Correctional Ethics John Kleinig, 2017-07-05 Correctional Ethics gathers the most prominent contributions to this burgeoning field ranging from the philosophy of punishment through to ethical appraisals of incarceration the professional responsibilities of prison personnel and formative work in restorative justice In addition it provides an annotated research agenda to help shape the development of a comprehensive correctional ethic For those working in correctional ethics this collection provides an essential resource Honor and Revenge: A Theory of Punishment Whitley R.P. Kaufman, 2012-08-28 This book addresses the problem of justifying the institution of criminal punishment It examines the paradox of retribution the fact that we cannot seem to reject the intuition that punishment is morally required and yet we cannot even after two thousand years of philosophical debate find a morally legitimate basis for

inflicting harm on wrongdoers The book comes at a time when a new abolitionist movement has arisen a movement that argues that we should give up the search for justification and accept that punishment is morally unjustifiable and should be discontinued immediately This book however proposes a new approach to the retributive theory of punishment arguing that it should be understood in its traditional formulation that has been long forgotten or dismissed that punishment is essentially a defense of the honor of the victim Properly understood this can give us the possibility of a legitimate moral justification for the institution of punishment **Catalog of Copyright Entries. Punishment & Sentencing Mirko Bagaric,2001-07 Sentencing is the most important area of law yet ironically it is also arguably the least coherent This book suggests a way of introducing principle into sentencing by bridging the gap between the philosophical justification for punishment and sentencing law and practice **Books in Series** ,1985 Vols for 1980 issued in three parts Series Authors and Titles *Retribution, Justice, and Therapy* J.G. Murphy,2012-12-06 One might legitimately ask what reasons other than vanity could prompt an author to issue a collection of his previously published essays The best reason I think is the belief that the essays hang together in such a way that as a book they produce a whole which is in a sense greater than the sum of its parts When this happens as I hope it does in the present case it is because the essays pursue related themes in such a way that together they at least form a start toward the development of a systematic theory on the common foundations supporting the particular claims in the particular articles With respect to this collection the essays can all be read as particular ways of pursuing the following general pattern of thought that a commitment to justice and a respect for rights and not social utility must be the foundation of any morally acceptable legal order that a social contractarian model is the best way to illuminate this foundation that a retributive theory of punishment is the only theory of punishment resting on such a foundation and thus is the only morally acceptable theory of punishment that the twentieth century s faddish movement toward a scientific or therapeutic response to crime runs grave risks of undermining the foundations of justice and rights on which the legal order ought to rest and finally that the legitimate worry about the tendency of the behavioral sciences to undermine the values of Prisoners of the International Community Denis Abels,2012-09-14 Little has been written about the legal position and conditions of detention of persons detained by international criminal tribunals particularly as regards their internal legal position their rights and duties inside the remand facility The primary purpose of this book is to set out the law governing the detention of persons detained under the tribunals jurisdiction The book provides a detailed account of this area of international criminal law It sets out the applicable law including the law s underlying principles and focuses on a number of specific procedural and substantive legal issues As to procedural issues it examines the available complaints and disciplinary procedures as well as procedures applicable to the designation of States for the enforcement of the tribunals sentences In respect of substantive law it examines the detainees right to contact with the outside world including contact with their relatives with their lawyers and with the media The book

will be an extremely useful guidance for practitioners in applying the law and principles of the tribunals detention law particularly because it is the first monograph written on the topic The Ethics of Legal Coercion John D.

Hodson,1983-04-30 Are all of the commonly accepted aims of the use of law justifiable Which kinds of behavior are justifiably prohibited which kinds justifiably required What uses of law are not defensible How can the legitimacy or the illegitimacy of various uses of law be explained or accounted for These are questions the answering of which involves one in many issues of moral principle for the answers require that one adopt positions even if only implicitly on further questions of what kinds of actions or policies are morally or ethically acceptable The present work aimed at questions of these kinds is thus a study in the ethical evaluation of major uses of legal coercion It is an attempt to provide a framework within which many questions about the proper uses of law may be fruitfully discussed The framework if successful can be used by anyone asking questions about the defensibility of particular or general uses of law whether from the perspective of someone considering whether to bring about some new legal provision from the perspective of someone concerned to evaluate an existing provision or from that of someone concerned more abstractly with questions about the appropriate substance of an ideal legal system In addressing these and associated issues I shall be exploring the extent to which an ethics based on respect for persons and their autonomy can handle satisfactorily the problems arising here
