victims of an over expansive legal system It will appeal to students and researchers from a range of disciplines from law and political science to computer science with an interest in intellectual property Dr. Dobb's Toolbook of Forth, 1987 Dr. Dobb's Toolbook of 80286/80386 Programming Phillip R. Robinson, 1988 **Shareware for Library Applications** Alan R. Samuels, Nancy Melin Nelson, 1985 *Grid Computing - GRID 2000* Rajkumar Buyya, Marc Baker, 2003-07-31 Welcome to GRID 2000 the

first annual IEEE ACM international workshop on grid computing sponsored by the IEEE Computer Society's Task Force on Cluster Computing TFCC and the Association for Computing Machinery ACM The workshop has received generous sponsorship from the European Grid Forum eGrid the EuroTools SIG on Metacomputing Microsoft Research USA Sun Microsystems USA and the Centre for Development of Advanced Computing India It is a sign of the current high levels of interest and activity in Grid computing that we have had contributions to the workshop from researchers and developers in Australia Austria Canada France Germany Greece India Italy Japan Korea The Netherlands Spain Switzerland UK and USA It is our pleasure and honor to present the first annual international Grid computing meeting program and the proceedings The Grid A New Network Computing Infrastructure The growing popularity of the Internet along with the availability of powerful computers and high speed networks as low cost commodity components are helping to change the way we do computing These new technologies are enabling the coupling of a wide variety of geographically distributed resources such as parallel supercomputers storage systems data sources and special devices that can then be used as a unified resource and thus form what is popularly known as the Grids *Dr. Dobb's Journal of Software Tools for the Professional Programmer* ,1989
