Fables, Sermonettes, and Parables by the Stricker, 13th Century German Poet, in English Translation

Stricker, 1999 The thirteenth century poet who used the pseudonym Der Stricker The Knitter is the earliest known composer of fables sermonettes and parables examples of Kleindichtung in the German language Some of the Stricker s fables and parables are as far as is known original with him others are new variants of works that had appeared in other lands and languages The sermonettes are typical examples of what might be called the folk theology of the day drawing on oral tradition rather than directly on the Scriptures In his verse tales the author proves to be a keen often harsh social critic providing a realistic often cynical picture of medieval society that stands in sharp contrast to the romanticism of nearly all German literature of his century This is the first collection of The Stricker s short narratives in English translation *Indian Books in Print* , 2003 The Therapeutic Use of Stories Kedar Nath Dwivedi, 2006-10-19 The potential for healing available in well known myths and stories is increasingly recognized but many practitioners are unsure how to tap into this rich and often culturally specific source of insight What sort of story is best for what sort of situation How can it be introduced naturally into the session What is the best way of using the story These are some of the questions contributors to this book set out to answer They explore the historical and cultural context of story telling and provide examples of specific stories for specific situations Covering emotional themes such as anger anxiety fear shame guilt separation and bereavement the authors show how they work through stories with many different kinds of client groups and individuals of all ages in educational health and social science settings The Therapeutic Use of Stories provides a sound theoretical framework for the use of stories examples of stories with a high therapeutic value and practical advice on how to use them to best effect
